NEW RESIDENTIAL CONSTRUCTION IN JULY 2010

The U.S. Census Bureau and the Department of Housing and Urban Development jointly announced the following new residential construction statistics for July 2010:

BUILDING PERMITS

Privately-owned housing units authorized by building permits in July were at a seasonally adjusted annual rate of 565,000. This is 3.1 percent ($\pm 2.0\%$) below the revised June rate of 583,000 and is 3.7 percent ($\pm 2.2\%$) below the July 2009 estimate of 587,000.

Single-family authorizations in July were at a rate of 416,000; this is 1.2 percent ($\pm 1.2\%$)* below the revised June figure of 421,000. Authorizations of units in buildings with five units or more were at a rate of 129,000 in July.

HOUSING STARTS

Privately-owned housing starts in July were at a seasonally adjusted annual rate of 546,000. This is 1.7 percent ($\pm 9.7\%$)* above the revised June estimate of 537,000, but is 7.0 percent ($\pm 7.5\%$)* below the July 2009 rate of 587,000.

Single-family housing starts in July were at a rate of 432,000; this is 4.2 percent ($\pm 8.7\%$)* below the revised June figure of 451,000. The July rate for units in buildings with five units or more was 95,000.

HOUSING COMPLETIONS

Privately-owned housing completions in July were at a seasonally adjusted annual rate of 587,000. This is 32.8 percent ($\pm 6.8\%$) below the revised June estimate of 874,000 and is 25.4 percent ($\pm 7.3\%$) below the July 2009 rate of 787,000.

Single-family housing completions in July were at a rate of 490,000; this is 27.5 percent ($\pm 7.6\%$) below the revised June rate of 676,000. The July rate for units in buildings with five units or more was 91,000.

New Residential Construction data for August 2010 will be released on Tuesday, September 21, 2010, at 8:30 A.M. EDT.

EXPLANATORY NOTES

In interpreting changes in the statistics in this release, note that month-to-month changes in seasonally adjusted statistics often show movements which may be irregular. It may take 3 months to establish an underlying trend for building permit authorizations, 3 months for total starts, and 5 months for total completions. The statistics in this release are estimated from sample surveys and are subject to sampling variability as well as nonsampling error including bias and variance from response, nonreporting, and undercoverage. Estimated relative standard errors of the most recent data are shown in the tables. Whenever a statement such as "2.5 percent ($\pm 3.2\%$) above" appears in the text, this indicates the range (-0.7 to +5.7 percent) in which the actual percent change is likely to have occurred. All ranges given for percent changes are 90-percent confidence intervals and account only for sampling variability. If a range does not contain zero, the change is statistically significant. If it does contain zero, the change is not statistically significant; that is, it is uncertain whether there was an increase or decrease. The same policies apply to the confidence intervals for percent changes shown in the tables. On average, the preliminary seasonally adjusted estimates of total building permits, housing starts and housing completions are revised about two percent or less. Explanations of confidence intervals and sampling variability can be found on our web site listed above.

* 90% confidence interval includes zero. The Census Bureau does not have sufficient statistical evidence to conclude that the actual change is different from zero.
