NEW RESIDENTIAL CONSTRUCTION IN JANUARY 2015

The U.S. Census Bureau and the Department of Housing and Urban Development jointly announced the following new residential construction statistics for January 2015:

BUILDING PERMITS

Privately-owned housing units authorized by building permits in January were at a seasonally adjusted annual rate of 1,053,000. This is 0.7 percent ($\pm 0.6\%$) below the revised December rate of 1,060,000, but is 8.1 percent ($\pm 2.0\%$) above the January 2014 estimate of 974,000.

Single-family authorizations in January were at a rate of 654,000; this is 3.1 percent ($\pm 0.9\%$) below the revised December figure of 675,000. Authorizations of units in buildings with five units or more were at a rate of 372,000 in January.

HOUSING STARTS

Privately-owned housing starts in January were at a seasonally adjusted annual rate of 1,065,000. This is 2.0 percent ($\pm 10.4\%$)* below the revised December estimate of 1,087,000, but is 18.7 percent ($\pm 14.5\%$) above the January 2014 rate of 897,000.

Single-family housing starts in January were at a rate of 678,000; this is 6.7 percent ($\pm 10.6\%$)* below the revised December figure of 727,000. The January rate for units in buildings with five units or more was 381,000.

HOUSING COMPLETIONS

Privately-owned housing completions in January were at a seasonally adjusted annual rate of 930,000. This is 1.3 percent ($\pm 7.4\%$)* above the revised December estimate of 918,000 and is 9.4 percent ($\pm 10.4\%$)* above the January 2014 rate of 850,000.

Single-family housing completions in January were at a rate of 649,000; this is 2.3 percent ($\pm 7.0\%$)* below the revised December rate of 664,000. The January rate for units in buildings with five units or more was 274,000.

New Residential Construction data for February 2015 will be released on Tuesday, March 17, 2015, at 8:30 A.M. EDT.

Our Internet site is: <http://www.census.gov/starts>

Beginning with this release, the building permit data reflect a small increase in the universe of permit-issuing places and are labeled as the 2014 Universe. These changes have no effect on the estimates of new housing starts and completions because the increase in the permit universe is offset by a decrease in the universe of areas where permits are not required. Building permit data for 2014 for both universes are shown in Table 1.

Beginning with the release of April 2015 data on May 19, 2015, estimates of housing units authorized, but not started, will be available on a seasonally adjusted basis as well as a not seasonally adjusted basis. Historic seasonally adjusted data will be available back to January 1999 at http://www.census.gov/construction/nrc/historical_data/.

To receive the latest updates on the Nation's key economic indicators, download the America's Economy app for Apple and Android smartphones and tablets.

EXPLANATORY NOTES

In interpreting changes in the statistics in this release, note that month-to-month changes in seasonally adjusted statistics often show movements which may be irregular. It may take 3 months to establish an underlying trend for building permit authorizations, 4 months for total starts, and 6 months for total completions. The statistics in this release are estimated from sample surveys and are subject to sampling variability as well as nonsampling error including bias and variance from response, nonreporting, and undercoverage. Estimated relative standard errors of the most recent data are shown in the tables. Whenever a statement such as "2.5 percent ($\pm 3.2\%$) above" appears in the text, this indicates the range (-0.7 to +5.7 percent) in which the actual percent change is likely to have occurred. All ranges given for percent changes are 90-percent confidence intervals and account only for sampling variability. If a range does not contain zero, the change is statistically significant. If it does contain zero, the change is not statistically significant; that is, it is uncertain whether there was an increase or decrease. The same policies apply to the confidence intervals for percent changes shown in the tables. On average, the preliminary seasonally adjusted estimates of total building permits, housing starts and housing completions are revised about four percent or less. Explanations of confidence intervals and sampling variability can be found on our web site listed above.

* 90% confidence interval includes zero. The Census Bureau does not have sufficient statistical evidence to conclude that the actual change is different from zero.
