NEW RESIDENTIAL CONSTRUCTION IN MARCH 2015

The U.S. Census Bureau and the Department of Housing and Urban Development jointly announced the following new residential construction statistics for March 2015:

BUILDING PERMITS

Privately-owned housing units authorized by building permits in March were at a seasonally adjusted annual rate of 1,039,000. This is 5.7 percent ($\pm 2.0\%$) below the revised February rate of 1,102,000, but is 2.9 percent ($\pm 0.9\%$) above the March 2014 estimate of 1,010,000.

Single-family authorizations in March were at a rate of 636,000; this is 2.1 percent ($\pm 0.9\%$) above the revised February figure of 623,000. Authorizations of units in buildings with five units or more were at a rate of 378,000 in March.

HOUSING STARTS

Privately-owned housing starts in March were at a seasonally adjusted annual rate of 926,000. This is 2.0 percent $(\pm 13.0\%)^*$ above the revised February estimate of 908,000, but is 2.5 percent $(\pm 11.5\%)^*$ below the March 2014 rate of 950,000.

Single-family housing starts in March were at a rate of 618,000; this is 4.4 percent $(\pm 12.3\%)^*$ above the revised February figure of 592,000. The March rate for units in buildings with five units or more was 287,000.

HOUSING COMPLETIONS

Privately-owned housing completions in March were at a seasonally adjusted annual rate of 823,000. This is 3.9 percent ($\pm 10.4\%$)* below the revised February estimate of 856,000 and is 5.8 percent ($\pm 10.2\%$)* below the March 2014 rate of 874,000.

Single-family housing completions in March were at a rate of 602,000; this is 0.8 percent ($\pm 11.5\%$)* above the revised February rate of 597,000. The March rate for units in buildings with five units or more was 211,000.

New Residential Construction data for April 2015 will be released on Tuesday, May 19, 2015, at 8:30 A.M. EDT.

Our Internet site is: http://www.census.gov/starts

Beginning with the release of April 2015 data on May 19, 2015, estimates of housing units authorized, but not started, will be available on a seasonally adjusted basis as well as a not seasonally adjusted basis. Historic seasonally adjusted data will be available back to January 1999 at http://www.census.gov/construction/nrc/historical_data/ .

To receive the latest updates on the Nation's key economic indicators, download the America's Economy app for Apple and Android smartphones and tablets.

EXPLANATORY NOTES

In interpreting changes in the statistics in this release, note that month-to-month changes in seasonally adjusted statistics often show movements which may be irregular. It may take 3 months to establish an underlying trend for building permit authorizations, 4 months for total starts, and 6 months for total completions. The statistics in this release are estimated from sample surveys and are subject to sampling variability as well as nonsampling error including bias and variance from response, nonreporting, and undercoverage. Estimated relative standard errors of the most recent data are shown in the tables. Whenever a statement such as "2.5 percent (±3.2%) above" appears in the text, this indicates the range (-0.7 to +5.7 percent) in which the actual percent change is likely to have occurred. All ranges given for percent changes are 90-percent confidence intervals and account only for sampling variability. If a range does not contain zero, the change is statistically significant. If it does contain zero, the change is not statistically significant; that is, it is uncertain whether there was an increase or decrease. The same policies apply to the confidence intervals for percent changes shown in the tables. On average, the preliminary seasonally adjusted estimates of total building permits, housing starts and housing completions are revised three percent or less. Explanations of confidence intervals and sampling variability can be found on our web site listed above.

^{* 90%} confidence interval includes zero. The Census Bureau does not have sufficient statistical evidence to conclude that the actual change is different from zero.
