

FOR RELEASE AT 10:00 AM EDT, TUESDAY, MAY 23, 2023

MONTHLY NEW RESIDENTIAL SALES, APRIL 2023

Release Number: CB23-78

Notice of Revision: With this release, seasonally adjusted estimates of housing units sold, housing units for sale, and the months' supply of new housing have been revised back to January 2018. All revised estimates are available on our website.

May 23, 2023 - The U.S. Census Bureau and the U.S. Department of Housing and Urban Development jointly announced the following new residential sales statistics for April 2023:

 NEW RESIDENTIAL SALES APRIL 2023	
New Houses Sold¹:	683,000
New Houses For Sale²:	433,000
Median Sales Price:	\$420,800
Next Release: June 27, 2023	
¹ Seasonally Adjusted Annual Rate (SAAR)	
² Seasonally Adjusted	
Source: U.S. Census Bureau, HUD, May 23, 2023	

New Home Sales

Sales of new single-family houses in April 2023 were at a seasonally adjusted annual rate of 683,000, according to estimates released jointly today by the U.S. Census Bureau and the Department of Housing and Urban Development. This is 4.1 percent (± 11.8 percent)* above the revised March rate of 656,000 and is 11.8 percent (± 15.1 percent)* above the April 2022 estimate of 611,000.

Sales Price

The median sales price of new houses sold in April 2023 was \$420,800. The average sales price was \$501,000.

For Sale Inventory and Months' Supply

The seasonally-adjusted estimate of new houses for sale at the end of April was 433,000. This represents a supply of 7.6 months at the current sales rate.

The May report is scheduled for release on June 27, 2023. View the full schedule in the Economic Briefing Room:

<www.census.gov/economic-indicators/>. The full text and tables for this release can be found at

EXPLANATORY NOTES

These statistics are estimated from sample surveys. They are subject to sampling variability as well as nonsampling error including bias and variance from response, nonreporting, and undercoverage. Estimated average relative standard errors of the preliminary data are shown in the tables. Whenever a statement such as “2.5 percent ($\pm 3.2\%$) above” appears in the text, this indicates the range (-0.7 to +5.7 percent) in which the actual percent change is likely to have occurred. All ranges given for percent changes are 90-percent confidence intervals and account only for sampling variability. If a range does not contain zero, the change is statistically significant. If it does contain zero, the change is not statistically significant; that is, it is uncertain whether there was an increase or decrease. The same policies apply to the confidence intervals for percent changes shown in the tables. Changes in seasonally adjusted statistics often show irregular movement. It takes 3 months to establish a trend for new houses sold. Preliminary new home sales figures are subject to revision due to the survey methodology and definitions used. The survey is primarily based on a sample of houses selected from building permits. Since a “sale” is defined as a deposit taken or sales agreement signed, this can occur prior to a permit being issued. An estimate of these prior sales is included in the sales figure. On average, the preliminary seasonally adjusted estimate of total sales is revised about 4.2 percent. Changes in sales price data reflect changes in the distribution of houses by region, size, etc., as well as changes in the prices of houses with identical characteristics. Explanations of confidence intervals and sampling variability can be found on our website.

API

The Census Bureau’s application programming interface lets developers create custom apps to reach new users and makes key demographic, socio-economic and housing statistics more accessible than ever before.

www.census.gov/developers/

FRED Mobile App

Receive the latest updates on the nation’s key economic indicators by downloading the FRED App <https://fred.stlouisfed.org/fred-mobile/> for both Apple and Android devices. FRED, the signature database of the Federal Reserve Bank of St. Louis, now incorporates the Census Bureau’s 13 economic indicators.

###

* The 90 percent confidence interval includes zero. In such cases, there is insufficient statistical evidence to conclude that the actual change is different from zero.
