### New Home Sales

Sales of new single-family houses in May 2024 were at a seasonally adjusted annual rate of 619,000, according to estimates released jointly today by the U.S. Census Bureau and the Department of Housing and Urban Development. This is 11.3 percent ( $\pm 15.5$  percent)\* below the revised April rate of 698,000 and is 16.5 percent ( $\pm 16.2$  percent) below the May 2023 estimate of 741,000.

### Sales Price

The median sales price of new houses sold in May 2024 was \$417,400. The average sales price was \$520,000.

### For Sale Inventory and Months' Supply

The seasonally-adjusted estimate of new houses for sale at the end of May was 481,000. This represents a supply of 9.3 months at the current sales rate.

The June report is scheduled for release on July 24, 2024. View the full schedule in the Economic Briefing Room:

## EXPLANATORY NOTES

These statistics are estimated from sample surveys. They are subject to sampling variability as well as nonsampling error including bias and variance from response, nonreporting, and undercoverage. Estimated average relative standard errors of the preliminary data are shown in the tables. Whenever a statement such as “2.5 percent ( $\pm 3.2\%$ ) above” appears in the text, this indicates the range (-0.7 to +5.7 percent) in which the actual percent change is likely to have occurred. All ranges given for percent changes are 90-percent confidence intervals and account only for sampling variability. If a range does not contain zero, the change is statistically significant. If it does contain zero, the change is not statistically significant; that is, it is uncertain whether there was an increase or decrease. The same policies apply to the confidence intervals for percent changes shown in the tables. Changes in seasonally adjusted statistics often show irregular movement. It takes 3 months to establish a trend for new houses sold. Preliminary new home sales figures are subject to revision due to the survey methodology and definitions used. The survey is primarily based on a sample of houses selected from building permits. Since a “sale” is defined as a deposit taken or sales agreement signed, this can occur prior to a permit being issued. An estimate of these prior sales is included in the sales figure. On average, the preliminary seasonally adjusted estimate of total sales is revised about 3.2 percent. Changes in sales price data reflect changes in the distribution of houses by region, size, etc., as well as changes in the prices of houses with identical characteristics. Explanations of confidence intervals and sampling variability can be found on our website.

## FRED Mobile App

Receive the latest updates on the nation’s key economic indicators by downloading the FRED App <<https://fred.stlouisfed.org/fred-mobile/>> for both Apple and Android devices. FRED, the signature database of the Federal Reserve Bank of St. Louis, now incorporates the Census Bureau’s 13 economic indicators.

###

\* The 90 percent confidence interval includes zero. In such cases, there is insufficient statistical evidence to conclude that the actual change is different from zero.

p Preliminary r Revised

A Represents an RSE or SE that is greater or equal to 100 percent or could not be computed

S Does not meet publication standards because tests for identifiable and stable seasonality do not meet reliability standards

X Not applicable Z Less than 500 units or less than 0.5 percent

<sup>1</sup> Houses for which sales price was not reported have been distributed proportionally to those for which sales price was reported

<sup>2</sup> Average relative standard error for the latest 6-month period
