

NOTICE TO USERS

Last year, the Census Bureau announced its intention to offer more information in electronic format while reducing the number of printed reports. This change is now being implemented for the P20 Current Population Reports series. Many P20 reports, such as *Fertility of American Women*, are implementing this change.

Instead, to keep you informed of the major findings from the Current Population Survey, short data updates will be produced and made available in both printed and electronic forms. Additionally, the detailed tabulations that have been part of the printed reports will be updated periodically in electronic form on the Internet. If you wish to obtain the new tabulations for June 1995, updating *Fertility of American Women: June 1994* (Current Population Reports, P20-482), please see the "Detailed Tabulations" section at the end of this update.

Our decision to modify the format of the P20 series is based on a variety of factors. Ultimately, we hope this decision will provide users with more timely data on a wider variety of topics. If you have comments about this change or the P20 series in general, please contact us on the Internet at: pop@census.gov, or write to: Chief, Population Division, U.S. Bureau of the Census, Washington, DC 20233.

DATA HIGHLIGHTS

Detailed tabulations are now available which provide fertility statistics by selected characteristics for women 15 to 44 years old in the United States, based on the June 1995 Current Population Survey. These tables provide information such as:

- In 1995, women 15 to 44 years old had an average of 1.2 children each.
- About 42 percent of women in the same age group were childless in 1995.
- About 55 percent of women who had a child in the preceding 12-months were in the labor force.
- Of the 22.8 million women who had never been married at the time of survey, 21 percent had given birth to at least one child.
- There were 6.1 million foreign-born women, 15 to 44 years old, whom had borne an average of 1.6 children each.

DETAILED TABULATIONS

The tables include five detailed tables (18 pages), two summary tables, six historical tables, one state table, and two methodological tables, providing demographic characteristics of women by race and Hispanic origin. The electronic version of these tables is available on the Internet, at the Census Bureau's World-Wide Web site (<http://www.census.gov>). Once on the site, click on Subjects A-Z, then on Fertility.

A paper version of these tables, along with related historical tables, is available as PPL-74 for \$23. To receive a paper copy, send your request for "PPL-74, Fertility of American Women: June 1995 (Update)," along with a check or money order in the amount of \$23 payable to Commerce-Census-88-00-9010, to U.S. Department of Commerce, Bureau of the Census, P.O. Box 277943, Atlanta, GA 30384-7943, or call our Statistical Information Office on 301-457-2422. A copy of these tabulations will be made available to any existing CPR P20 subscriber without charge, provided that the request is made within 3 months of the issue date of this update. Contact our Statistical Information Office on 301-457-2422.

For additional information on this topic, contact the Fertility and Family Statistics Branch, on 301-457-2449, or via Internet E-mail (abachu@census.gov).

The data in the detailed tables are from the June 1995 Current Population Survey. All survey data are subject to sampling variability as well as survey design flaws, respondent classification errors, and data processing mistakes. The Census Bureau has taken steps to minimize errors. However, because of methodological differences, use caution when comparing these data with data from other sources. For information on the source of the data, the accuracy of the estimates, the use of standard errors, and the computation of standard errors for estimates, see the section on "Source and Accuracy of Estimates" on the Internet (<http://www.bls.census.gov/cps/ads/1996/ssrcacc.htm>). For additional information on the source and accuracy of estimates in this report, contact Thomas F. Moore, Demographic Statistical Methods Division (301-457-4215) or via Internet E-mail (TMoore@census.gov).

Income not reported	5,369	54.5	21.0	2,343	62.7	39.7	3,026	42.2	6.4
REGION OF RESIDENCE									
Northeast	11,596	58.6	20.9	5,284	74.7	29.3	6,312	49.3	13.8
Midwest	14,206	59.7	23.8	6,567	84.2	39.6	7,639	39.2	10.3
South	21,348	58.0	23.9	9,906	89.4	42.1	11,442	38.9	8.0
West	13,075	71.1	23.3	5,985	92.9	37.6	7,089	47.2	11.2

¹Persons of Hispanic origin may be of any race. ²Includes those born abroad of American parents. ³Includes separated women.

Note: Since the number of women who have had a birth during the 12-month period was tabulated and not the actual numbers of births themselves, a small underestimation of fertility for this period may exist because of the omission of: (1) Multiple births; (2) more than one live birth occurring to women in a 12-month period (the woman is counted only once); (3) women who had births in the period and who died by the survey date; (4) women who were in institutions and therefore not in the survey universe; and (5) 2 percent of births in a 12-month period (only 51 weeks of data are tabulated in the CPS due to the interview schedule). These losses may be somewhat offset by the inclusion in the CPS of births to immigrants who did not have their children born in the United States and births to nonresident women who had their children born in the U.S. These births would have not been recorded in the vital registration system. The ages of the women in this table and similar tables refer to the age of women at the time of the survey and not at the birth of their child.

Table B. Distribution of Women and Average Number of Children Ever Born, by Race, Age, and Marital Status: June 1995

¹ Numbers refer to women in the survey sample; they are not inflated estimates of the national population.

² "Not reporting" includes any woman under 24 years of age who reported for children ever born a number which resulted in an average of more than one birth a year since age 14; e.g., a woman 16 years old who reports 4 children ever born.

³ Persons of Hispanic origin may be of any race.

⁴ For a woman not reporting on the number of children ever born, a number was allocated by matching her on the basis of similarity in selected characteristics with a woman who did report the number of children ever born.
