ACKNOWLEDGMENTS

This report was prepared in the Governments Division by the Elementary and Secondary Education Statistics Branch, headed by **Sharon J. Meade**. **James R. Berry** supervised the data collection and editing activities, assisted by **Brian A. Gordon**, **Mark S. Zolecki** and **Dorothy L. Hepner**. **Mark S. Zolecki** coordinated publication preparation activities and prepared data tabulations. **James R. Berry** and **Brian A. Gordon** reviewed the tables and evaluated the final publication copy, assisted by **Osei L. Ampadu** and **Dorothy L. Hepner**.

The Systems Support Division provided the table composition system. **Robert Joseph Brown**, Table Image Processing System (TIPS) Senior Software Engineer, was responsible for the design and development of the TIPS, under the supervision of **Robert J. Bateman**, Assistant Division Chief, Information Systems.

Kim D. Ottenstein, **Margaret A. Smith**, and **Meshel L. Butler** of the Administrative and Customer Services Division, **Walter C. Odom**, Chief, provided publications and printing management, graphics design and composition, and editorial review for print and electronic media. General direction and production management were provided by **James R. Clark**, Assistant Chief, and **Susan L. Rappa**, Chief, Publications Services Branch.

The U.S. Census Bureau offers special thanks for the cooperation of the numerous state and local government officials in providing information for this report.

For information regarding data in the report, contact **Sharon J. Meade** or **James R. Berry**, Governments Division, U.S. Census Bureau, Washington, DC 20233-6800, or phone toll-free 1-800-622-6193.

Introduction

A census of governments is taken at 5-year intervals as required by law under Title 13, United States Code, Section 161. This 2002 census, similar to those taken since 1957, covers three major subject fields: government organization, public employment, and government finances.

Volume 4. Government Finances contains six parts that cover a wide range of state and local government financial activity in fiscal year 2001-02. They are: No. 1, Public Education Finances; No. 2, Finances of Special District Governments; No. 3, Finances of County Governments; No. 4, Finances of Municipal and Township Governments; No. 5, Compendium of Government Finances; and No. 6, Employee-Retirement Systems of State and Local Governments.

This report, No. 1, contains financial statistics relating to public elementary-secondary education. It includes national and state financial aggregates and display data for each public school system with an enrollment of 10,000 or more.

ORGANIZATION OF THIS REPORT

This introductory text describes the scope, concepts, sources, survey methodology, and limitations of the data. It also identifies other U.S. Census Bureau products that contain public education data.

The tabular section contains 18 tables. Summaries as well as state-level detail are presented in Tables 1 through 10. Table 1 contains data for all major financial categories for public school systems. Revenue summaries and supporting detail are shown in Tables 2 through 5, expenditure in Tables 6 through 9, and indebtedness in Table 10.

State rankings based on revenue and expenditure per pupil appear in Table 11. State rankings based on the relation of revenue and expenditure to state personal income are shown in Table 12. National summaries and enrollment size-group data for elementary-secondary education systems appear in Tables 13 and 14.

Finance data for individual public school systems with enrollments of 10,000 or more are displayed in Tables 15 through 17. Data are presented in thousands of dollars in Table 15 for revenue, expenditure, and indebtedness items. Table 16 displays percent distributions of federal, state, and local revenue for these same school systems. Per pupil expenditure data appear in Table 17.

Supplementary data on state-level populations, enrollments, and personal income are shown in Table 18.

SCOPE

This 2002 report presents data on the financial activity of public elementary and secondary school systems. Related data on public school system employment are available in Volume 3 of the 2002 Census of Governments and in annual reports. Information for higher and other education systems can be found in separate annual and census of governments reports that focus on the finances of states, counties, cities and towns, and government finances in general.

GENERAL CONCEPTS

Refer to Appendix A, Definitions of Selected Terms for descriptions of the items appearing in this report and on the data collection instrument.

Public School Systems

The term “public school systems,” as used for this report, includes two types of government entities with responsibility for providing education services: (1) school districts that are administratively and fiscally independent of any other government and are counted as separate governments; and (2) public school systems that lack sufficient autonomy to be counted as separate governments and are classified as a dependent agency of some other government—a county, municipal, township, or state government.

Most public school systems included in this report operate to provide regular, special, and/or vocational programs for children in prekindergarten through 12th grade. Some systems, known as “nonoperating” districts, only exist to collect tax revenue, which they then transfer to other school systems that actually provide the education services. This report also includes “education service agencies.” These agencies typically provide regional special education services, vocational education programs, or financial services for member districts. They are classified as joint educational service agencies of the participating districts and are not counted as separate governments. Detailed descriptions of public school systems’ and government classification are available in Volume 1. Government Organization.

Charter Schools

The data in this report include only those charter schools established and administratively controlled by another government entity (e.g. universities, cities, counties, or public school systems). The data for these “public charter schools” are collected as separate, individual units, or are included with the data for their chartering government. Charter schools that do not meet Census Bureau criteria for classification as a government entity are considered “private charter schools” and are not included in this report.

Current Dollars

The statistics in this report, as in the others issued by the Census Bureau on state and local government finances, are in terms of current dollar amounts. They have not been adjusted for price and wage changes occurring through the years.

Fiscal Years

Data in this report pertain to school system fiscal years that ended June 30, 2002, except for the following: Alabama September 30, 2002; Nebraska and Texas August 31, 2002.

Elementary-Secondary Education

This report covers financial activity for the operation and support of public school systems providing elementary and/or secondary programs. These activities include the instruction of prekindergarten through 12th grade children, as well as support activities, such as guidance counseling, administration, transportation, plant operation and maintenance, and food services.

Public school systems also offer nonelementary-secondary programs. Adult education and community services are two types of programs operated in many public school systems that are not related to the education of prekindergarten through 12th grade children. Expenditure for these types of programs is excluded from the per pupil amounts for current spending in Tables 8, 11, 14, and 17. Expenditure made by public school systems for these nonelementary-secondary programs continues to be included in the expenditure data presented in the other tables.

Educational Revenue from Federal, State, and Local Sources

The tables in this report containing revenue data reference revenue from federal, state, and local sources. “Revenue from federal sources” includes federal monies passed through state governments, as well as federal outlays directly received. “State source revenue” consists only of amounts originating from state governments. “Revenue from local sources” is comprised of revenue raised locally

including taxes, charges, and miscellaneous revenue. These terms are used instead of the Census Bureau’s traditional “intergovernmental revenue” terms due to their widespread acceptance by the education data user community.

Revenue from city and county governments is included in both the individual and state totals tables that reference revenue from local sources. Revenue from other school systems, however, is only included in the individual unit tables. These amounts are excluded in the state totals data to avoid double-counting.

Tax Revenue of Dependent School Systems

Dependent school systems receive most of their local revenue from appropriations by their parent government. Although most of these monies come from property tax collections, the exact amounts derived from taxes or other revenue sources available to parent governments for their school systems frequently cannot be determined from state education agency accounting records. Therefore, these revenue amounts are shown as “parent government contributions” instead of “property taxes” or “other taxes” in the tabulations.

Current Operation and Current Spending

Current operation, a standard Census Bureau expenditure category, consists of payments for salaries, employee benefits (including local school system employer contributions to state government retirement funds), purchased services, and supplies.

The Census Bureau introduced the concept “current spending” in the 1987 Census of Governments. This concept, which is used only in the public school system finance reports, allows for the inclusion of all public elementary-secondary outlays regardless of the specific unit of government that actually makes the expenditure. Thus this concept employed in Tables 1, 6 through 8, 11 through 15, and 17 is comprised of current operation expenditure and two other items: payments made by the state government on behalf of local education agencies and employer contributions made by those few school systems that administer their own retirement funds (such as the Chicago Board of Education and the Denver Public School System). Most of the expenditure made by states on behalf of their school systems is for state retirement funds and social security contributions. These “on behalf of” contributions are displayed by state in Table 3. “Current spending” is not presented in other Census Bureau tabular presentations because its inclusion with expenditure made at other levels of government would lead to double counting.

Payments to other public school systems is a component of current spending and is reported at the individual unit level only. This expenditure is excluded from the state

totals tables to avoid double-counting. Payments to other governments (cities, counties, and states) is included in both individual and state totals displays.

Instruction Expenditure

This item relates to the instruction function (Function 1000) defined in the National Center for Education Statistics (NCES) publication, “Financial Accounting for Local and State School Systems,” commonly called Handbook II, Revised (1990). Instruction expenditure covers expenditure for regular, special, and vocational programs offered in both the regular school year and summer school. It excludes instructional support, student support, and other support activities, as well as adult education, community services, and student enterprise activities.

Since not all states prescribe the use of the above financial accounting handbook and its definition of instruction for their school systems, some interstate disparities exist. For example, some state accounting systems do not include fixed charges for employee benefits, group insurance, workmen’s compensation, retirement, or unemployment compensation in “instruction.” Refer to Appendix B for descriptions of how the Census Bureau has dealt with these differences.

Capital Outlay

This category refers to the direct expenditure by public school systems for construction of buildings and roads; purchases of equipment, land, and existing structures; and for payments on capital leases. Amounts for additions, replacements, and major alterations to fixed works and structures are included. However, expenditure for maintenance and minor repairs to buildings and equipment is classified as current spending.

Indebtedness

Indebtedness data in this report pertain only to debt issued in the name of an independent school district or by the parent government for a dependent school system. Thus, debt issued by school building authorities and by certain municipalities (such as Atlanta, Milwaukee, and San Francisco) for the construction of education facilities is excluded from this report. Also excluded is general obligation debt not issued distinctly for the support of schools, such as in the District of Columbia and Hawaii.

Cash and Security Holdings

Cash and security holdings of dependent school systems are excluded from this report as these holdings cannot be separated from the assets of their parent governments.

SOURCES OF DATA

The Census Bureau has made arrangements with state government departments of education to use data from existing finance information collection systems where the

data are compatible with this survey’s categories. Every state department of education obtains information annually on a wide variety of financial data from elementary-secondary school systems by requiring reports or conducting surveys. The Census Bureau is able to gain access to this information through cooperative agreements with each state as summarized below:

1. Data compiled or reformatted by Census Bureau staff from state education agency source documents or electronic data files (25 states).
2. Data reformatted by state education agency staff into survey categories before electronically transmitting or mailing data to the Census Bureau (25 states and DC).

A single office or database in the departments of education did not always have all of the information needed for this survey. In these instances, other sources—most often different state offices—supplied information to supplement the basic data. The most common types of data needing supplementation were school lunch finances, indebtedness, cash and security holdings, and capital fund transactions.

Enrollment, Population, and Personal Income Data

The enrollments used to calculate the per pupil amounts in Tables 8, 11, 14, and 17 represent Fall 2001 memberships collected by the NCES in its nonfiscal Common Core of Data (CCD) survey. Enrollments for “private charter schools”, state educational facilities, and federal school systems have been excluded.

The population data contained in Table 18 were obtained from the Census Bureau’s State Population Estimates. The personal income data in Table 18, which were used to calculate the data for Table 12, were taken from the U.S. Department of Commerce, Bureau of Economic Analysis’ Survey of Current Business.

SURVEY METHODOLOGY

The data in this survey are for all public elementary and secondary systems centrally collected from each state. The information included is intended to provide a complete picture of a government’s financial activity. All revenue (by source), expenditure (by function and object), indebtedness, and cash and security holdings are requested for all funds. The inclusion of all financial transactions, except for interfund transfers, allows for effective review and editing. It enables respondents and Census Bureau staff to take a global view of government finance and to perform basic cash flow logic checks.

The Census Bureau has attempted to identify all central sources for public elementary-secondary finance data. Most of these sources exist at the state government level. Many state agencies, especially state education agencies, collect financial data for the local units within their domains.

The collection arrangements have a number of distinct advantages. First, because the Census Bureau is able to use data from state government data systems, the response burden on local school system administrators is lessened. Second, the close relationship between local school systems and state departments of education eliminates any nonresponse. Perhaps most important, however, is the fact that this collection system yields high quality data. The audit, review, edit and correction procedures employed by state departments prior to providing the information to the Census Bureau help make the data superior to information that could be collected from the individual school systems.

The extensive use of central collection of elementary-secondary finance data requires the maintenance of state-specific crosswalks that define the state data items which comprise each of the items reported by the Census Bureau. In an effort to eliminate keying or other types of response errors, several edit checks are made. These checks identify cash and debt flow problems, significant current year/prior year differences, illogical salary/current spending relationships, out-of-scope per pupil expenditure, and other peculiarities. Census Bureau staff resolve edit and other problems by rechecking data sources for entry errors, reviewing state and other reports that contain the same type of information, and making follow-up calls to state and local officials.

Financial data for school systems were summed to create state aggregates. Census Bureau staff reviewed the state aggregates for consistency with prior year information. The state aggregates were also compared with the financial data collected in the National Public Education Financial Survey by the NCES and state totals released by state education agencies. During the review of state aggregates, Census Bureau technical staff requested assistance from state officials and the NCES to resolve differences. Most of these differences involved the inclusion of state payments on behalf of local education agencies in state education agency and the NCES totals. The state education agencies and the NCES furnished information about these payments that enabled the Census Bureau to provide state source revenue and current spending categories shown in Tables 1 through 8 and 11 through 17.

LIMITATIONS OF DATA

Finance amounts presented in this report are statistical in nature and do not represent an accounting statement. Therefore, a difference between a school system's revenue and expenditure does not indicate a "budget" surplus or deficit. Large capital outlay expenditure, debt issuance or

retirement, and changes in cash and security holdings are all factors that have important influences on the balance between revenue and expenditure.

In spite of efforts to identify and resolve errors, some mistakes and inconsistencies in official reporting and processing have undoubtedly escaped detection. Other inconsistencies have been detected and are published with the caveats shown in Appendix B. They arise from the fact that each state education agency collects a different level of detail. Although states generally collect much more detail than what the Census Bureau collects, there are instances when certain states cannot provide some of the items requested. The use of different financial accounting handbooks by the state education agencies also causes inconsistencies in the data.

Effective for the FY 1992 survey, the Census Bureau requested that respondents for elementary-secondary finances report state revenue according to the following program categories: general formula assistance, compensatory and basic skills, special education, staff improvement, vocational, capital outlay/debt service, bilingual education, transportation, and school lunch. Users should be able to make valid comparisons of this detail when examining school systems within a given state. However, because the content of state aid programs greatly varies among the states, this information may not be comparable when making comparisons between school systems in different states. For example, state monies for special education and compensatory education may be in specific categorical aid programs in one state but be part of general formula assistance in another state.

ACKNOWLEDGMENTS

The generous cooperation of state education agency personnel is gratefully acknowledged. The time and effort extended by these individuals made it possible to produce this report while imposing a minimum burden on local school officials. The Census Bureau also appreciates the dedication of local school officials in providing accurate fiscal data to their state education agencies.

MEANING OF ABBREVIATIONS AND SYMBOLS

The abbreviations and symbols in the tables have the following meanings:

- Represents zero or rounds to zero.
- (NA) Not available.
- LEA Local Education Agency.

¹Duplicative interschool system transactions are excluded.

²Includes payments to state and local governments and interest on school system indebtedness.

Note: This information represents financial data for public independent and dependent school systems. It includes state payments made on behalf of public school systems and excludes financial transactions of public nonschool entities. See Appendix B for a description of state-specific reporting anomalies. Cash and security holdings of dependent school systems are excluded as these holdings cannot be separated from the assets of their parent governments. Expenditure for adult education, community services, and other nonelementary-secondary programs are included under "Current spending" but are excluded from the per pupil data displayed in Tables 8, 11, 14, and 17.

Table 2. Revenue From Federal Sources for Public Elementary-Secondary Education by State: 2001-02

[Thousand dollars. For meaning of abbreviations and symbols, see introductory text. Detail may not add to total because of rounding]

¹Includes amounts not shown separately.

²Amounts are combined in "Other and nonspecified" federal aid distributed through the state.

Note: See Appendix B for a description of state-specific reporting anomalies. State and national totals in this table are lower than the actual totals for these federal programs. This information includes only the revenue received by public school systems and excludes monies received by nonpublic school system organizations such as state agencies and private entities. The value of school lunch commodities is also excluded.

Table 3. Revenue From State Sources for Public Elementary-Secondary School Systems by State: 2001-02

Note: See Appendix B for a description of state-specific reporting anomalies. Revenue from other school systems are excluded to avoid double counting. Some data appear under local sources for Hawaii's state-operated school system for consistency with data presented for all other school systems. Refer to the introductory text for an explanation concerning tax revenue for dependent school systems.

Table 5. Percent Distribution of Elementary-Secondary Public School System Revenue by Source and State: 2001-02

¹Includes amounts not shown separately.

Note: See Appendix B for a description of state-specific reporting anomalies. Expenditure to other school systems are excluded from this table. Expenditure for adult education, community services, and other nonelementary-secondary programs are included under "Total" current spending and "All other function," but are excluded in the per pupil data displayed in Tables 8, 11, 14, and 17.

Table 7. Support Services Expenditure for Public Elementary-Secondary School Systems by Function and State: 2001-02

[Thousand dollars. For meaning of abbreviations and symbols, see introductory text. Detail may not add to total because of rounding]

Wisconsin	5,482,259	4,749,805	732,454	1,055,753	952,218
Wyoming	140,070	140,070	—	13,735	25,935

¹Minor amounts of short-term indebtedness incurred by independent school systems are included in the long-term indebtedness figures and are not separately identifiable. Short-term indebtedness of dependent school systems in many cases cannot be distinguished from the total indebtedness of their parent government.

Table 11. States Ranked According to Per Pupil Elementary-Secondary Public School System Finance Amounts: 2001-02

[Dollars. For meaning of abbreviations and symbols, see introductory text. Detail may not add to total because of rounding]

Rank	Elementary-secondary revenue					Current spending						
	Total	From federal sources	From state sources	From local sources	Total ¹	Instruction			General administration	School administration		
						Total ¹	Salaries only	Benefits only

¹Includes amounts not shown separately.

Note: See Appendix B for a description of state-specific reporting anomalies. Revenue from and expenditure to other school systems are excluded to avoid double counting. Expenditure for adult education, community services, and other non-elementary-secondary programs are also excluded. Some data appear under local sources for Hawaii's state-operated school system for consistency with data presented for all other school systems.

¹Includes amounts not shown separately.

Note: See Appendix B for a description of state-specific reporting anomalies. Revenue from and expenditure to other school systems are excluded to avoid double counting. Expenditure for adult education, community services, and other nonelementary-secondary programs are also excluded. Some data appear under local sources for Hawaii's state-operated school system for consistency with data presented for all other school systems.

Table 13. Public School System Finances for Elementary-Secondary Education by Enrollment-Size Groups: 2001-02

¹Includes amounts not shown separately.

Note: See Appendix B for a description of state-specific reporting anomalies. This information represents financial data for public independent and dependent school systems. It includes state payments made on behalf of public school systems and excludes financial transactions of public nonschool entities. Expenditure for adult education, community services, and other nonelementary-secondary programs are included under "Current spending" and "Other current spending" but are excluded from these categories in the per pupil data displayed in Table 14. Expenditure for support services are not shown by size-group because support service expenditure in many school districts in California cannot be isolated by function.

¹Includes amounts not shown separately.

Note: See Appendix B for a description of state-specific reporting anomalies. This information represents financial data for public independent and dependent school systems. It includes state payments made on behalf of public school systems and excludes financial transactions of public nonschool entities. Expenditure for adult education, community services, and other nonelementary-secondary programs are included under "Current spending" and "Other current spending" but are excluded from these categories in the per pupil data displayed in Table 14. Expenditure for support services are not shown by size-group because support service expenditure in many school districts in California cannot be isolated by function.

¹Enrollments reflect fall 2001 memberships reported to the National Center for Education Statistics in the Public Elementary-Secondary Education Agency Universe Survey.

²Includes amounts not shown separately.

Note: See Appendix B for a description of state-specific reporting anomalies. Revenue from and expenditure to other school systems are included in this table. Expenditure for adult education, community services, and other nonelementary-secondary programs are included under total elementary-secondary expenditure, total current spending, and other current spending, but are excluded in the per pupil data displayed in Table 17. Refer to the introductory text for an explanation concerning tax revenue for dependent school systems. Data for specific state revenue programs are generally comparable for school systems in the same state but are not for school systems in other states. Due to enrollments under 10,000, Maine and Vermont are not shown on the individual unit tables.

Table 16. Percent Distribution of Revenue of Public Elementary-Secondary School Systems With Enrollments of 10,000 or More: 2001-02

[For meaning of abbreviations and symbols, see introductory text. Detail may not add to total because of rounding]

¹Includes amounts not shown separately.

Note: See Appendix B for a description of state-specific reporting anomalies. Where state accounting practices permit, revenue from other school systems are included under "Other local governments." Some data appear under local sources for Hawaii's state-operated school system for consistency with data presented for all other school systems. Due to enrollments under 10,000, Maine and Vermont are not shown on the individual unit tables.

¹Enrollments reflect fall 2001 memberships reported to the National Center for Education Statistics in the Public Elementary-Secondary Education Agency Universe Survey.

²Includes amounts not shown separately.

Note: See Appendix B for a description of state-specific reporting anomalies. Expenditure to other school systems are excluded in this table. Expenditure for adult education, community services, and other nonelementary-secondary programs are also excluded. Due to enrollments under 10,000, Maine and Vermont are not shown on the individual unit tables.

Table 18. Population, Enrollment, and Personal Income by State: 2001 and 2002

³Enrollments reflect fall 2001 memberships collected by the National Center for Education Statistics on the Agency File "Local Education CCD Agency (School District) Universe Survey: 2001-02." Enrollments for private charter schools, state educational facilities, and federal school systems have been excluded.

⁴U.S. Department of Education, National Center for Education Statistics, "State Nonfiscal Survey of Public Elementary/Secondary Education, 2000-2001."

Note: Totals for the United States include all 50 states and the District of Columbia.

Appendix A.

Definitions of Selected Terms

Major categories for the U.S. Census Bureau's classification of government finances, as applicable to school systems, are defined below.

Capital Outlay. Direct expenditure for construction of buildings, roads, and other improvements undertaken either on a contractual basis by private contractors or through a government's own staff (i.e., force account); for purchases of equipment, land, and existing structures; and for payments on capital leases. Includes amounts for additions, replacements, and major alterations to fixed works and structures. However, expenditure for maintenance and repairs to such works and structures is classified as current spending.

Cash and Deposits. Cash on hand and on deposit, including any savings and other time deposits, as well as demand deposits.

Cash and Security Holdings. Cash, deposits, and government and private securities (bonds, notes, stocks, mortgages, etc.) except holdings of agency and private trust funds. Does not include interfund loans, receivables, and the value of real property and other fixed assets.

Construction. Production of fixed works and structures and additions, replacements, and major alterations thereto, including planning and design of specific projects, site improvements, and provision of equipment and facilities that are integral parts of a structure. Includes both construction undertaken either on a contractual basis by private contractors or through a government's own staff (i.e., force account).

Contributions From Parent Government. Tax receipts and other amounts appropriated by a parent government and transferred to its dependent school system. Excludes intergovernmental revenue, current charges, and miscellaneous general revenue.

Current Charges. Amounts received from the public for performance of specific services benefitting the person charged and from sales of commodities and services. Includes school lunch sales (gross), tuition paid by individuals, revenue from the sale and rental of textbooks, transportation fees, and receipts from centrally administered student activity funds. Excludes amounts received from other governments and interfund transfers.

Current Operation. Direct expenditure for salaries, employee benefits, purchased professional and technical

services, purchased property and other services, and supplies. It includes gross school system expenditure for instruction, support services, and noninstructional functions. It excludes expenditure for debt service, capital outlay, and reimbursement to other governments (including other school systems). Also excluded are payments made on behalf of the school system by other governments including employee retirement payments made by state governments to state retirement funds and to social security. Employer contributions made by those few school systems that have their own retirement systems (such as the Chicago Board of Education and the Denver Public School System) into their own retirement funds are excluded. Current operation expenditure is a standard classification item used in all Census Bureau government finance reports.

Current Spending. Comprises current operation expenditure (as defined above), payments made by the state government on behalf of school systems, and transfers made by school systems into their own retirement funds. This classification is used only in Census Bureau education reports in an effort to provide statistics for users who wish to make interstate comparisons. It is not used in other government finance reports to avoid double-counting expenditure between levels of government and funds. While expenditure made by the state government on behalf of the school systems is available on a state aggregate basis, it is frequently not available for each school system in given states. Therefore, these payments are included under current spending in the tables which display state totals and are often estimated for the local school systems to be included in the tables which display individual school units. Appendix B identifies this anomaly on a state-by-state basis.

Debt. Short- and long-term credit obligations of a school system or that portion of a parent government's credit obligations devoted to a dependent system. Excludes noninterest-bearing short-term obligations, interfund obligations, amounts owed in a trust or agency capacity, leases, advances, and contingent loans from other governments, and rights of individuals to benefits from school system employee-retirement funds.

Debt Outstanding at the End of Fiscal Year. All debt obligations remaining unpaid at the end of the fiscal year.

Elementary-Secondary Education. Prekindergarten through 12th grade regular, special, and vocational education, as well as cocurricular, community service, and adult

education programs provided by a public school system. The financial activities of these systems for all instruction, support service, and noninstructional activities are included in this category.

Employee Benefit Expenditure. Amounts paid by the school system for fringe benefits. These amounts are not included in salaries and wages paid directly to employees. Includes contributions on behalf of employees for retirement coverage, social security, group health and life insurance, tuition reimbursement, workmen’s compensation, and unemployment compensation.

Enrollment. Count of pupils on pupil rolls in the Fall of the school system’s fiscal year for which data are shown.

Equipment. Apparatus, furnishings, motor vehicles, office machines, and the like having an expected life of more than five years. Equipment expenditure consists only of amounts for purchase of equipment, including both additional equipment and replacements. Expenditure for facilities that are integral parts of structures is classified as expenditure for construction or for purchase of land and existing structures.

Expenditure. All amounts of money paid out by a school system net of recoveries and other correcting transactions other than for retirement of debt, purchase of securities, extension of loans, and agency transactions. Note that expenditure includes only external transactions of a school system and excludes noncash transactions, such as the provision of perquisites or other payments in-kind.

Federal Aid Direct. Aid from project grants for programs such as Impact Aid, Indian Education, Bilingual Education, Head Start, Follow Through, Magnet Schools, Dropout Demonstration Assistance, and Gifted and Talented.

Impact Aid. Revenue authorized to assist in the construction (P.L. 81-815) and operation (P.L.-874) of schools in areas affected by federal activities.

Federal Aid Distributed by State Governments. Aid from formula grants distributed through state government agencies. Includes revenue from such programs as:

Child Nutrition Programs. Payments by the Department of Agriculture for the National School Lunch, Special Milk, School Breakfast, and Ala Carte programs. Excludes the value of donated commodities.

Compensatory (Title I) Programs. Revenue authorized by Title I of the Elementary-Secondary Education Act (PL 102-382). Includes basic, concentration, and migratory education grants.

Special Education Programs. Revenue awarded under the Individuals with Disabilities Act (PL 105-17). Includes formula grants authorized in Part B of this

legislation but excludes project grants authorized in Part D. Revenue from this excluded project grant is included in Federal Aid Direct.

Vocational Programs. Revenue from the Carl D. Perkins Vocational Education Act. Includes revenue from Title II (Basic Grants) and Title III-E (Tech-Prep Education).

Other Federal Aid Distributed by the State. Includes revenue from other formula grant programs distributed through state governments, such as the Adult Education Act (Part B), Title VI Grants sanctioned by the Elementary-Secondary Education Act, Drug Free Schools authorized by Title IV of the Elementary-Secondary Education Act, and Eisenhower Math and Science (Title II-A, Title II-B, and Title XIII-C of the Elementary-Secondary Education Act).

Nonspecified Federal Aid Distributed by the State. Federal revenue amounts that pertain to more than one of the above categories but which reporting units could not provide distinct amounts into these categories. This revenue is included in “nonspecified” instead of “other.”

Fiscal Year. The 12-month period at the end of which the school district determines its financial condition and the results of its operations and closes its books.

Fixed Charges. Charges of a generally recurrent nature which are not readily allocable to another function. Such charges include employee benefits, retirement and insurance programs, and worker’s compensation.

Instruction Expenditure. Relates to the instruction function (Function 1000) defined in “Financial Accounting for Local and State School Systems,” National Center for Education Statistics, 1990. Instruction presented under the current operation or current spending headings includes payments from all funds for salaries, employee benefits (paid by school system only if under “current operation” or paid by both school and state if under “current spending”), supplies, materials, and contractual services. It excludes capital outlay, debt service, and interfund transfers. Instruction covers regular, special, and vocational programs offered in both the regular school year and summer school. It excludes instructional, student, and other support activities, as well as adult education, community services, and student enterprise activities.

Instructional Equipment. Expenditure for all equipment recorded by school systems in general or operating funds under the “instruction” function.

Interest Earnings. Interest earned on deposits and securities including amounts for accrued interest on investment securities sold. However, receipts for accrued interest on bonds issued are classified as offsets to interest

expenditure. Note that interest earnings shown under elementary-secondary revenue do not include earnings on assets of employee-retirement systems.

Interest Expenditure. Amounts paid for use of borrowed money.

Long-Term Debt. Debt payable more than one year after date of issue.

Long-Term Debt Issued. The par value of long-term debt obligations incurred during the fiscal period concerned, including funding and refunding obligations. Debt obligations authorized but not actually incurred during the fiscal period are not included.

Long-Term Debt Retired. The par value of long-term debt obligations liquidated by repayment or exchange, including debt retired by refunding operations.

Nonelementary-Secondary Programs. Comprises expenditure by a school district for the operation of community services (e.g., swimming pools, public libraries, programs for the elderly, and child care centers); adult education classes; and other activities not related to elementary-secondary education, such as community college programs.

Other Current Spending. Current spending for other than elementary-secondary education instruction and support services activities. Included in this category are food services, enterprise operations, community services, and adult education expenditure.

Payments to Other Governments. Payments made to states, counties, cities, and special district school housing authorities including repayment of loans and debt service payments to entities that incur debt instead of the school system. Payments to Other School Systems is included in this category in the tables that display individual school systems but excluded (to avoid double-counting) in the state aggregate tables.

Payments to Other School Systems. Payments to in-state and out-of-state public school systems for tuition, transportation, data processing, or other purchased services. These amounts are excluded from state aggregate tables but included in "Payments to Other Governments" in the individual unit tables.

Property Taxes. Taxes conditioned on ownership of property and measured by its value. Includes general property taxes relating to property as a whole, taxed at a single rate or at classified rates according to the class of property. Property refers to real property (e.g., land and structures), as well as personal property. Personal property can be either tangible (e.g., automobiles and boats) or intangible (e.g., bank accounts and stocks and bonds).

Public School Systems. Includes independent school district governments and dependent school systems. Independent school district governments are organized local entities providing public elementary, secondary, special, and vocational-technical education which, under the law, have sufficient administrative and fiscal autonomy to qualify as governments. Dependent school systems lack sufficient autonomy to be counted as separate governments and are classified as dependent agencies of some other government—a county, municipality, township, or state government.

Purchase of Land and Existing Structures. Expenditure for the acquisition of land and existing buildings including purchases of rights-of-way, payments on capital leases, title searches, and similar activities associated with real property purchase transactions.

Revenue. All amounts of money received by a school system from external sources net of refunds and other correcting transactions other than from issuance of debt, liquidation of investments, or as agency and private trust transactions. Note that revenue excludes noncash transactions, such as receipt of services, commodities, or other "receipts in-kind."

Salaries and Wages. Amounts paid for compensation of school system officers and employees. Consists of gross compensation before deductions for withheld taxes, retirement contributions, or other purposes.

School Lunch Charges. Gross collections from cafeteria sales to children and adults.

Short-Term Debt. Interest-bearing debt payable within one year from date of issue, such as bond anticipation notes, bank loans, and tax anticipation notes and warrants. Includes obligations having no fixed maturity date if payable from a tax levied for collection in the year of their issuance.

State Aid. State revenue paid to the school system for any purpose, restricted or unrestricted, including the following:

Capital Outlay/Debt Service. Revenue paid for school construction and building aid including amounts to help the school systems pay for servicing debt.

Compensatory Programs. Revenue for "at risk" or other economically disadvantaged students including migratory children. Also includes monies from state programs directed toward the attainment of basic skills and categorical education excellence and quality education programs that provide more than staff enhancements such as materials, resource centers, and equipment.

General Formula Assistance. Revenue from general noncategorical state assistance programs such as foundation, minimum or basic formula support, apportionment, equalization, flat or block grants, and state public school fund distributions. This category also includes revenue dedicated from major state taxes, such as income and sales taxes.

Payments on Behalf of Local Education Agency (LEA). State payments that benefit school systems but are not paid directly to school systems. Includes amounts transferred into state teacher or public employee retirement funds, as well as into funds for other kinds of employee benefits, such as group health, life, and unemployment compensation. This category also includes state payments for textbooks, school buses, and telecommunications that are provided to public school systems.

Special Education Programs. Revenue for the education of physically and mentally disabled students.

Staff Improvement Programs. Revenue for programs designed to improve the quantity and quality of school system staff. Examples include programs for additional teacher units, teacher benefits such as retirement and social security contributions paid directly to the school system, mentor teachers, teacher induction, staff development contracts and stipends, career ladder contracts, in-service training, health insurance, principal leadership, teacher quality contracts, and salaries for specific types of instructional and support staff.

Transportation Programs. Payments for various state transportation aid programs, such as those that compensate the school system for part of its transportation expense and those that provide reimbursement for transportation salaries or school bus purchase.

Vocational Programs. Revenue for state vocational education assistance programs including career education programs.

Other State Aid. All other state revenue that is paid directly to the school systems including funds for bilingual education, gifted and talented programs, food services, instructional materials, textbooks, computer equipment, library resources, guidance and psychological services, driver education, energy conservation, enrollment increases and losses, health, alcohol and drug abuse, AIDS, child abuse, summer school, prekindergarten and early childhood, adult education (excluding vocational), desegregation, private schools, safety and law enforcement, and community services. In cases where these programs are covered under a state government's general formula assistance program, revenue will be shown under "general formula assistance" instead of under this category.

Nonspecified State Aid. State revenue amounts that pertain to more than one of the above categories but which reporting units could not provide distinct amounts into these categories. This revenue is included in "nonspecified" instead of "other."

Support Services Expenditure. Relates to support services functions (Function 2000) defined in "Financial Accounting for Local and State School Systems," National Center for Education Statistics, 1990. Support services presented under the current operation or current spending headings include payments from all funds for salaries, employee benefits (paid by school system only if under "current operation" or paid by both school and state if under "current spending"), supplies, materials, and contractual services. It excludes capital outlay, debt service, and interfund transfers. It includes expenditure for the following functions:

General Administration. (Function 2300) Expenditure for board of education and executive administration (office of the superintendent) services.

Instructional Staff Support. (Function 2200) Expenditure for supervision of instruction service improvements, curriculum development, instructional staff training, and media, library, audiovisual, television, and computer-assisted instruction services.

Operation and Maintenance of Plant. (Function 2600) Expenditure for building services (heating, electricity, air conditioning, property insurance), care and upkeep of grounds and equipment, nonstudent transportation vehicle operation and maintenance, and security services.

Pupil Support Services. (Function 2100) Expenditure for attendance record-keeping, social work, student accounting, counseling, student appraisal, record maintenance, and placement services. This category also includes medical, dental, nursing, psychological, and speech services.

Pupil Transportation Services. (Function 2700) Expenditure for the transportation of public school students including vehicle operation, monitoring riders, and vehicle servicing and maintenance.

School Administration. (Function 2400) Expenditure for the office of principal services.

Other Support Services. Expenditure for business support (Function 2500), central support (Function 2800), and other support (Function 2900) services. Business support services include payments for fiscal services (budgeting, receiving and disbursing funds, payroll, internal auditing, and accounting), purchasing, warehousing, supply distribution, printing, publishing, and duplicating services. Central support services include planning, research, development, and

evaluation services. They also include information services, staff services (recruitment, staff accounting, noninstructional in-service training, staff health services), and data processing services.

Nonspecified Support Services. Expenditure that pertains to more than one of the above categories. In some cases, reporting units could not provide distinct expenditure amounts for each support services category. This expenditure is included in “nonspecified” instead of “other support services.”

Taxes. Compulsory contributions exacted by a school system for public purposes, except employee and employer assessments for retirement and social insurance purposes, which are classified as insurance trust revenue. All tax revenue is classified as general revenue and comprises amounts received (including interest and penalties but excluding protested amounts and refunds) from all taxes imposed by a government. Note that school system tax revenue excludes any amounts from shares of state-imposed-and-collected taxes, which are classified as intergovernmental revenue.

Appendix B.

Notes Relating to Education Finance Data

The characteristics of elementary-secondary school finance data are influenced by accounting requirements mandated by each state education agency. The level of financial detail that school systems must maintain varies from state to state. Different state financing methods, such as making payments on behalf of school systems to fund teacher retirement, and the use of different accounting handbooks also cause variation. This variation creates differences in the content of information presented in this report. This appendix describes, on a state-by-state basis, these differences and adjustments made to improve data comparability.

ALASKA

Payments to other school systems cannot be isolated in the Alaska school finance reporting system. These amounts are usually minor. They will slightly inflate the current spending amounts presented for both state aggregates and individual school systems.

ARIZONA

Payments to other school systems cannot be isolated in the Arizona school finance reporting system. These amounts are usually minor. They will slightly inflate the current spending amounts presented for both state aggregates and individual school systems.

The state financial reporting system does not isolate capital outlay payments for the purchase of land and existing structures. These amounts are included with amounts shown for “construction.”

ARKANSAS

Changes to state and local revenue, effective in FY 1999, reflect consistency with the classification of the 25-mill uniform rate of ad valorem property tax (Amendment 74 of the Arkansas Constitution) as state revenue in the state and local government finance survey.

Payments made by the state government into the state retirement system on behalf of Arkansas school systems are included in the tables that display state totals of elementary-secondary education finances. These payments have been estimated for local school systems and appear in the tabular detail for state revenue and expenditure of individual school systems.

CALIFORNIA

Compensatory (Title I) federal grants cannot be isolated in some California districts. For this reason, all Compensatory aid is reported in “Other and Nonspecified” federal revenue in Table 2. Compensatory aid is shown in the individual unit tables (Tables 15 and 16) for those districts that can isolate those amounts.

Payments made by the state government into the state retirement system on behalf of California school systems are included in the tables that display state totals of elementary-secondary education finances. These payments have been estimated for local school systems and appear in the tabular detail for state revenue and expenditure of individual school systems.

Expenditure for support services cannot be isolated by function in some California school districts, therefore, this expenditure has been estimated for the state aggregate tables.

CONNECTICUT

The state financial reporting system does not isolate capital outlay payments for the purchase of land and existing structures. These amounts are included with amounts shown for “construction.”

Payments made by the state government into the state retirement system on behalf of Connecticut school systems are included in the tables that display state totals of elementary-secondary education finances. These payments have been estimated for local school systems and appear in the tabular detail for state revenue and expenditure of individual school systems.

DELAWARE

The state financial reporting system does not isolate capital outlay payments for the purchase of land and existing structures. These amounts are included with amounts shown for “construction.”

DISTRICT OF COLUMBIA

The District of Columbia’s financial reporting system does not isolate capital outlay payments for the purchase of land and existing structures. These payments are included in “construction.”

FLORIDA

Payments to other school systems cannot be isolated in the Florida school finance reporting system. These amounts are usually minor. They will slightly inflate the current spending amounts presented for both state aggregates and individual school systems.

GEORGIA

Compensatory (Title I), Special Education, and Vocational federal grants cannot be isolated in the Georgia accounting structure. These amounts are included in “Other and Nonspecified” federal revenue in Tables 2 and 15 of this report.

Payments made by the state government into the state retirement system on behalf of Georgia school systems are included in the tables that display state totals of elementary-secondary education finances. These payments have been estimated for local school systems and appear in the tabular detail for state revenue and expenditure of individual school systems.

IDAHO

The state financial reporting system does not isolate capital outlay payments for the purchase of land and existing structures. These amounts are included with amounts shown for “construction.”

Payments to other school systems cannot be isolated in the Idaho school finance reporting system. These amounts are usually minor. They will slightly inflate the current spending amounts presented for both state aggregates and individual school systems.

Payments made by the state government for unemployment insurance on behalf of Idaho school systems are included in the tables that display state totals of elementary-secondary education finances. These payments are included in both the state aggregate tables that display elementary-secondary school finance data and the tabular detail for state revenue and expenditure of individual school systems.

ILLINOIS

The state financial reporting system does not isolate capital outlay payments for the purchase of land and existing structures. These amounts are included with amounts shown for “construction.”

Payments made by the state government into the state’s public school retirement systems on behalf of Illinois school districts, and state payments for textbooks and transportation are included in the tables that display state totals of elementary-secondary education finances. These

payments have been estimated for local school systems and appear in the tabular detail for state revenue and expenditure of individual school systems.

Illinois corporate personal property replacement tax revenue is included as state rather than local revenue in this report.

INDIANA

Employee benefit items reported by Indiana school corporations are not shown by function in the Indiana financial reporting system. They consist of payments for retirement, social security, group insurance, worker’s compensation, and unemployment compensation. These benefits paid by the Indiana local school corporations were estimated by function according to the salaries reported for each function.

Payments made by the state government into the state retirement system on behalf of Indiana school corporations are included in the tables that display state totals of elementary-secondary education finances. These payments have been estimated for local school systems and appear in the tabular detail for state revenue and expenditure of individual school systems.

KANSAS

Special Education federal grants cannot be isolated in the Kansas accounting structure. These amounts are included in “Other and Nonspecified” federal revenue in Tables 2 and 15 of this report.

Payments made by the state government into the state retirement system for school employees on behalf of Kansas school systems are included in the tables that display state totals of elementary-secondary education finances. These payments have been estimated for local school systems and appear in the tabular detail for state revenue and expenditure of individual school systems.

KENTUCKY

Compensatory (Title I), Special Education, and Vocational federal grants cannot be isolated in the Kentucky accounting structure. These amounts are included in “Other and Nonspecified” federal revenue in Tables 2 and 15 of this report.

Payments made by the state government into the state teachers’ retirement system and for health and life insurance on behalf of Kentucky school systems are included in the tables that display state totals of elementary-secondary education finances. These payments have been estimated for local school systems and appear in the tabular detail for state revenue and expenditure of individual school systems.

Expenditure for adult education in Kentucky cannot be isolated in the state finance reporting system. These amounts will slightly inflate the “instruction” and “support service” totals presented at both the state aggregate and individual school system level.

MAINE

Payments made by the state government into the state retirement system on behalf of Maine school systems are included in the tables that display state totals of elementary-secondary education finances. These payments have been estimated for local school systems and appear in the tabular detail for state revenue and expenditure of individual school systems.

MARYLAND

Payments made by the state government into state retirement funds on behalf of Maryland school systems are included in the financial statements sent to the state education agency. These payments are included in both the state aggregate tables that display elementary-secondary school finance data and the tabular detail for state revenue and expenditure of individual school systems.

MASSACHUSETTS

Fixed charges for recurring retirement and insurance programs are not reported by function in the Massachusetts financial reporting system. These benefits were estimated by function according to the salaries reported for each function.

Payments made by the state government into the state retirement system on behalf of Massachusetts school systems are included in the tables that display state totals of elementary-secondary education finances. These payments have been estimated for local school systems and appear in the tabular detail for state revenue and expenditure of individual school systems.

MINNESOTA

The state financial reporting system does not isolate capital outlay payments for the purchase of land and existing structures. These amounts are included with amounts shown for “construction.”

MISSISSIPPI

The state financial reporting system does not isolate capital outlay payments for the purchase of land and existing structures. These amounts are included with amounts shown for “construction.”

Payments to other school systems cannot be isolated in the Mississippi school finance reporting system. These amounts are usually minor. They will slightly inflate the current spending amounts presented for both state aggregates and individual school systems.

MISSOURI

The Census Bureau’s reporting system includes Missouri’s local property tax from the state for Proposition C in the category of revenue from state rather than local sources.

NEVADA

The local school support sales tax is included as a state revenue source rather than as a local sales tax. Revenue from the motor vehicle privilege tax is also included under state source revenue. The public utility franchise tax is classified as a public utility tax of the local school districts.

NEW HAMPSHIRE

Payments made by the state government into the state retirement system for teachers on behalf of New Hampshire school systems are included in the tables that display state totals of elementary-secondary education finances. These payments have been estimated for local school systems and appear in the tabular detail for state revenue and expenditure of individual school systems.

NEW JERSEY

Payments made by the state government for employer contributions to the Teachers’ Pension and Annuity Fund and for social security payments on behalf of New Jersey school systems are included in the tables that display state totals of elementary-secondary education finances. These payments are also included in the tabular detail for state revenue and expenditure of individual school systems.

NEW MEXICO

Payments to other school systems cannot be isolated in the New Mexico school finance reporting system. These amounts are usually minor. They will slightly inflate the current spending amounts presented for both state aggregates and individual school systems.

NORTH CAROLINA

Compensatory (Title I), Special Education, and Vocational federal grants cannot be isolated in the North Carolina accounting structure. These amounts are included in “Other and Nonspecified” federal revenue in Tables 2 and 15 of this report.

Payments to other school systems cannot be isolated in the North Carolina school finance reporting system. These amounts are usually minor. They will slightly inflate the current spending amounts presented for both state aggregates and individual school systems.

State payments on behalf of North Carolina school systems for textbooks and transportation are included in the financial statements sent to the state education agency. These payments are included in both the state aggregate tables that display elementary-secondary school finance data and the tabular detail for state revenue and expenditure of individual school systems.

The state financial reporting system does not isolate capital outlay payments for the purchase of land and existing structures. These amounts are included with amounts shown for “construction.”

OHIO

Compensatory (Title I) federal grants cannot be isolated in the Ohio accounting structure. These amounts are included in “Other and Nonspecified” federal revenue in Tables 2 and 15 of this report.

OKLAHOMA

Payments made by the state government into the state retirement fund on behalf of Oklahoma school systems, and state payments for psychometric services are included in the tables that display state totals of elementary-secondary education finances. These payments have been estimated for local school systems and appear in the tabular detail for state revenue and expenditure of individual school systems.

RHODE ISLAND

Payments made by the state government into the state retirement fund on behalf of Rhode Island school systems are included in the tables that display state totals of elementary-secondary education finances. These payments have been estimated for local school systems and appear in the tabular detail for state revenue and expenditure of individual school systems.

SOUTH CAROLINA

Payments made by the state government for student testing, textbooks, and transportation on behalf of South Carolina school systems are included in the tables that display state totals of elementary-secondary education finances. These payments have been estimated for local school systems and appear in the tabular detail for state revenue and expenditure of individual school systems.

SOUTH DAKOTA

The state financial reporting system does not isolate capital outlay payments for the purchase of land and existing structures. These amounts are included with amounts shown for “construction.”

Payments made by the state government on behalf of South Dakota school systems for telecommunications are included in the tables that display state totals of elementary-secondary education finances. These payments are also included in the tabular detail for state revenue and expenditure of individual school systems.

TEXAS

Payments made by the state government on behalf of Texas school systems into the state school employees’ retirement fund, and payments for textbooks and transportation are included in the tables that display state totals of elementary-secondary education finances. These payments have been estimated for local school systems and appear in the tabular detail for state revenue and expenditure of individual school systems.

UTAH

Payments to other school systems cannot be isolated in the Utah school finance reporting system. These amounts are usually minor. They will slightly inflate the current spending amounts presented for both state aggregates and individual school systems.

Expenditure for adult education in Utah cannot be isolated in the state finance reporting system. These amounts will slightly inflate the “instruction” and “support service” totals presented at both the state aggregate and individual school system level.

VERMONT

Payments made by the state government for employee benefits on behalf of Vermont school systems are included in the tables that display state totals of elementary-secondary education finances. These payments have been estimated for the local school systems and appear in the tabular detail for state revenue and expenditure of individual school systems.

VIRGINIA

The state government allocates one percent of the state-imposed sales tax for local school systems. Proceeds are classified as revenue from state sources in the Census Bureau’s reporting system.

Payments made by the state government for employer contributions to the state retirement fund on behalf of Virginia school systems are included in the tables that display state totals of elementary-secondary education finances. These payments are also included in the tabular detail for state revenue and expenditure of individual school systems.

WASHINGTON

Expenditure for adult education in Washington cannot be isolated in the state finance reporting system. These amounts will slightly inflate the “instruction” and “support service” totals presented at both the state aggregate and individual school system level.

WEST VIRGINIA

Special Education and Vocational federal grants cannot be isolated in the West Virginia accounting structure. These amounts are included in “Other and Nonspecified” federal revenue in Tables 2 and 15 of this report.

Payments made by the state government into the state teachers’ and public employees’ retirement funds on behalf of West Virginia school systems are included in the tables that display state totals of elementary-secondary education finances. These payments have been estimated for local school systems and appear in the tabular detail for state revenue and expenditure of individual school systems. State payments on behalf of West Virginia school

systems for computers are included in the state and individual school system tables.

WISCONSIN

Receipts from the local School Tax Program (property tax program) are included as revenue from state sources rather than local property taxes in this report.

Expenditure for adult education in Wisconsin cannot be isolated in the state finance reporting system. These amounts will slightly inflate the “instruction” and “support service” totals presented at both the state aggregate and individual school system level.

Appendix C. Two-Letter State Abbreviations

State	Abbreviation	State	Abbreviation
Alabama	AL	Montana	MT
Alaska	AK	Nebraska	NE
Arizona	AZ	Nevada	NV

Publication Program

2002 CENSUS OF GOVERNMENTS

The U.S. Census Bureau has conducted a Census of Governments every 5 years since 1957 covering three major subject fields relating to State and local governments—organization, employment, and finances. The results of the 2002 Census of Governments are being issued in both printed and electronic formats. The printed material contains four volumes, which are described individually below. The electronic dissemination will encompass data files and electronic versions of the publication, described in a separate section following the report descriptions.

FINAL REPORTS

Volume 1. Government Organization

No. 1. Government Organization. Data for the nation and by states on county, municipal, and township governments by population size; on public school systems by size of enrollment; and on special district governments by function. Also shown is the number of local governments, by type, in each county area in the nation and information about E-Government activities.

No. 2. State Descriptions. A description of local government structure in each state is presented in this report.

Volume 3. Public Employment

No. 1. Employment of Major Local Governments. Statistics on March 2002 employment and payrolls for: all county governments; subcounty general-purpose governments (municipalities and townships) having 25,000 or more population; school systems having 5,000 or more enrollment; and special district governments having 100 or more full-time employees.

No. 2. Compendium of Public Employment. Employment and payroll data for the month of March 2002 by government function for the nation, by states, and by type of government. Report also displays data summarized by county area for local government employment and payrolls.

Volume 4. Government Finances

No. 1. Public Education Finances. Statistics on revenue, expenditure, debt, and financial assets of school systems, presented for the nation, for states, and for large school systems having 10,000 or more enrollment. Data describe financial activity in fiscal year 2002.

No. 2. Finances of Special Districts. Fiscal year 2002 statistics on finances of special district governments, by states, and for selected large districts.

No. 3. Finances of County Governments. Statistics on revenue, expenditure, debt, and financial assets of county governments in fiscal year 2002. Report provides national summaries, population-size group information, state area data, and displays of all individual county governments.

No. 4. Finances of Municipal and Township Governments. Fiscal year 2002 statistics on revenue, expenditure, debt, and financial assets of municipalities and townships. There are national summaries and aggregations by population-size group and state. Report provides data for all individual municipalities and townships with a population of 25,000 or more.

No. 5. Compendium of Government Finances. A summary of census findings on fiscal year 2002 government finances for state and local governments. Data are presented for the nation, for state areas by type of government, and for local governments in each individual county area.

No. 6. Employee Retirement Systems of State and Local Governments. Membership, receipts, expenditure, number of beneficiaries, and financial assets of state and local government employee retirement systems. Data are shown for the nation, for states, and for large individual retirement systems.

ELECTRONIC MEDIA

Data from the 2002 Census of Governments and related annual and quarterly surveys are available via the internet at the Census Bureau Web site: www.census.gov/govs/www/index.html. For more information, see the Web site, or write to U.S. Census Bureau, Governments Division, Washington, DC 20233, or call Customer Services at 301-763-INFO(4636).

HOW TO PURCHASE PRINTED REPORTS

When the printed reports described above become available, they will be sold by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20401.

Telephone or fax orders may be used to reduce processing time if your order is to be charged to VISA, MasterCard, or prepaid Superintendent of Documents Deposit Account. Customers will be able to call the Order Desk in Washington, DC, at 202-783-3238, between 7:30 a.m. and 4:00 p.m., eastern time, Monday through Friday, except holidays.
