Note: The data quoted in this report are from the U.S. Census Bureau, Quarterly Survey of Public Pensions. Statistical significance is not measurable for this survey because the estimates are not based on a probability sample. The data are from a panel of the 100 largest pension systems as of the 2012 Census of Governments, and as such, are not subject to sampling error. However, the survey totals do not represent the national totals for public pensions since only a subset of the universe is represented. Because of the panel sample, sampling errors of these estimates can not be measured nor can the confidence intervals be computed. For information on nonsampling errors and definitions, see <www.census.gov/programs-surveys/qspp/technical-documentation/methodology.html>.
