

Solar Electric Power Generation Employees

This U.S. industry comprises establishments primarily engaged in operating solar electric power generation facilities. Using energy from the sun, these facilities produce electric energy, which is then provided to electric power transmission systems or to electric power distribution systems.

Total renewable solar electric power generation employees in the U.S.: 1,582

Total renewable power generation employees in the U.S.: 13,276*

Source: U.S. Census Bureau, 2012 Economic Census, Geographic Area Series, Utilities Sector.

*The Department of Energy defines Renewable Energy under 42 U.S.C. § 15852(b) as electric energy generated from solar, wind, biomass, landfill gas, ocean, geothermal, municipal solid waste, or new hydroelectric generation.

**This figure reflects the total number of paid employees at employer establishments classified in the Solar Electric Power Generation (NAICS 221114) industry, regardless of employee occupations which vary across industries.

***This U.S. industry comprises establishments primarily engaged in operating electric power generation facilities (except hydroelectric, fossil fuel, nuclear, solar, wind, geothermal, biomass). These facilities convert other forms of energy, such as tidal power, into electric energy, which is then provided to electric power transmission systems or to electric power distribution systems.
