

2019 Manufacturing Day

A Snapshot of Monthly Manufacturing Statistics in the United States

Released October 4, 2019

This brief is the result of the Manufacturers' Shipments, Inventories, and Orders (M3) Survey conducted by the U.S. Census Bureau. The M3 provides early broad-based monthly statistical data on current economic conditions and indications of future production commitments in the manufacturing sector. Data have been collected monthly since 1957. The data measure current and future manufacturing activity in current dollars that are both seasonally and not seasonally adjusted.

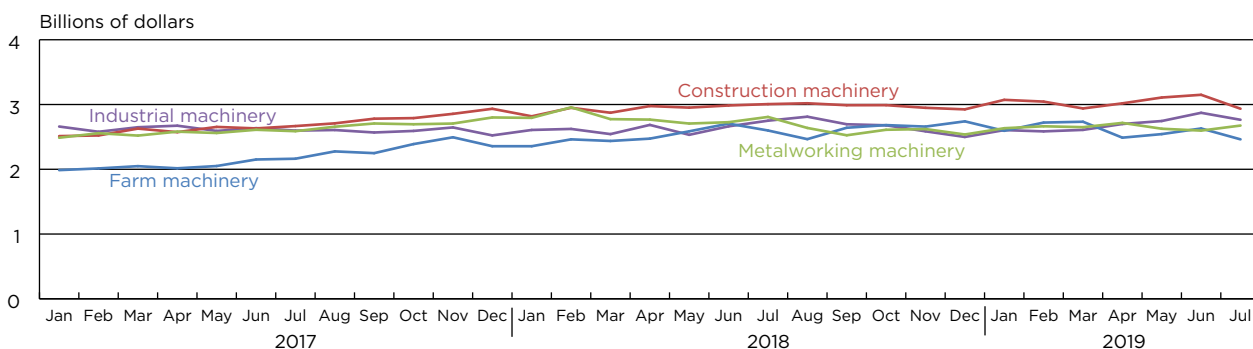

Monthly Value of Shipments From January 2017–July 2019
(Seasonally adjusted)

Note: Data not adjusted for price changes. Statistical significance is not measurable for this survey. The Manufacturers' Shipments, Inventories, and Orders estimates are not based on a probability sample, so the sampling error of these estimates cannot be measured nor can the confidence intervals be computed.

Monthly Value of Shipments for Some Machinery Industries From January 2017–July 2019
(Seasonally adjusted)

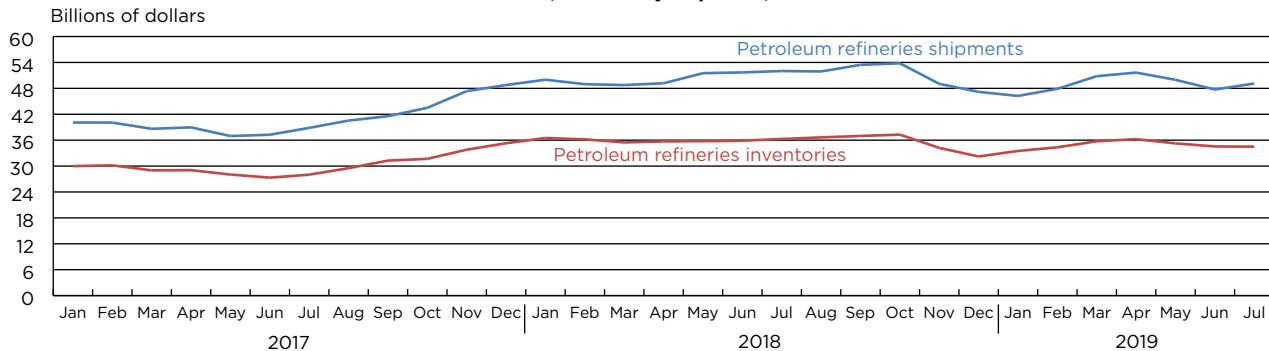

Note: Data not adjusted for price changes. Statistical significance is not measurable for this survey. The Manufacturers' Shipments, Inventories, and Orders estimates are not based on a probability sample, so the sampling error of these estimates cannot be measured nor can the confidence intervals be computed.

2019 Manufacturing Day

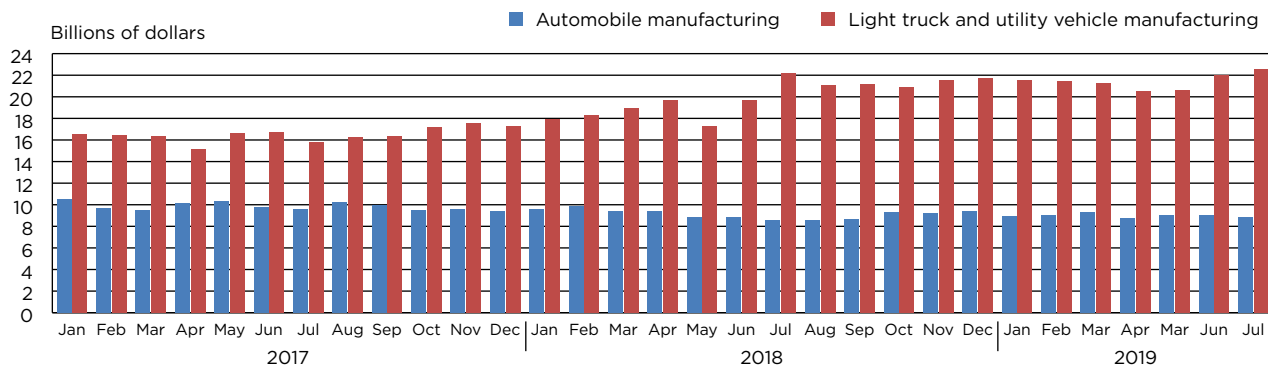

Monthly Value of Shipments and Total Value of Inventories for Petroleum Refineries From January 2017–July 2019 (Seasonally adjusted)

Note: Data not adjusted for price changes. Statistical significance is not measurable for this survey. The Manufacturers' Shipments, Inventories, and Orders estimates are not based on a probability sample, so the sampling error of these estimates cannot be measured nor can the confidence intervals be computed.
