

Percent Change in the Poverty Rate of the Total Population by County: 2007 to 2021

Percent change in poverty rate between 2007 and 2021 by county

Note: The data provided are indirect estimates produced by statistical model-based methods using sample survey, decennial census, and administrative data sources. The estimates contain error stemming from model error, sampling error, and nonsampling error. All counties have been statistically tested at the 90 percent confidence level to determine significant changes. Changes were not calculated for counties that had a substantial boundary change implemented in the 2020 SAIPE.
