TIGERweb

https://tigerweb.geo.census.gov

TIGERweb is a set of web-based mapping tools and services that allows users to view legal and statistical geographic boundaries and physical features from a snapshot of TIGER, the Census Bureau's spatial database.

- TIGERweb Application
- TIGERweb Web Map Service (WMS)

The TIGERweb application contains the latest boundaries of legally defined geographic areas, generally reflecting the boundaries of governmental units in effect as of January 1, 2017. The application also includes physical features such as hydrography, transportation, and special land use areas.

Among other uses, the TIGERweb supports the annual Boundary and Annexation Survey and data dissemination.

TIGERweb offers the ability to view:

- Linear features
 - Roads and highways
 - Railroads
 - Rivers and streams
- Areal features
 - Rivers, lakes, and glaciers
 - Parks, military, correctional facilities, and colleges and universities
- Boundaries for legal and statistical entities

Because geographic and locational context and relationships are important, the TIGERweb application determines which geographic entities and features may be visible based on map scale (see legend to the right).

Users have the capability to turn on and off linear features and geographic entities by type. This allows users to control the data displayed on the map.

The GeoServices REST Specification provides a way for Web clients to communicate with geographic information system (GIS) servers through Representational State Transfer (REST) technology.

TIGERweb WMS and TIGERweb REST Services allow users to integrate Census data into their GIS and/or custom web-based applications

TIGERweb REST Services Data Files TIGERweb Geogra Web Map Services TIGERweb TIGERweb Web Map Service (WMS) Current Geography The Open Geospatial Consortium, Inc. (OGC) Web Map Service interface standard (WMS) provides a simple HTTP interface for requesting geo-registered map images from our geospatial database. The response to the request is one or more geo-registered map images that can be displayed in a browser or WMS client application. By gaining access to our data through our WMS, users can produce maps containing TIGERweb layers combined with layers from other servers. Census 2010 Physical Features NEW Data: Boundary and Annexation Survey (BAS 2015) Data is now available TIGERweb Decennia Census 2010 Census 2000 Incorporate our Web Map Services into your application using the URLs below.
