

Mobile Technology Applications for Verbal Autopsy

**Erin K. Nichols – LT, US Public Health Service
& Sam Notzon - Director
International Statistics Program**

**2012 Federal CASIC Workshops
27-29 March 2012**

Outline

- ❑ **Verbal Autopsy Instrument**
- ❑ **Context**
- ❑ **Choice of Data Collection Interface**
- ❑ **Cost**
- ❑ **Effectiveness**

VERBAL AUTOPSY INSTRUMENT

AIM: Standardization of Vital Statistics Data

International Statistical Classification of Diseases and Related Health Problems (ICD)

- **Adopted and published by WHO**
- **Only cases seen by physician**
- **Ideal source for international comparison**
- **International standard classification:**
 - **Epidemiology**
 - **Health management purposes**

Cause of Death

INTERNATIONAL FORM OF MEDICAL CERTIFICATE OF DEATH

Cause of death		Approximate interval between onset and death
I Disease or condition directly leading to death *)	a)..... due to (or as a consequence of)
	b)..... due to (or as a consequence of)
	c)..... due to (or as a consequence of)
	d).....
Antecedent causes Morbid conditions, if any, giving rise to the above cause, stating the underlying condition last		
<hr/> II Other significant conditions contributing to the death, but not related to the disease or conditions causing it		
	
	
<i>*) This does not mean the mode of dying, e.g. heart failure, respiratory failure. It means the disease, injury, or complication that caused death.</i>		

Verbal Autopsy

- ❑ **Used in areas lacking:**
 - **Civil registration system**
 - **Medical certification of cause of death**
- ❑ **Goal: *to obtain probable cause of death***
- ❑ **Users:**
 - **Researchers**
 - **Policy-makers**
 - **Monitoring & evaluation**
 - **Civil registration & vital statistics systems**

Verbal Autopsy (cont'd)

- **Method:**
 - Interview with family member or caregiver of deceased

- **To obtain details on:**
 - Signs
 - Symptoms
 - Complaints
 - Medical history
 - Events in period before death

Standard Verbal Autopsy Questionnaires

- ❑ **Developed to:**
 - **Permit certification and ICD coding**
 - **Ascertain certain causes of death**

- ❑ **Expert review for concensus on standard questions**

- ❑ **3 Questionnaires**
 - 1. Death of a child aged under 4 weeks**
 - 2. Death of a child aged 4 weeks to 14 years**
 - 3. Death of a person aged 15 years and above**

Common Elements in Verbal Autopsy Questionnaires

- ❑ **General information (first page)**
 - **Key identifying info**
 - **Form management data fields**
 - **Respondent info**
 - **Sociodemographic info of deceased**
 - **Death info**
- ❑ **Hx of medical conditions, injury or accident**
- ❑ **Treatment & health service used**
- ❑ **Generalized signs & symptoms during final illness**
- ❑ **Abstracted data from household records**

Age- & Sex- Specific Sections:

- ❑ **Distinguish among age-related:**
 - **Conditions**
 - **Causes of death**
- ❑ **Specific signs & symptoms during final illness**
- ❑ **Age-specific modules**

A shortened questionnaire...

- ❑ **Currently in development by WHO**
- ❑ **Aim: max 120 questions**
 - **Yes/No**
 - **Digits (time intervals)**
- ❑ **2G / SMS text compatible**

Analysis of Verbal Autopsy Findings

- ❑ **Physician-certified verbal autopsy (PCVA)**
- ❑ **Various automated statistical approaches**
- ❑ **New methods continually developed**

Limitations of Verbal Autopsy

- ❑ Cannot ascertain all causes of death
- ❑ Does not perform equally well for all causes
- ❑ May be subject to recall bias
- ❑ Local adaptation may:
 - Affect standardization
 - Bias results

CONTEXT

Our Context

- ❑ **Civil Registration & Vital Statistics System**
 - Permanent system > need storage
 - Legal system: confidential but *not* de-identified
- ❑ **International, low-resource settings**
 - CHW mobile phone ownership: ~95%
- ❑ **Narrative : “Can you tell me about the illness/events that led to his/her death?”**

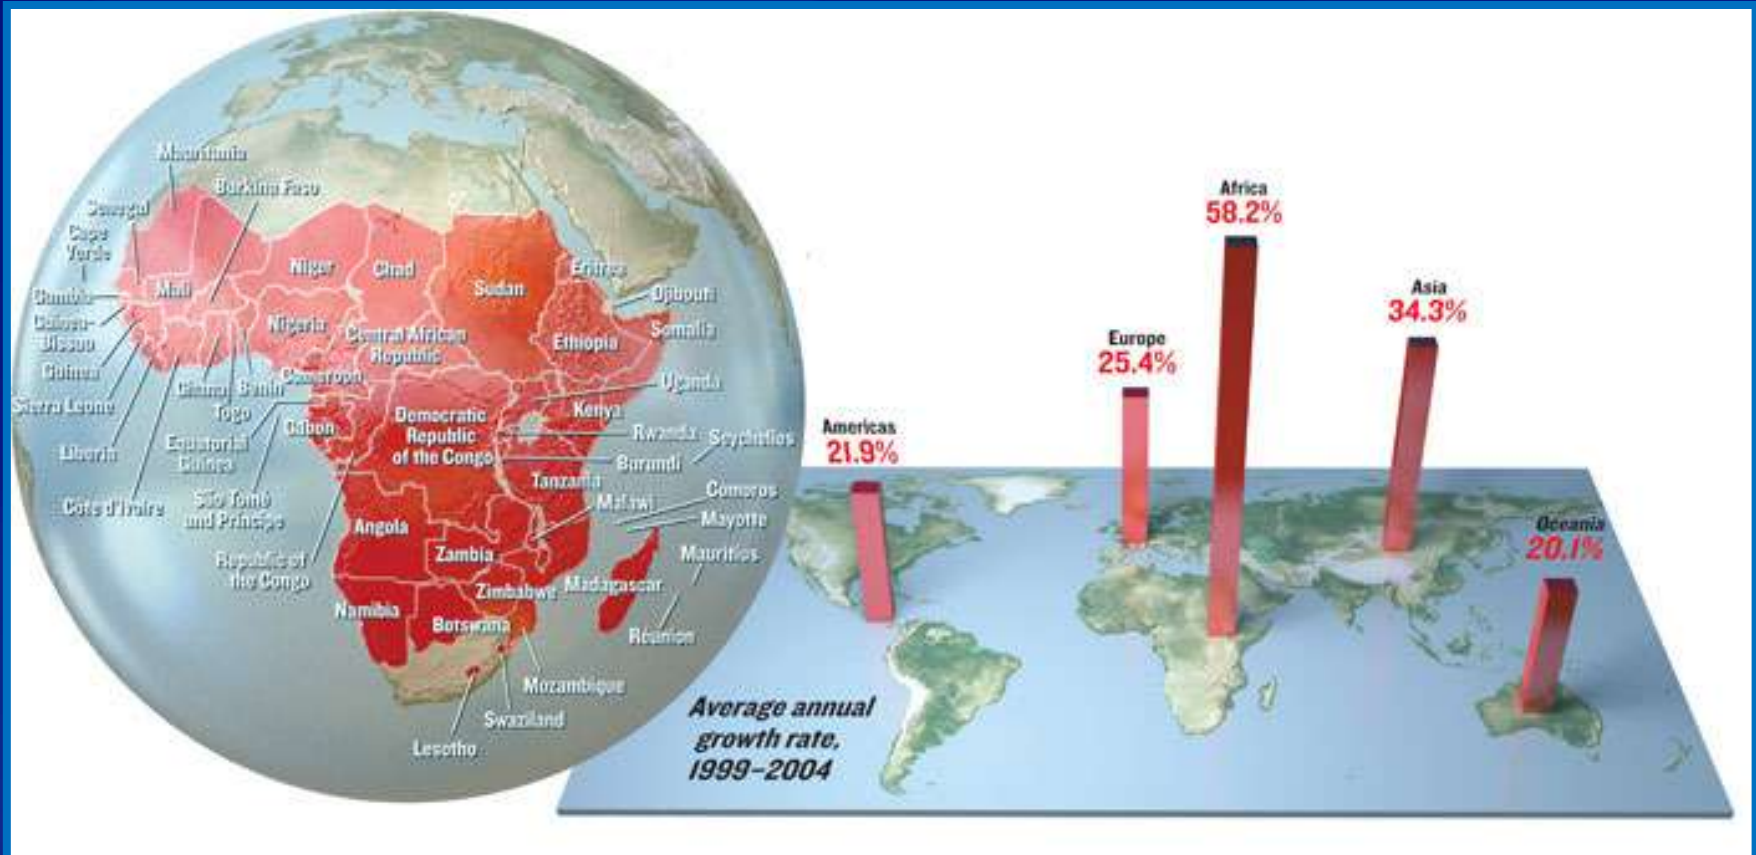

Homa Bay County, Kenya

- ❑ 6 districts
- ❑ ~2,500 Community Health Workers (volunteers)
- ❑ ~175 Community Health Extension Workers (CHEW, paid)
- ❑ Population:
 - ~ 1.07 million
 - ~ 221,000 households
- ❑ ~555 deaths / month:
 - ~3-6 VAs / month for each CHEW

Why mobile data collection is now a reality:

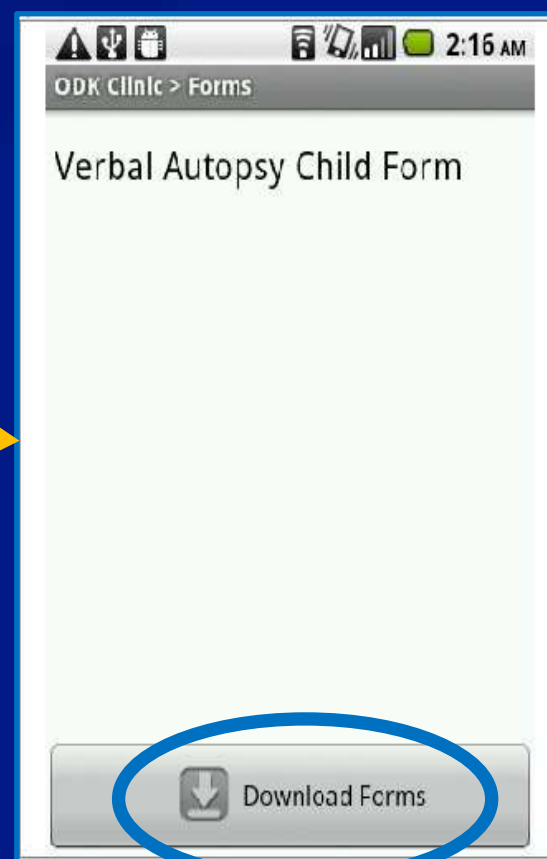

afroRise.

Other Mobile VA Projects

Group	Sites	Device	Configuration	Phase
Millennium Villages Project (MVP)	14 sites in sub-Saharan Africa	Android phone	ODK / cloud server	Deployed in all sites – September 2011
Int'l Health Metrics Evaluation (IHME)	10 sites: India, China, Zambia, Vietnam, Tanzania, Philippines	Site-specific; Galaxy Tab	ODK / server: site-specific	Currently deploying

Record Explore Open Url

ODK Collect > Verbal Autopsy Child Form

PROBABLE CAUSE OF DEATH

Allow the respondent to tell you about the illness in his or her own words. Do not prompt except for asking whether there was anything else after the respondent finishes. Keep prompting until the respondent says there was nothing else. While recording, underline any unfamiliar terms.

Accident

Acute upper respiratory infection

Congenital abnormality

Diarrhea

Conducting a verbal autopsy.....closed-ended questions

Millennium Villages Project

The image displays four screenshots of an ODK Collect mobile form titled "Verbal Autopsy Child Form".

- Top Left Screenshot:** Shows the question "Did s/he receive any treatment for the illness that led to death?". The "Yes" radio button is selected. A yellow arrow labeled "YES" points to the next screenshot.
- Bottom Left Screenshot:** Shows the question "Please tell me at which of the following places/facilities s/he received treatment during the illness that led to death:". Below the question is a list of options with checkboxes:
 - From Community Health Worker (CHW) at home
 - From friend at home
 - From relative at home
 - Traditional Healer
 - Health clinic or post
- Top Right Screenshot:** Shows the same question as the top left. The "No" radio button is selected. A yellow arrow labeled "NO" points to the next screenshot.
- Bottom Right Screenshot:** Shows the question "Why did (NAME) not receive treatment for this illness/condition?". Below the question is a list of options with checkboxes:
 - Personal/religious objection
 - No MONEY for TRANSPORT
 - No MEANS for TRANSPORT
 - No PHONE to call for transport

Operation * Effectiveness * Cost

CHOICE OF DATA COLLECTION INTERFACE

CHW = Community Health Worker (volunteer)

CHEW = Community Health Extension Worker (paid, supervisor)

Operation: Hardware / Device

**2G phone
(CHW's)**

**3G/4G
Smartphone**

Tablet PC

Operation: Software – Open Source Platform

Platform	Device	Configuration	Comments
Open Data Kit (ODK)	Android	Web-based system	Admin support in Swahili, French, English
JavaRosa	Java-enabled	ODK Build / openX data / XForms	Useable on low-resource devices
OpenXData	Java-enabled	ODK Build / XForms	Useable on low-resource devices

Operation: Features / Customization *(options vary by device)*

- ❑ **Multiple languages**
- ❑ **GPS**
- ❑ **Camera**
- ❑ **Voice recording for narrative:**
 - **Network coverage / cost of service**
 - **Quality: clarity / conciseness / background noise**
 - **Privacy**
 - **Linking to data file / device storage space**
- ❑ **Monitoring capabilities**
- ❑ **Durability & minimal glare (for outside use)**

Operation: Data Transmission

- ❑ **Must be *encrypted***

- ❑ **Depends on platform, but most likely:**
 - **GPRS**
 - **Wi-Fi**
 - **Computer connection**

- ❑ **Frequency**
 - **Need to store data until connection available OR**
 - **Data collectors return to central point (with server)**

Operation: Analysis, Back Up & Storage

□ Analysis:

- Local level: feedback for health planning
- National level: national summaries

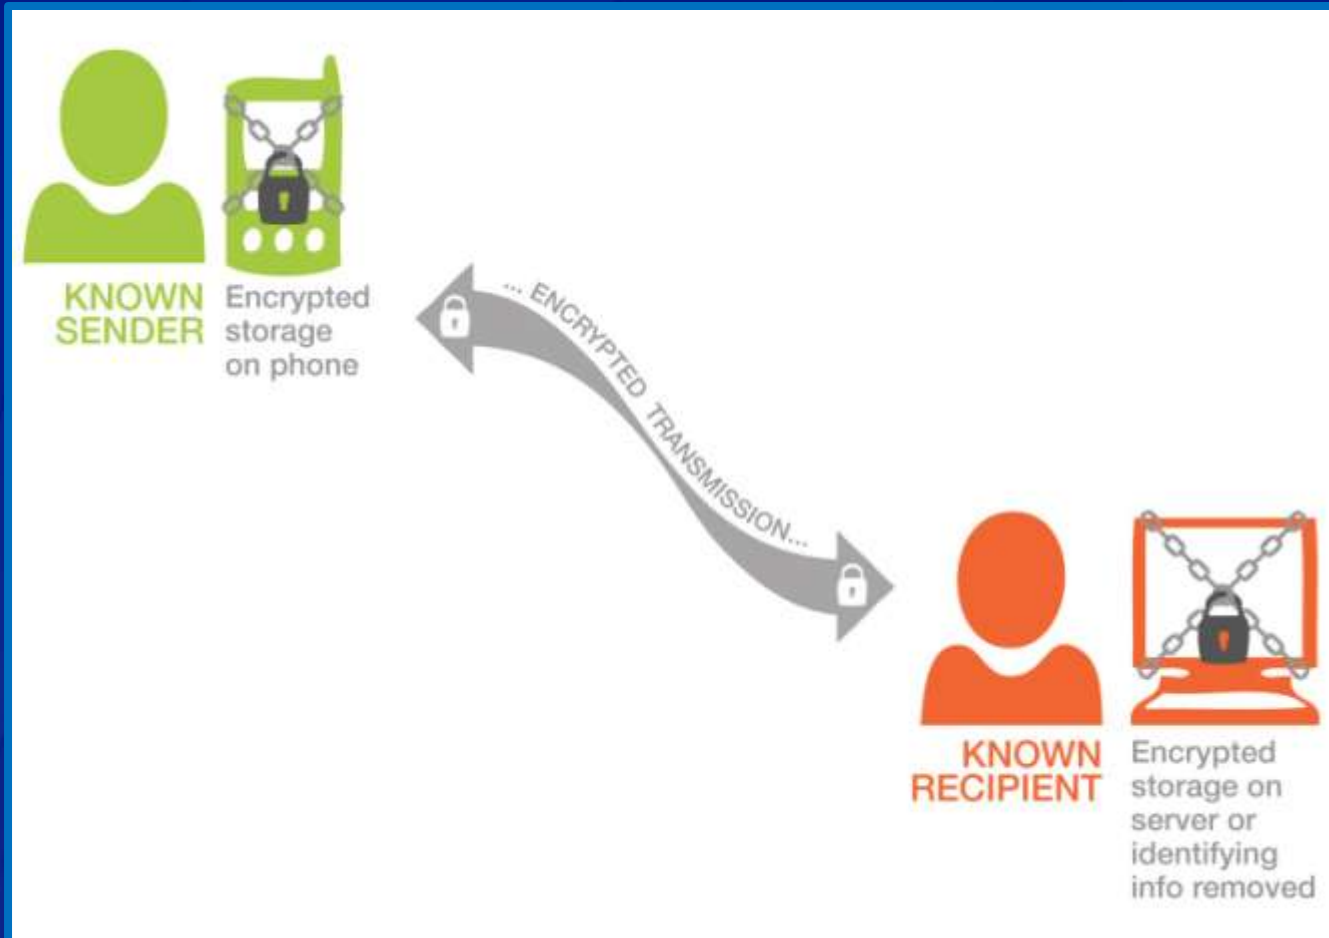

□ Back-up:

- Paper forms
- Remote location (additional servers, external storage)

□ Storage: need *encryption*

- Local server at district level (6 in county; 140 in Kenya)
- SQL server at national level
- Cloud server?

Operation: Security

Encryption Features of Various Tools

Platform	Encrypted Data Transmission	Verified Receiver	Encrypted Storage on Phone	Server Security
Frontline SMS Forms	SMS sent in condensed form, not encrypt.	Yes, by phone #	No	No explicit security features; database in particular is not secured.
RapidSMS	No	Yes, by phone #	No	Database server can be secured.
JavaRosa	Yes (https)	Yes (https)	No	Depends on server; generally DB server can be secured.
OpenXData	Yes (https)	Yes (https)	No	Yes (although you need to set it up); access permissions on server also available.
Open Data Kit (ODK)	Yes (https)	Yes (https)	No (yes in future release)	Hosted solution; various server options if you can host and secure your own server.

<https://safermobile.org/resource/secure-mobile-data-collection/>

Operation: Other Considerations

- ❑ **Power source / battery life**
 - **Solar**
 - **Extra battery supply if removeable battery**
 - **Recharge at central location**

- ❑ **User**
 - **User preference / previous experiences**
 - **Education level**
 - **Paid employee**

- ❑ **Training: *ESSENTIAL!***

COST

Cost

	Fixed One Time Costs	Ongoing/Variable Costs
Device & Functional Requirements	Equipment: Device Server Connectivity Software (open source)	Replacement Maintenance
Useage	-	GPRS < SMS over long run
Personnel	Software configuration Technical support Training	Data management Technical support
<u>TRAINING</u>	Thorough up front	Ongoing training

EFFECTIVENESS

Effectiveness

- ❑ **Monitoring / audit trail**
 - **Flags for completeness**
 - **GPS – interviewer location**
 - **Time stamping**
- ❑ **Accuracy of data entry**
 - **Logic / range checks**
- ❑ **Speed of data entry (depends on device)**
 - **Collection & entry combined**
 - **Skip patterns / data flow**
- ❑ **Operational risk: accidental deleting**

Summary of Advantages of Mobile Data Collection

- ❑ Potentially improves timeliness of data production**
- ❑ Enhanced data quality**
- ❑ Monitoring interviewer**
- ❑ Additional features (e.g. GPS, camera, voice recording)**

Thank you!

The findings and conclusions in this report are those of the authors and do not necessarily represent the official position of the Centers for Disease Control and Prevention.

Comparison of Mobile Data Collection Tools

- ❑ **ODK**
 - **Requires Android phones**
- ❑ **JavaRosa**
 - **Java enabled phones**
- ❑ **Open X Data**

- ❑ **Similarities (licensing- open source, language, data type, network, cost (free software), tools for configuration, software completely customizable, support)**

- ❑ **Differences (device/cost, data storage, connectivity not required for data collection, operating systems)**
