National Center for Science and Engineering Statistics (NCSES)

- **A federal statistical agency within NSF**
- **Charged with the mission to provide a central clearinghouse for the collection, interpretation, and analysis of data on scientific and engineering resources**
- **12 periodic data collections covering science and engineering**
 - **Research and Development**
 - **Education**
 - **Workforce**
- **Individual and establishment, surveys and censuses**
- **First data collection began in 1951**
- **Over 7 contracts for external support**

NCSES Surveys

Select NCSES surveys:

- **GSS = Survey of Graduate Students and Postdoctorates in Science and Engineering**
- **RDX = Survey of Research and Development Expenditures at Universities and Colleges**
- **FFS = Survey of Federal Funds for Research and Development**
- **FSS = Survey of Federal Science and Engineering Support to Universities, Colleges, and Nonprofit Institutions**
- **FAC = Survey of Science and Engineering Research Facilities**
- **SED = Survey of Earned Doctorates**
- **SDR = Survey of Doctorate Recipients**
- **NSRCG = National Survey of Recent College Graduates**
- **NSCG = National Survey of College Graduates**

July 2011 ■ NSF 11-319

Two Decades of Increasing Diversity More than Doubled the Number of Minority Graduate Students in Science and Engineering

by Peter Einaudi¹

From 1989 through 2009 the number of minority U.S. citizens and permanent residents enrolled in graduate science and engineering (S&E) programs more than doubled, growing from approximately 37,700 in 1989 to 92,700 in 2009. Increases in Hispanic, black, and Asian/Pacific Islander S&E graduate students were similar over this period (approximately 17,800, 18,200, and 17,200, respectively); however, these gains almost tripled the number of Hispanic graduate students (approximately 190% growth) and more than doubled the number of blacks (approximately 155% growth) and Asians/Pacific Islanders (approximately 110% growth). Enrollment among American Indians/Alaska Natives also nearly tripled, increasing from approximately 900 in 1989 to approximately 2,600 in 2009 (approximately 195% growth). Minority enrollment among U.S. citizens and permanent residents enrolled in graduate S&E programs grew from approximately 13% in 1989 to approximately 24% in 2009 (figure 1). Due to extra variability of the methodological changes in the 2007 Survey of

Graduate Students and Postdoctorates in Science and Engineering (GSS), all growth rate calculations comparing pre- and post-2007 counts are rounded to the nearest 5% and counts are rounded to the nearest 100; see “Data Limitations and Availability” for more information.

Despite these substantial gains, black and Hispanic U.S. citizens and permanent residents remain underrepresented within the S&E graduate student population when compared with the adult U.S. citizen population. In 2009, 7.8% of the U.S. citizens and permanent residents pursuing graduate S&E degrees were black and 7.1% were Hispanic. In 2009, 13.8% of U.S. citizens 21 to 45 years of age were black and 11.9% were Hispanic. In contrast, the percentage of American Indians/Alaska Natives in the 2009 S&E graduate student population was very similar to that of the adult U.S. citizen population (0.7% vs. 0.8%), and the percentage of Asians/Pacific Islanders pursuing S&E graduate degrees was more than twice that of the U.S. citizen population aged 21 to 45 years (8.6% vs. 3.8%).

These and other findings in this InfoBrief are from the fall 2009 GSS, cosponsored by the National Science Foundation (NSF) and the National Institutes of Health (NIH). The GSS is an annual survey of all academic institutions in the U.S. that grant research-based master’s degrees or doctorates in science, engineering, or selected health (SEH) fields. The GSS collects data on the number and characteristics of graduate students, postdoctoral appointees (postdocs), and other doctorate-holding nonfaculty researchers in SEH fields.

Graduate Student Enrollment in S&E

In S&E fields, total graduate student enrollment (full-time and part-time) reached 545,685 in 2009, an increase of 3.1% from 2008 to 2009 (table 1). Graduate enrollment in engineering fields grew faster than in science fields for the fourth straight year (4.9% vs. 2.4% in 2009) and increased by approximately 40% over the past decade, as compared to approximately 30% for science fields. Although there was noted growth in S&E enrollment, assessing the overall trend in the

Current Environment

* Other data used regularly in NCSES publications

DST = Detailed Statistical Tables

Data System Vision

- **Objectives**

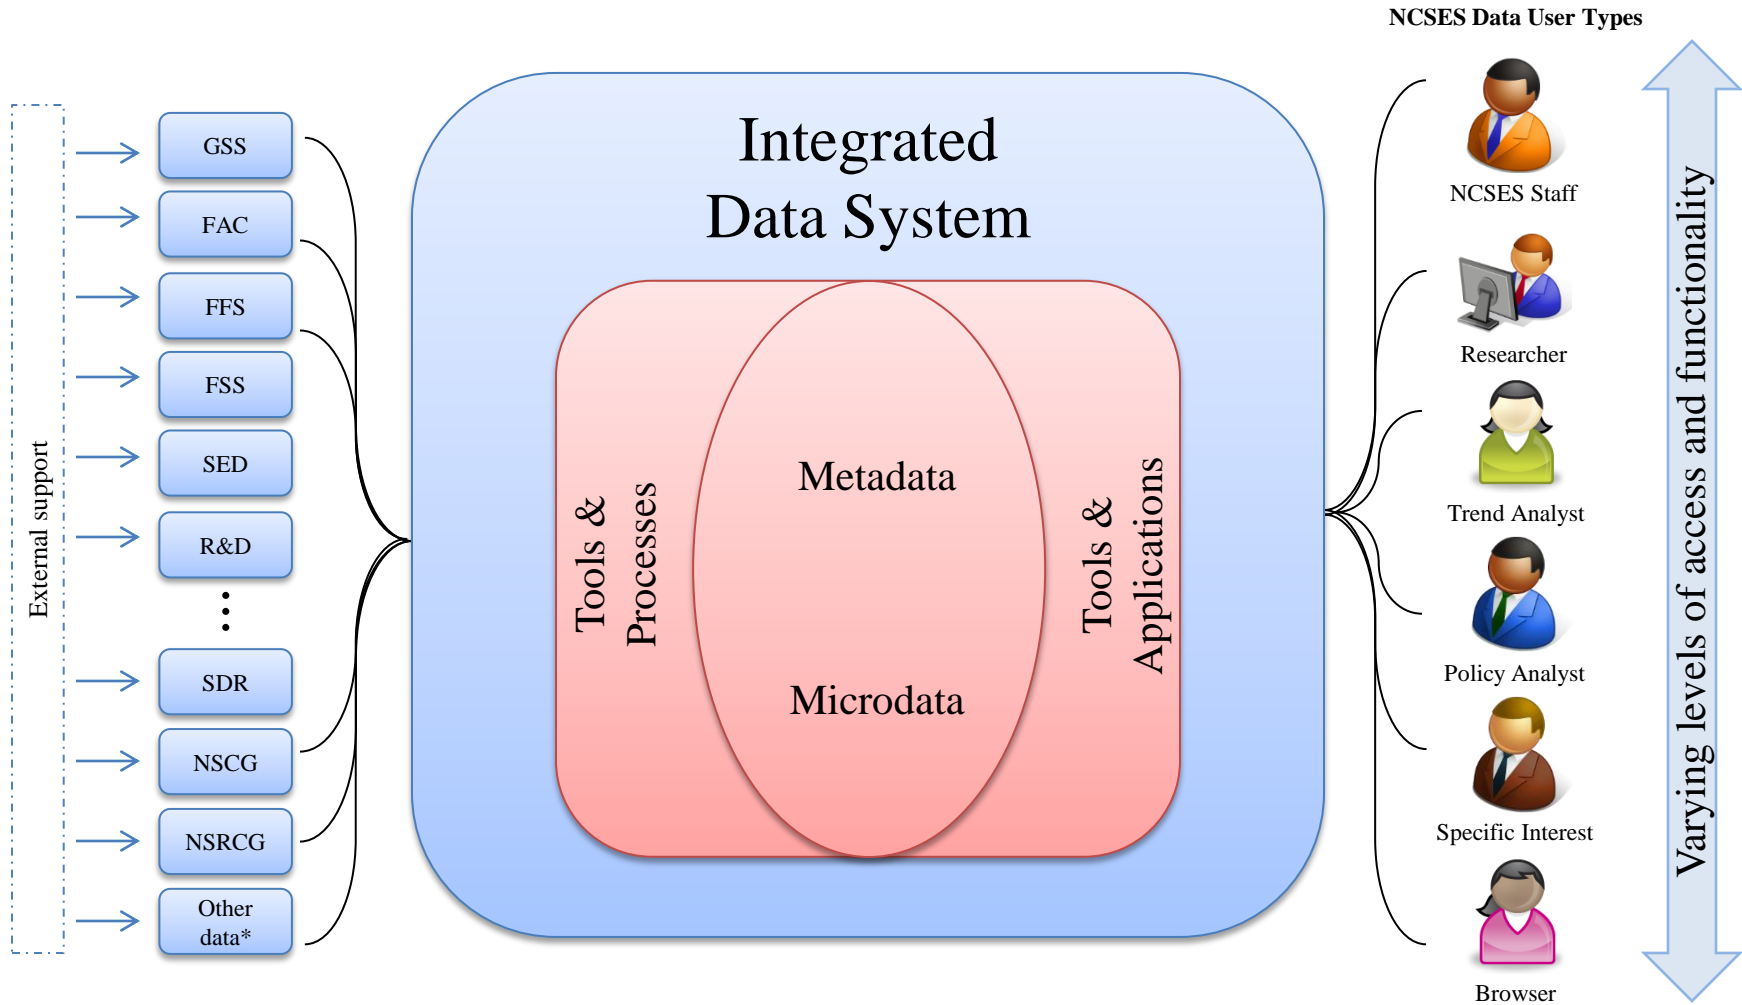

- To meet transparency and reproducibility requirements of a federal statistical agency
- To provide enhanced content and data management across multiple tiers of NCSES data
- To enhance dissemination of these data to a broad audience

- **Main Goals**

- To store and maintain NCSES survey data in one central warehouse
- To integrate advanced data tools with the data management system
- To deliver a broad range of content and analytical functionality via advanced data tools to a variety of users

- **Future process: integrated, dynamic, robust**

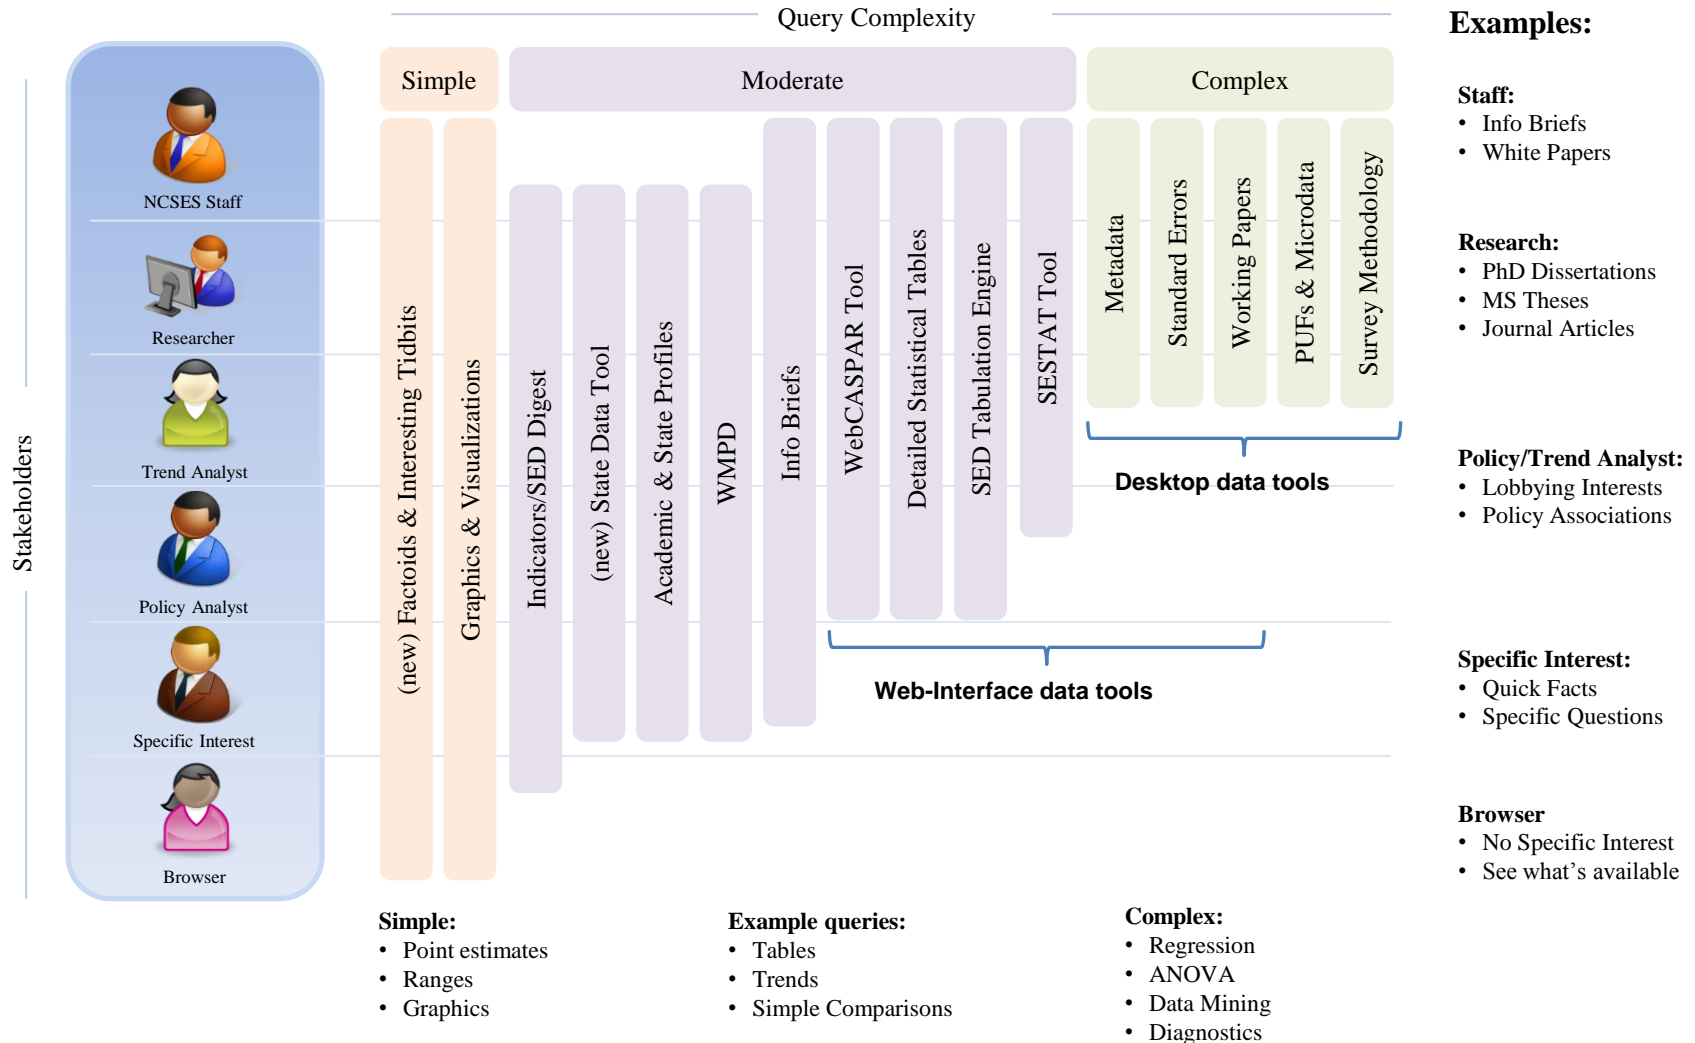

Data System Vision

- Define storage schema

Data Repository Delivery Requirements

Survey contractor:

- Shall deliver the following to the NCSES data repository at the end of each survey cycle:
 - **Microdata and Associated Files**
 - Microdata
 - Metadata
 - Computer Code
 - Documentation
 - **Product and Report Data and Associated Files**
- According to specified requirements

Data Repository Delivery Requirements

Metadata requirements

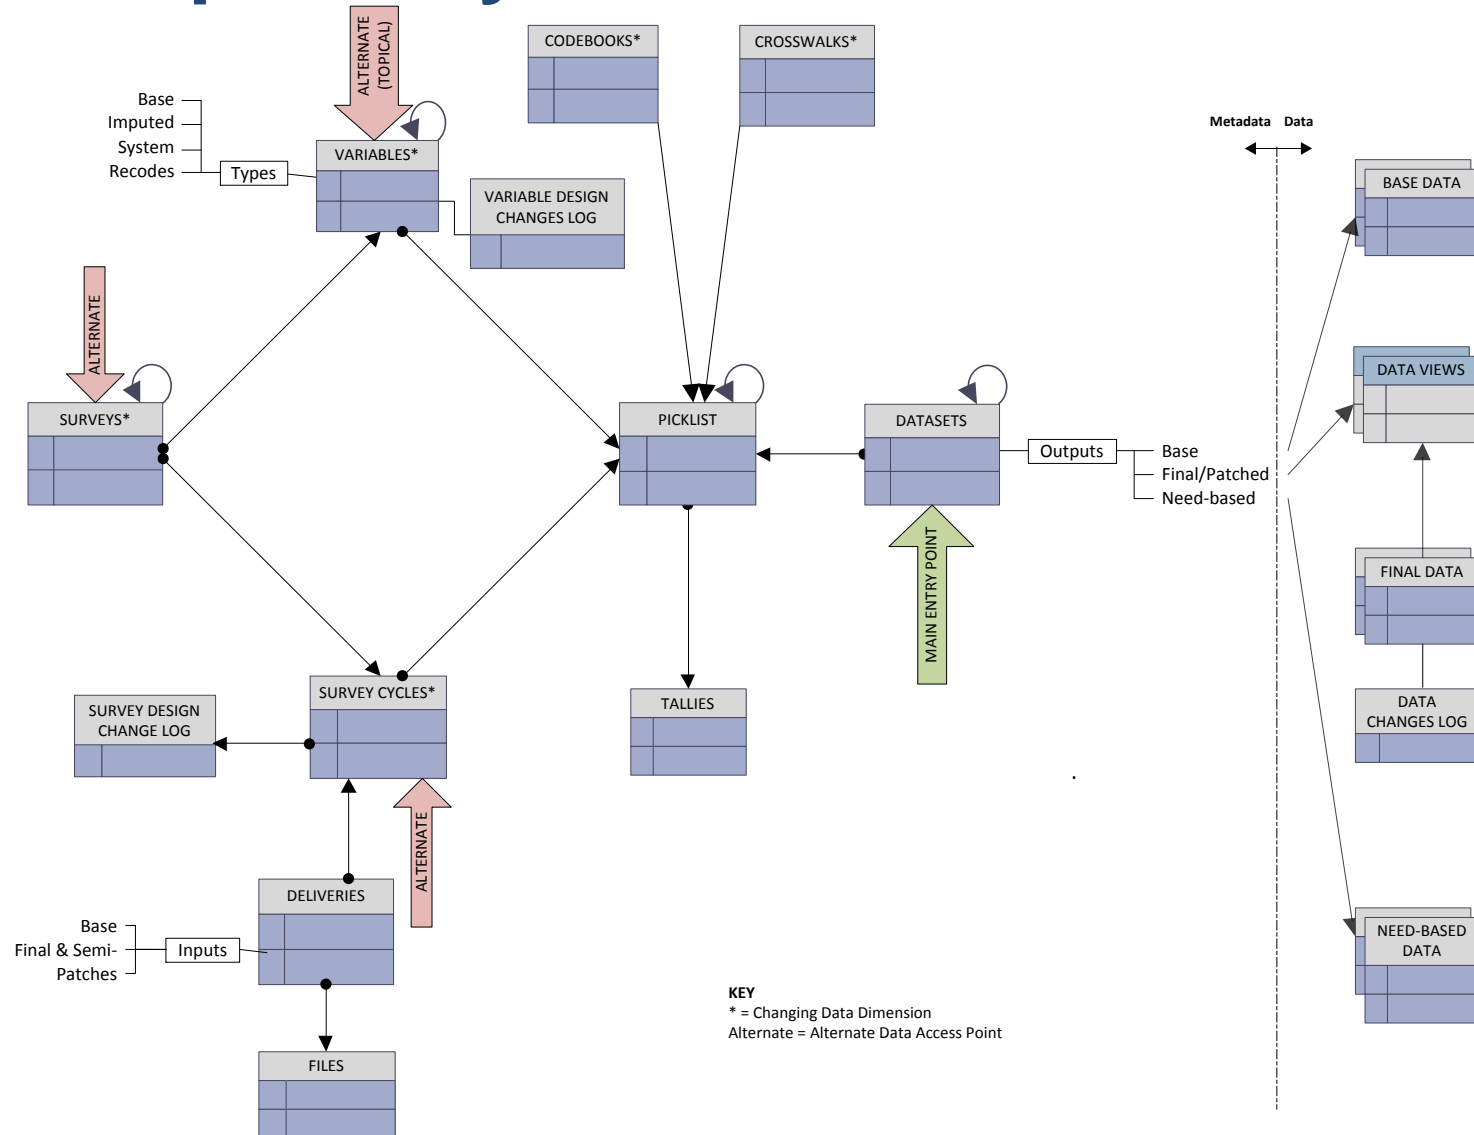

- Comprehensive
- Standard formats
- Machine-readable

VARIABLE_NAME	VARIABLE_LABEL	QUESTION_NBR	STATUS_PREV_CYCLE	RECODE_VARIABLE_FLAG	DERIVED_VARIABLE_FLAG	DESCRIPTION	QUESTION	CODE_NAME	DATA_TYPE	DATA_LENGTH	DATA_SCALE	DATA_CLASS	NOTES
institution_id	Institution ID	SYSTEM	UNCHANGED	0	0	ID number	System assignment based on order of addition to the universe.		NUM		0	NUMERIC	Cannot be missing.
PHDFY	PHDFY	DERIVED	UNCHANGED	0	1	Fiscal year of doctorate	Fiscal year derived from PHDMONTH and PHDCY.	YEAR_CODE	NUM		0	NUMERIC INTERVAL	Cannot be missing.
			UNCHANGED	0	0	Form type indicator	Version of the questionnaire used is indicated on the front cover by the graduation date ranges, in addition to the color of the questionnaire.	FORM_CODE	CHAR	2		CHARACTER CATEGORICAL	Cannot be missing (nonrespondents assigned value for the corresponding FY in which they were added to the DRF).
			UNCHANGED	1	0	Type of doctorate	Please complete: [Type of Research Doctoral Degree (e.g. Ph.D., Ed.D., etc.)]	DOC_CODE	CHAR	2		CHARACTER CATEGORICAL	
			UNCHANGED	0	0	Dissertation field	Using the list on page 7, choose the code that best describes the primary field of your dissertation research.	FOS_CODE	NUM		0	NUMERIC CATEGORICAL	If numeric code not provided, but verbatim field is, staff code the verbatim.
			UNCHANGED	0	0	Tuition remission - full or partial	If you received a full or partial tuition remission (waiver) for your doctoral studies, was it: 1, I did not receive any tuition remission; 2, for less than 1/3 of tuition; 3, between 1/3 and 2/3 of tuition; 4, more than 2/3 of tuition, but less than full; 5, full tuition remission.	TUTREMS_CODE	NUM		0	NUMERIC ORDINAL	
			UNCHANGED	0	0	Fellowship, scholarship	Which of the following were sources of financial support during graduate school- Fellowship, scholarship?	YES_NO_CODE	NUM		0	NUMERIC CATEGORICAL	
			UNCHANGED	0	0	Grant					0	NUMERIC CATEGORICAL	
			UNCHANGED	0	0	Under					0	NUMERIC ORDINAL	

Column Name	Description	Valid Values
Variable Detail tab (e.g. 'DRF' tab)	This tab should include one row for each variable in the data file. For each variable, please provide the following information in the corresponding columns.	
VARIABLE_NAME	Variable name	Character string including alphanumeric and underscore character (no spaces or special characters)
VARIABLE_LABEL	Variable label. This can be the same as the variable name.	Character string including alphanumeric and underscore character (no spaces or special characters)
QUESTION_NBR	The question number or processing code corresponding to variable	Alphanumeric representation of corresponding question number, eg. A5, Q3, B7, a SYSTEM = if variable is assigned by contractor during processing or by a reference table lookup, eg DRPID or Carnegie Classification RECODE: if response is recoded to a categorical or ordinal variable DERIVED: if variable is a new variable, derived from arithmetic expression of questionnaire response or other variables
STATUS_PREV_CYCLE	Status of variable as compared to previous survey cycle data collection/delivery	UNCHANGED NEW MODIFIED
RECODE_VARIABLE_FLAG	Boolean indicating whether variable is a recode variable	0 = not recode variable 1 = recode variable
DERIVED_VARIABLE_FLAG	Boolean indicating whether variable is a derived variable	0 = not derived variable 1 = derived variable
DESCRIPTION	Short description of variable	
QUESTION	Long description of variable	If directly from question: write the full text of question, including sub-part specific to variable If SYSTEM, list reference table or method used for assignment If RECODE, identify associated variable(s) and define recode method used If DERIVED, define formula used for derivation
CODE_NAME	Corresponding code name (if applicable)	Code must be listed in CODES tab with all relevant information, e.g. YES_NO_CODE, DISS_CODE
DATA_TYPE	Data type	CHAR or NUM
DATA_LENGTH	Variable length	Maximum length of variable (Character variable only)
DATA_SCALE	Variable precision	If data type is NUM, specify the number of decimal places
DATA_CLASS	Variable class	CHARACTER CATEGORICAL CHARACTER TEXT NUMERIC CONTINUOUS NUMERIC CATEGORICAL NUMERIC ORDINAL
NOTES	Any notes or comments about variable	Text
Variable Codes tab (e.g. 'CODES' tab)		
This tab should include all codes referenced in Variable Detail tab in the column 'CODE_NAME'. For each CODE_NAME, list the valid values with descriptions in separate rows.		
CODE_NAME	The code name referenced in DRF tab	
CODE_VALUE	Valid value, one per row	
CODE_DESCRIPTION	Description of value	
CODE_SUB_CATEGORY	Sub-category (if applicable)	

CODE_NAME	CODE_VALUE	CODE_DESCRIPTION
YES_NO_CODE	1	Yes
YES_NO_CODE	2	No
YES_NO_CODE	3	Don't know
FORM_CODE	73	1st Brown (1973)
FORM_CODE	74	1st Blue (1974)
FORM_CODE	75	1st Green (1975)
FORM_CODE	76	2nd Green (1976)
FORM_CODE	77	1st Yellow (1977)
FORM_CODE	78	2nd Yellow (1978/1979)
FORM_CODE	80	2nd Brown (1980)
FORM_CODE	81	Blue (1981)
FORM_CODE	82	Grey/Purple (1982)
FORM_CODE	83	Cream/Black (1983)
FORM_CODE	84	Cream/Green (1984)

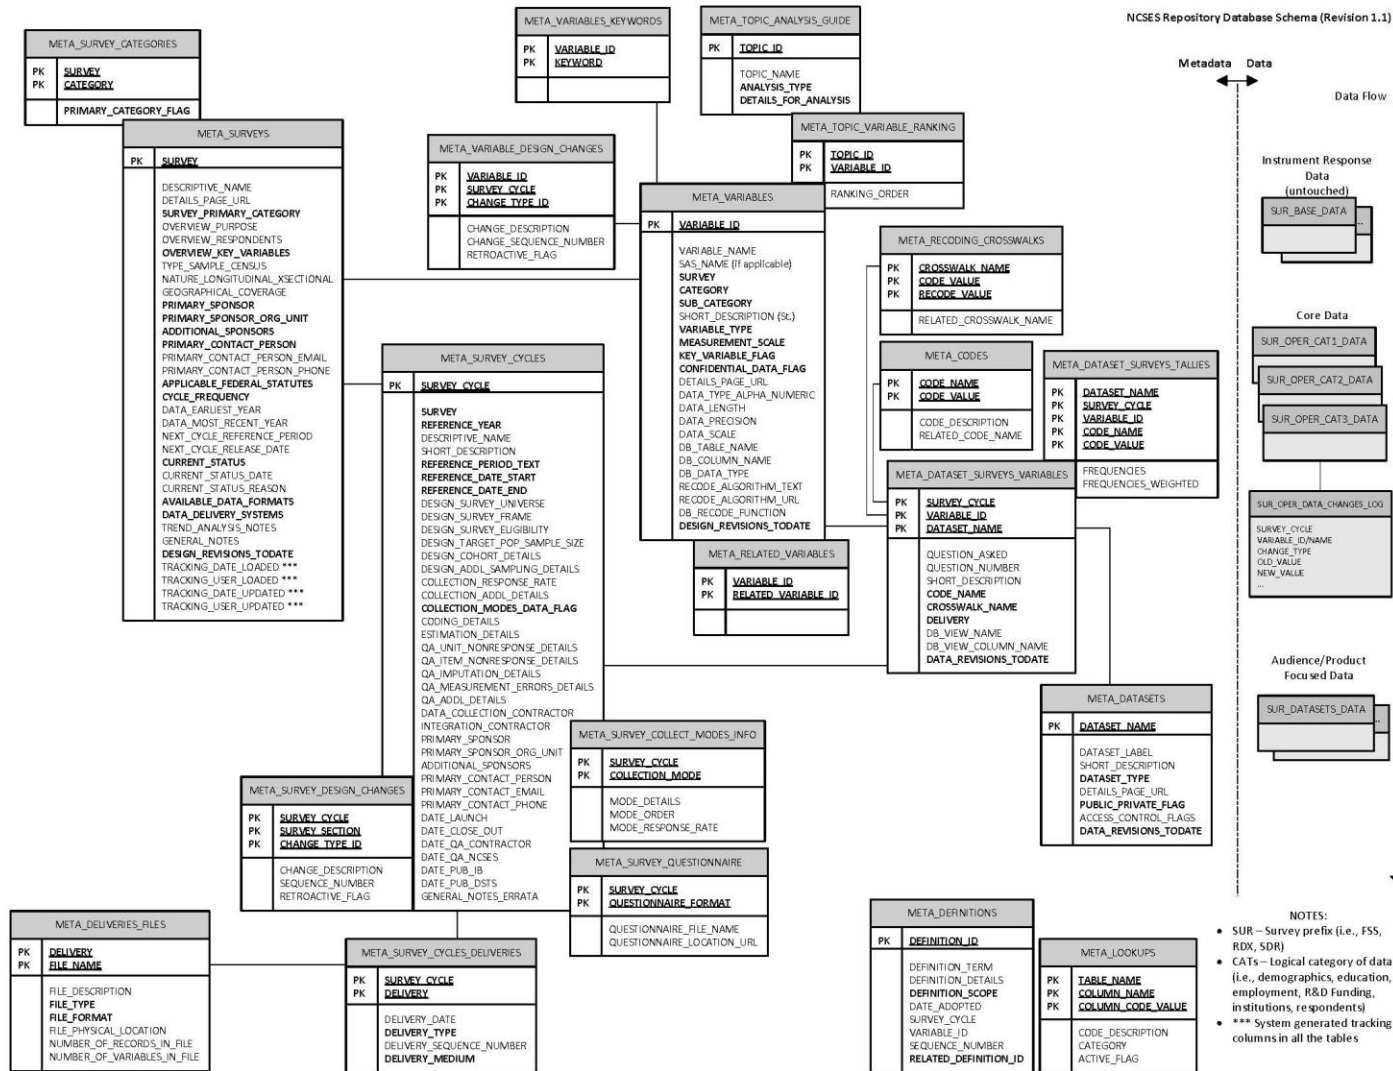

Data Repository Schema

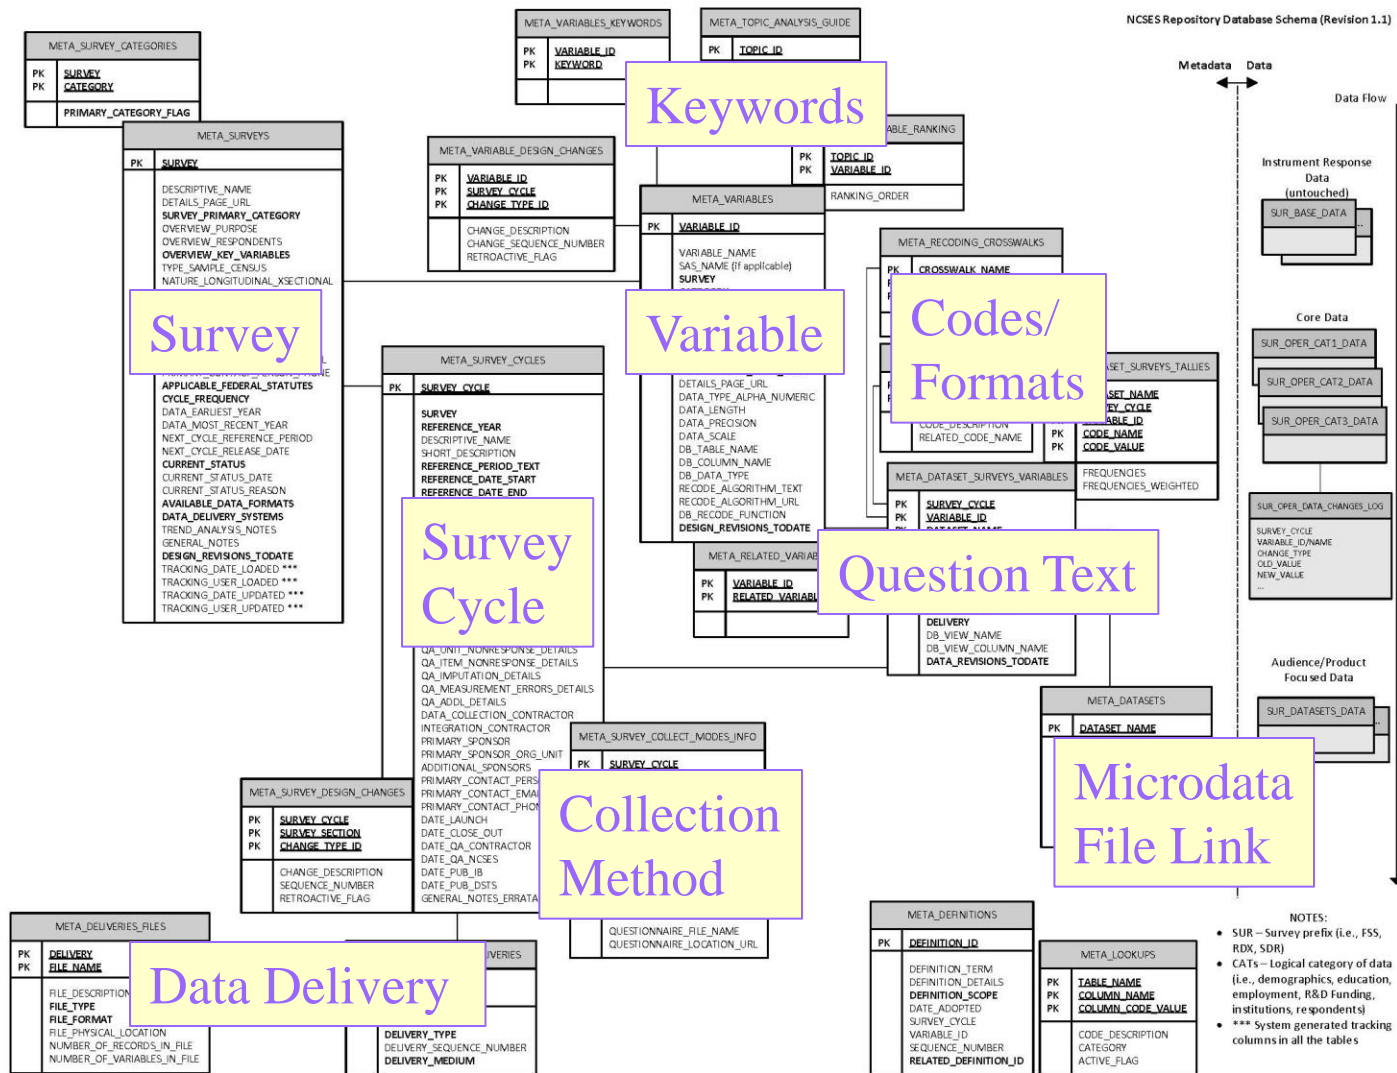

Data Repository Metadata Design

NCSES Repository Database Schema (Revision 1.1)

Data Repository Metadata Design

Next Steps

Data Infrastructure

- Load microdata
- Load metadata

Data Tools and Access

- Implement integration technologies
- Provide training for staff on existing data tools
- Pilot dynamic data tables

Thank you!
