

Development of Web Paradata Dashboards

2017 FedCASIC Workshops
Suitland, Maryland
April 12, 2017

Josh DeLaRosa, Paul
Schroeder, Sarah Stepina,
David Pulaski, David Nagglee

- Survey sponsor & reviewers

Overview

- Understanding paradata
- Process of developing web paradata dashboard
- Lessons learned
- Next steps
- Demonstration

Framework

- Research-based explanation of paradata in web surveys
- Example of quality metrics
- Use cases of paradata
- Common Web analytics

Callegaro, M. (2013b). Paradata in web surveys. In Kreuter (ed.) *Improving Surveys with Paradata: Analytic Uses of Process Information*. Hoboken, New Jersey: Wiley. 263- 282.

Typology of Survey Data

- Response data – data collected from responses to questions presented to respondents
 - Demographic data; Economic data
- Meta data - contextual data on how the data was collected
 - Questionnaire; Codebook
- Auxiliary data – information collected outside of the survey instrument
 - Frame data; Matched data
- Paradata – data collected during the **process** of administering the survey instrument
 - Number of contact attempts; Time of day

Paradata

Device data

- Browser
- Operation System
- Device type
- Java enabled

Response behavior data

- Time to complete question
- Last question answered (breakoffs)
- Number of re-entries

Methods to Explore Paradata

Flat file

- Limited to the variables on the file
- Requires statistical package
- File access barriers (e.g., FTP, codebooks & permissions)
- Allows for deeper analysis

Dashboard

- Limited to the variables read into dashboard
- Requires a browser
- Provision user to dashboard
- Allows for performance monitoring

Why Visualize Paradata?

- Explore and visualize paradata
- Identify trends over time
- Agile and scalable solution
- Operations and subject matter tool
- Interactive
- Shareable

Number of Sessions

Device Type

| Session Count | Mobile Phone | Tablet | Desktop |
|---------------|--------------|--------|---------|
| 1 | 86.59% | 83.01% | 91.27% |
| 2 | 9.18% | 11.61% | 6.04% |
| 3 | 2.03% | 2.80% | 1.24% |
| 4 | 0.99% | 0.86% | 0.52% |
| 5 | 0.60% | 0.65% | 0.36% |
| 6 | 0.27% | | 0.46% |
| 7 | 0.11% | | |
| 8 | 0.11% | 0.65% | |
| 9 | | 0.22% | 0.10% |
| 12 | | 0.22% | |
| 24 | 0.05% | | |
| 99 | 0.05% | | |

Sourcing Data

- Nationally representative web panel data
- Server-side data collection
 - Observed errors with client-side JS data collection
- Parsing User Agent String
- **Organically** produced by web data collection instrument

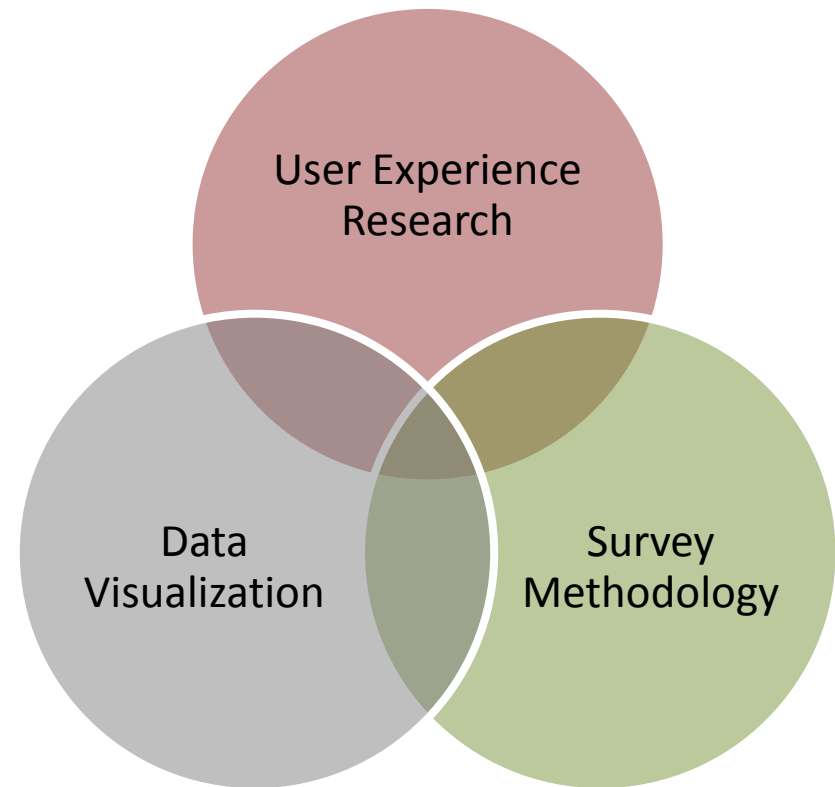

Visualization Platform

- Off the shelf software
 - Prototyping
 - Quick turnaround
- Requirements analysis
 - Subject matter
 - Operations/ technical
 - Developer (feasibility analysis)

Lessons Learned

- Dashboard can be created lean & quickly
- Intended to enhance, not replace ex-post facto review of paradata
- Engage diverse view points to maximize impact
- Data quality: compare JS vs server-side data
- Mix of disciplines

Next Steps

- CATI paradata
- Scale up
- Establish benchmarks
- Response data

Demonstration

Time & Date

- Device Type**
- Mobile Phone
 - Tablet
 - Desktop

- Survey Status**
- Complete
 - Incomplete

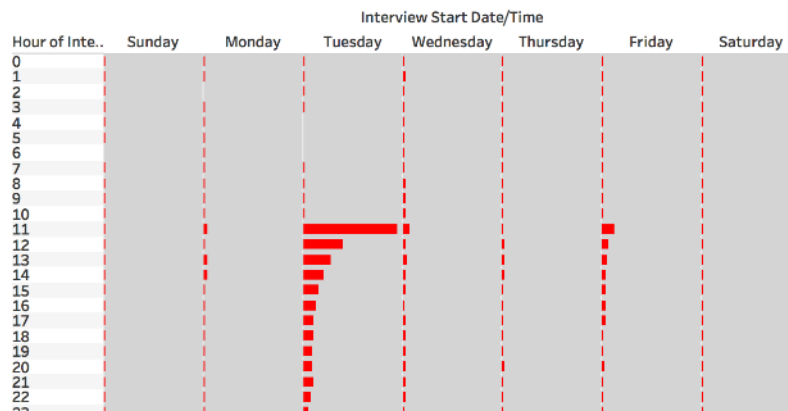

Date

Completes by Day

Questions?

Josh_delarosa@abtassoc.com

Abt Associates is about opportunity and hope.
*Helping people move from vulnerability to security
so they can thrive.*

We think boldly, crossing disciplines, methods,
and geographies to bring the best solutions
to the toughest challenges.

OUR MISSION

To improve the quality of life and economic well-being of people worldwide

OUR VALUES

Mission-Driven | Global | Committed to Excellence | Collaborative | Accountable | Balanced

TACKLING THE WORLD'S TOUGHEST CHALLENGES

**BOLD
THINKERS
DRIVING
REAL-WORLD
IMPACT**
