RAPTER®

Case Management and Evaluation Solutions

Quick and Easy Participant Enrollment

Sophisticated Random Assignment

Comprehensive Service Tracking

Flexible and Easy-to-Use Reporting

Confidence and Control Over Your Vital Data

What is RAPTER®?

Evidence is critical. For programs to be successful, you need to know what works. The Random Assignment, Participant Tracking, Enrollment and Reporting (RAPTER®) system is built to scale for each client to support both program management and evaluation, all while keeping your data safe in a cloud-native environment.

Quick and Easy Participant Enrollment
RAPTER® users directly enter client data through a simple interface that includes checks for eligibility and duplication.

Sophisticated Random Assignment
RAPTER® helps you run a randomized controlled trial. The client enrollment process is tailored to follow your specified randomization algorithm and automatically assign clients into treatment and control groups.

Comprehensive Service Tracking
RAPTER® helps you manage client attendance, service receipt, referrals, incentives, attendance, contact information, and other data.

Flexible and Easy-to-Use Reporting
RAPTER® helps you run your program and monitor your results with report templates, data extracts, and dashboard visualizations; RAPTER® can be customized to meet your other reporting needs.

Confidence and Control Over Your Vital Data
Your programs and evaluations collect large amounts of vital data and you need to keep those data safe. RAPTER® is cloud-native and was built to secure Federal Information Security Management Act (FISMA) Moderate standards.

Who benefits from using RAPTER®?

**Nonprofit or for-profit program operators**

Foundations or grant providers

Government agencies

Research organizations

"….[Mathematica] has software available that not only supports random assignment but can also be used for baseline surveys, consent, and participant tracking. This is a benefit to the government because such a system does not need to be developed, there are already trainings available, it can be tailored, and it already meets [Federal Information Security Management Act] standards." *-Federal client*

"Our funders and partners know what our program is doing. They know our numbers and how we're doing—that's the biggest advantage and improvement they've had with using RAPTER®." *-Nonprofit client*

"It's been great to just ramp up our operations with the help of RAPTER® and not fear the data was going to disappear or that we couldn't keep up with it." *-Nonprofit client*
