## **Preliminary: U.S. Imports for Consumption of Steel Products April 2008**

The U.S. Census Bureau announced today that preliminary April steel imports were **\$2.8 billion (2.7 million** metric tons) compared to the preliminary March totals of \$2.5 billion (2.3 million metric tons).

The March to April change in steel imports, based on metric tonnage, reflected increases primarily in blooms, billets, and slabs; hot rolled sheets; and wire rods. Monthly changes in steel imports reflected increases primarily with Brazil and Turkey.

The year to date final statistics through March 2008 showed steel imports of 7.0 million metric tons compared to 7.9 million metric tons through March 2007. The largest commodity decreases were in wire rods, reinforcing bars, and cold rolled sheets. The largest commodity increase was in line pipe greater than 16 inches in diameter. The largest country decreases were with China, Brazil, and Russia. The largest country increase was with Canada.

### **Notes:**

**The data in this report are preliminary and subject to revisions.**

*Analysis of recent months for steel product imports indicates the value of preliminary data should equal about 96 percent of the final value reported in the regular monthly trade statistics report. Preliminary data reported for individual steel categories and at the individual country of origin level have been less consistently predictive of the final data reported in the regular monthly trade statistics. For further details visit the Foreign Trade Division web site at: [www.census.gov/foreign-trade/www/](http://www.census.gov/foreign-trade/www/). On the web site you can access product by country and country by product tables.*

*The next release is June 24, 2008.*
