U.S. GOODS TRADE: Imports & Exports by Related Parties; 1994

The Bureau of the Census, Department of Commerce, announced today that in 1994 related party trade accounted for \$305.3 billion or 46 percent of the total annual import value of \$657.9 billion, and \$165.1 billion or 32 percent of the total annual export value of \$512.7 billion. "Related party trade" includes trade by U.S. companies with their subsidiaries abroad as well as trade by U.S. subsidiaries of foreign companies with their parent company.

The relationship of goods trade by related parties to total goods trade varies markedly among our major trading partners; from a high of 76 percent for imports from Japan and 44 percent for exports to both Canada and Mexico to a low of 13 percent for imports from China and 6 percent for exports to China. The ratios for Western Europe and the European Union are comparable to the 45 and 32 percent averages for all U.S. imports and exports. Taiwan and Korea are at the lower tier of related party trade at 19 and 38 percent for imports, and 12 and 11 percent each for exports, respectively. Over half of the imports from our North American trading partners consist of transactions between firms with some common ownership. Many of these related party imports come from U.S. owned plants located in Canada and Mexico.

Approximately 44 percent of the total trade between the United States and Canada is between related parties. Over 69 percent of the imports from Mexico are between related parties, partly due to extensive assembly services along the border. However, related party exports to Mexico are somewhat lower at 44 percent.

Exhibits 2,3,5, and 6 provide detailed data on the types of commodities involved and their relative

importance. For example, road vehicles, office and automated data processing machines, and electrical machinery are three of the top five imported and exported commodity groupings. The related party trade for these commodities is extremely high; ranging from 51 to 82 percent.

The five leading U.S. imports from the world, including road vehicles (15.1% of the total import value), electrical machinery (8.6%), office and automated data processing machines (7.9%), petroleum and related products (7.4%), and articles of apparel and clothing accessories (5.6%) account for 45 percent or \$293.6 billion of the total import value. The related party trade for petroleum products and apparel is much lower than for the other commodities at 23 and 13 percent.

The five leading U.S. exports to the world, including road vehicles (8.8% of the total export value), electrical machinery (8.6%), transportation equipment (6.0%), office and automated data processing machines (6.0%), and miscellaneous manufactured articles (4.8%) account for 34 percent or \$175.5 billion of the total export value. The related party trade for transportation equipment and miscellaneous manufactured products is much lower than for the other commodities at 10 and 26 percent.

Exhibit 1. U.S. Merchandise Trade: Imports By Related/Nonrelated Party Trade By Selected Countries And World Areas – 1994

Value in millions of dollars. (Z) Less than 0.05 percent

| Selected Origins | Total Imports (1) | | Related Party Trade | | Nonrelated Party Trade | |

Explanatory Notes:

The statistics in this report are based on tabulations of the U.S. Customs Service import records for 1994.

1994 Unrevised Data: This study was done using 1994 data as first published. It includes the revisions for carryover made in the next statistical month as well as the additional corrections applied in the annual revisions process. While the data in this report would have been slightly different had the revised data been used, the revisions should have little effect on the relative percentages of related and nonrelated trade.

Related Party:

Imports:

Related Party trade as defined in Section 402(g) (1) of the Tariff Act of 1930, as amended, includes transactions between parties with various types of relationships including "...Any person directly or indirectly owning, controlling, or holding with power to vote, 6 percent of more of the outstanding voting stock or shares of any organization..."

Exports:

A related party transaction is defined in the Foreign Trade Statistics Regulations reference 30.7(v) as one between a U.S. exporter and a foreign consignee, where either party owns (directly or indirectly) 10 percent or more of the other party.

Customs Value: The import data in this report are based on Customs value, generally defined as the price actually paid or payable for merchandise when sold for exportation to the United States, excluding U.S. import duties, freight, insurance, and other charges incurred in bringing the merchandise to the United States.

Imports for Consumption: The import data shown in this report are imports for

consumption, which measure the total merchandise that have physically cleared through Customs either entering consumption channels immediately or entering after withdrawal for consumption from bonded warehouses under Customs custody or from Foreign Trade Zones.

Low Value Estimates: Import statistics are compiled on shipments valued over \$1250 or, under certain textile programs, for any article which must be reported on a formal entry. Value data for shipments valued under \$1,251 and not required to be reported on formal entries are estimated for individual countries using factors based on the ratios of low-valued shipments to individual country totals for past periods. Export statistics are compiled on shipments valued over \$2,500. Exports valued under \$2,501 are estimated under the same procedure as applied to imports.

Special Transactions: Special transactions include such items as U.S. goods returned after being exported and items imported for repair.

F.A.S. Value: Exports are valued on a "free alongside ship" basis, which reflects transaction price including inland freight, insurance and other charges incurred in placing the merchandise alongside the carrier at the U.S. port of exportation.

Reexports: Reexports are exports of foreign merchandise. They consist of commodities of foreign origin that have entered the United States for consumption or into Customs bonded warehouses or U.S. Foreign Trade Zones, and which, at the time of exportation, are in substantially the same condition as when imported.

Inquiries related to these data may be directed to Bureau of the Census, Foreign Trade Division, Special Projects Branch, Washington, D.C. 20233. Contact name: Michael Risha (301) 457-3629.
