New Changes and Enhancements:

- The Shipment Manager now shows the user who created or last took action on each filing, not just the original user who created the filing under the 'Last Updated By' column.
- All the activity for a specific Shipment Reference Number (SRN) is shown through a new *History View (Count)* feature on the Shipment Manager.
- The design and functionality of the commodity line is now enhanced with the ability to enter required Participating Government Agencies Permit data.

View an in-depth overview of these changes and enhancements on our ACE AESDirect Resources page located on our web site:
