REPORT  
OF  
THE SUPERINTENDENT OF CENSUS.

---

DEPARTMENT OF THE INTERIOR,  
CENSUS OFFICE,  
*Washington, D. C., November 1, 1881.*

SIR: I have the honor to present the annual report of the operations of this bureau. The last annual report bore date the 1st of December, 1880. In the interval the field-work of the census has been completed in all the departments, except those relating to the statistics of ship-building, to the production of petroleum, the quarrying industry, and to the population, resources, etc., of Alaska. Owing to the difficulty of securing the proper agents, the field-work in these departments was not begun until long after the others were in full operation, and the completion of the work has consequently been delayed. Only a few weeks of field-work, however, now remain to be performed by the six agents still employed in these departments.

The year has also witnessed the rapid progress of the tabulations and compilations required to reduce the raw material of the enumeration into statistical form.

It is perhaps not generally understood that nearly as many days' labor are required to complete the tabulations and compilations at the central office as are needed to perform the entire work of enumeration in the field. An efficient enumerator can, in a city, or even in a well-settled rural district, take down, upon a page of his schedules, the names of fifty persons living in ten families, with all the particulars required by law to be collected, in a shorter time than the same man could distribute those fifty names according to the various classes of facts taken for compilation, viz, by age, by sex, by color, by place of birth, by occupation, by the places of birth of parents, by illiteracy, by conjugal condition, etc., and make all the various combinations thereof which go to form the tables usually published in the census reports.

The work of tabulation and compilation has been pressed forward with great rapidity, from the fact that the Superintendent felt that it was of the highest consequence to secure an early publication of the results of the census. In the last annual report of the bureau the number of persons employed on the 1st of December, 1880, was stated as 1,084. The maximum of clerical force was reached on the 15th of March, 1881, when the number of employés of all grades was 1,495.

The co-operation of so large a clerical force has allowed a very rapid progress in the compilation and tabulation of results. Five-sixths, at least, of the clerical labor of the census has already been accomplished. The results of the compilations are now being put into the form of tables for publication.

The following statement gives the population of the several States and Territories, as finally determined. The total differs by 2,917 from that contained in the report of this office under date of January 7, 1881. This, however, is but the net result of individual changes, amounting to many times that number, due to the exclusion of persons twice returned in the census (as, for instance, once at their homes, and again in asylums, prisons; almshouses, etc.), and to the supplying of the names, in even greater number, of persons ascertained to have been omitted from the enumeration.

*Population of the United States, according to the Census of 1880.*

In the appendix to this report will be found tables exhibiting the distribution of Representatives in Congress, according to the Tenth Census, upon the plan heretofore pursued in determining the number to which each State has become entitled.

A second series of tables exhibits the distribution of Representatives

according to the scheme proposed by Col. C. W. Seaton, the chief clerk of the bureau, who has been nominated to the Senate and by that body confirmed as my successor in office. Colonel Seaton deems the method he has taken for determining the number of Representatives to which each State has become entitled more equitable than that heretofore employed, and in that opinion I concur.

During the first half of 1881, the suspension of the work of compilation in this office was threatened by a very serious obstacle, namely, the failure of the appropriation for the service.

When, on the 5th of January last, this office recommended an additional appropriation of \$500,000, to complete the work of the census, it was done in perfectly good faith, in the belief that the sum named would be adequate to that end. At that time, however, a very large part of the field-work in the departments of mining, manufactures, and social statistics, still remained to be done. The cost of completing that service has been found to be heavier than was at the time anticipated. Moreover, the tabulations which had been undertaken in the central office, upon a scale far exceeding that of any preceding census, proved to be more laborious and expensive than was expected. Another source of expense beyond the estimates of the Superintendent, and one perhaps as important as either of the two just indicated, has been found in the occasions, which have developed in the course of our investigations, for securing accuracy and completeness in the statistical material brought into the office by the enumeration, beyond the degree heretofore attempted in a census of the United States.

When I had the honor to submit the several reports of the Ninth Census I felt compelled, in simple truthfulness, to say, in respect to not a few of the tables comprised in the three volumes, that the statistics contained were, to a great extent, incomplete and defective, and that in some cases the material gathered by the enumeration was so far deficient or inaccurate that it would be more creditable not to publish the tables at all, did the Superintendent feel at liberty to suppress them. Remarks of this character will be found scattered throughout the volumes of the Ninth Census.

During the years that have intervened, the investigations and studies of the Superintendent have deepened his conviction of the inadequacy and inaccuracy of many classes of statistics as gathered at previous enumerations under the act of May 23, 1850.

It is doubtful, for instance, whether any of the three censuses taken under that law has obtained one-half of our mineral product, or has compassed two-thirds of the total number of the defective, dependent, and delinquent classes (the deaf and dumb, blind, insane, idiotic, paupers, and criminals), who have by law been made the subjects of a special enumeration.

In regard to still other large classes of statistics, the percentage of omission or error has not been equally great; but in all departments of investigation, concerning alike agriculture, manufactures, and the mining interests of the country, as well as education, public charities, the wages of labor, and other departments of social inquiry, the statistics of the United States census have failed to possess that validity and authority which were to be desired, by reason of manifest or suspected error. Much was done to improve the character of all classes of statistics to be recorded in the census, through the enactment of the enlightened law of March 3, 1879. Greatly widened as the scope of the census was by that enactment, I venture to assert that the improvement in the quality of the statistical material gathered is even more marked than the extension in amount; yet, notwithstanding the higher

value of the material brought into the central office through the new agencies provided by the act of 1879, opportunities for revision and correction have frequently presented themselves in the course of the examination and tabulation of that material. Of such opportunities the Superintendent has not been able to refrain from availing himself, whenever the cost was not disproportionate to the value of results. Instead of publishing table after table, as he was obliged to do in 1870, branded as fragmentary and incomplete, if not altogether inaccurate and misleading, the Superintendent has desired, and with great gratification he is able to announce that he believes it wholly practicable, to bring every class of facts which have been embraced in the publication of previous censuses up to the standard of absolute or approximate accuracy, so that no class of statistics shall be put forth at the Tenth Census which are not sound and reliable. This, however, has involved the expenditure of no little time and labor in many departments. For example, in the department relating to the defective, dependent, and delinquent classes, three times as much clerical labor has been expended upon the returns prior to taking them up for compilation as was expended in this department, in all, up to the point of publication in the census report of 1870. The Superintendent is confident that the results will fully justify the effort put forth.

From the causes indicated, viz: first, the unexpected cost of completing the field-work in the departments of mining, manufacture, and social statistics; second, the weight of the new compilations and tabulations undertaken, for the first time, at this office, greatly exceeding the Superintendent's estimate; and third, the labor involved in bringing the statistical material of the census up to a higher point of completeness and accuracy, the expenditures of this office were so enhanced that it became manifest, during the month of May, that the appropriation would not be sufficient to complete the service.

In this emergency two courses were open: first, to disband the office force, retaining only a small number of clerks to prepare for publication whatever statistical matter had already been compiled, and, for the rest, to await the action of Congress upon the recommendation of a new appropriation when it should meet in the December following; or, second, to accept the service of volunteers, upon the condition of their expressly disavowing any claim against the government being created by their services, and with their aid to carry forward the compilations of the census as rapidly as possible towards completion.

Respecting this alternative, the Superintendent conferred with the honorable the Secretary of the Interior and with the honorable the Attorney-General, who concurred in the opinion that it would be exceedingly unfortunate to disband the office force and discontinue, for eight or ten months, the work of tabulation and compilation; and that, if a sufficient number of the employés of the Census Office should be found disposed to volunteer their services, upon the condition indicated, no legal or political objection interposed. As the result of this conference the following letter was addressed to the honorable the Secretary of the Interior, viz:

DEPARTMENT OF THE INTERIOR,  
CENSUS OFFICE,  
Washington, D. C., May 27, 1881.

Hon. ALONZO BELL,  
*Acting Secretary of the Interior:*

SIR: I have the honor to ask your attention to the following considerations and to a suggestion based thereon.

By an error of calculation, for which I am alone responsible, the estimate for the appropriations required for carrying on and completing the work of the Tenth Cen-

sus were framed, as the result proves, too low. The vast extent and complexity of the investigations undertaken by this office have caused a more rapid exhaustion of the amount appropriated for this service than was contemplated, and I find myself now in a position of being obliged to suspend the work upon considerable portions of the field until the next session of Congress, unless some exceptional arrangement can be made which will allow the continuance of my present office force.

Such a suspension would be a matter of regret on two accounts: first, because the public interest in the results of the enumeration makes the earliest possible completion of the tabulations and compilations of the office a matter greatly to be desired; and secondly, because such a suspension would involve the disbanding of a clerical force which I sincerely believe is not surpassed in efficiency through all the departments of the government. To disband the force and to recruit another, at a later date, should Congress make appropriation of additional funds for carrying on the service, would of itself involve a certain loss of efficiency.

Fully appreciating the fact that no contract, express or implied, can lawfully be made with any person for services or supplies on behalf of the government in anticipation of an appropriation therefor, I venture to suggest whether it might yet not be consistent with the provisions of law, as well as decidedly for the interest of the public service, to accept as volunteers in completing the work of the census during the coming season such of the members of the present office force as are willing to continue in the office under a complete disclaimer of any claim thereby to be created against the government, and with a formal profession of their willingness to submit the question of their compensation to the decision of Congress, without any alleged obligation to make appropriations on such account.

I am satisfied that at least two-thirds of my present force would esteem it a privilege to be permitted to continue work upon these terms, while the result to the government would be that, at the meeting of Congress in December, it would find the tabulations of the census completely finished, and a considerable portion of the statistical tables in type, ready for distribution.

If this suggestion is deemed practicable, I should be greatly pleased to give effect thereto on being duly authorized, and I pledge myself to use my utmost energy to finish the work with the least possible expenditure of clerical labor.

I have the honor to be, very respectfully,

FRANCIS A. WALKER,  
*Superintendent of Census.*

To this communication the following reply was received, viz:

DEPARTMENT OF THE INTERIOR,  
*Washington, June 3, 1881.*

General F. A. WALKER,  
*Superintendent Tenth Census:*

Sir: I have fully considered your letter of May 27, in relation to the condition of the appropriation for the Tenth Census and the necessity of a suspension of important work unless some exceptional arrangement can be made which will allow the continuance of your present office force. Your suggestions in relation to the acceptance of a volunteer force (provided such can be secured, willing to disclaim all claims against the government on account of services rendered) are fully concurred in by me.

The postponement of the important work upon which you are engaged, on account of a lack of clerical force, would work serious inconvenience and loss to the public interests, and while it should be clearly understood that the government has no legal right to make any contract, express or implied, that shall bind it in anticipation of appropriations, you are authorized to say to all who desire to serve without pay, and with an express disclaimer in relation thereto, that all of the facts necessary to a full understanding of the case will be laid before Congress at the earliest practicable moment.

Very respectfully, &c.,

A. BELL,  
*Acting Secretary.*

Acting under the authority given in the above letter,\* an average

\*The following has been the form used in notifying clerks and other employes of the acceptance of their services as volunteers, viz:

DEPARTMENT OF THE INTERIOR,  
*Washington, D. C., June 22, 1881.*

Sir: Your resignation as a clerk of class — in the Census Office has been received, and is hereby accepted to take effect on the 15th instant.

In compliance with the request contained in your letter of resignation, you will be

force of seven hundred assistants has been retained from the 15th of June to the present time. Not only has no falling off in efficiency been manifested by the clerical force as a consequence of the peculiar and regrettable condition of service, but the average amount of work done in every division of the office has steadily improved.

The work in every department has made rapid progress, and it is my confident expectation that by the time Congress meets the compilation of the Tenth Census will be substantially completed.

A comparatively small force will further be required to reduce the statistical matter to tabular form and to prepare it for the printer; but it is safe to say that at least eight months have been saved, in the publication of the final results of the census, by keeping the clerical force at work during the summer, as compared with what would have taken place had the office been disbanded, and subsequently organized a second time after the meeting of Congress.

While I have spoken thus in regard to the increase in the cost of the Tenth Census above my estimates and calculations, it should not be understood that the census so taken has been expensive, as compared with any preceding enumeration, reasonable allowance being made for the increase of population and other elements of expense.

The Ninth Census cost three millions and a third (\$3,336,000). Our population has, in the interval, increased 30 per cent., and other elements of the cost of a census have increased at least proportionally.

An increase of 30 per cent. upon three millions and a third would amount to four millions and a third. By the twentieth section of the act of March 3, 1879, Congress provided only three millions for the expenses of the Tenth Census, *exclusive of printing and engraving*, being a million and a third below its proportional cost, as compared with the census preceding. By the act of March 3, 1881, \$500,000 additional were appropriated, making the total appropriation for the purposes of the act of 1879 three millions and a half, or \$836,000 below the proportional cost of the Ninth Census. This is all that has thus far been appropriated for this service, exclusive of the amount provided for printing and engraving (\$250,000), and of the amount appropriated (\$210,000) to meet the expenses involved in carrying out the provisions of the sixth section of the act of April 20, 1880, which act required of the enumerators services altogether additional to those prescribed by the act of 1879. Should, therefore, an additional \$540,000 be appropriated for this service, according to the recommendation hereafter to be made, the expense of the Tenth Census, according to the scheme of the act of March 3, 1879, would still be considerably below that of the census of 1870. But such a comparison would not be fair without reference to the vastly wider range of the present census, the minuter and more extensive compilations undertaken, and the improvement in the quality of the results obtained.

The census has, for the first time, collected the statistics of railroads and telegraphs; of fire, marine, and life insurance; while, in the departments of agriculture and manufactures, the information obtained has been at least double, in mere matter of bulk, what has heretofore been obtained.

permitted to continue at work for such time as in the judgment of the Superintendent may seem proper, upon the conditions indicated in your said letter, viz: That the services to be rendered by you shall create no claim against the United States, either expressed or implied.

Very respectfully,

A. BELL,  
Acting Secretary.

In the inquiries respecting taxation and public debts, the investigations of the census have been extended to embrace an amount of detail which exists in regard to the public indebtedness of no other country of the world. In the great field of our mining and fishing industries, the worse than worthless statistics of 1850, 1860, and 1870 will be found replaced by a body of economical, social, and technical information respecting these great and growing interests which will be of incalculable value to the country. There is not one direction in which the published results of the present census will not cover more ground, divided into greater detail, than any preceding, while the character of the results will testify to a more rigid examination and a more careful revision of the results of the enumeration.

Out of a total appropriation of \$3,960,000 (inclusive of the appropriation of \$250,000 for printing and engraving, and of \$210,000 for the purposes of the act of April 20, 1880), \$3,860,068 67 have been expended, leaving a balance of \$2,120 50 on the general appropriation (all in the hands of the disbursing officers of the mining and fishery investigations), and of \$97,810 83 on the appropriation for printing and engraving. The accompanying table shows the various objects of expenditure, classified under certain general heads.

It appears from this exhibit that \$2,094,947 95\* have been paid to enumerators and interpreters, \$133,457 54 to supervisors of census, while certain re-enumerations, under the orders of the Secretary of the Interior, have cost \$8,099 67.

The enumeration of the manufacturing statistics of cities, conducted by 345 special agents, cost \$87,085 37. The collection of the statistics of mining industries, including both the precious and the non-precious metals, both east and west of the Mississippi river, have cost \$149,897 23, while the collection of the statistics of the fisheries has cost \$45,329 19, and other investigations by special agents, smaller sums. The expenses of the central office at Washington have aggregated \$1,063,468 48, of which \$817,359 40 has been expended as compensation for clerks and other employes.

---

\* Tables F and G in the appendix of this report exhibit the rates of per diem payments to enumerators in the several supervisors' districts.

The volunteer service thus far (to November 1, 1881) rendered, under the arrangements hereinbefore detailed, would, if paid for according to the rates of compensation received prior to June 15, 1881, by the several individuals rendering such service, amount to \$243,640 92. This statement includes both the clerical force at Washington, and the experts and special agents engaged upon field-work, or in the preparation of their reports outside of Washington.

I regret to have to add that, beyond the service thus rendered under an express disavowal of any claim being created against the United States thereby, a small body of liabilities has unavoidably been created in bringing the work of the census to a conclusion. As soon as I apprehended the danger of a deficiency I whistled down brakes, and tried to stop the train before it reached the draw; but a service so gigantic, moving so rapidly, has a momentum which it is not always possible to calculate with nice accuracy, and in spite of every effort to escape an actual deficiency (aside from the personal volunteer service heretofore referred to), the office found itself subject to certain calls for which no funds were provided. These were of three classes:

First. The rent of the Main Census Building since the 1st of July, 1881, being at the rate of \$1,083 33 $\frac{1}{4}$  per month. The lessors have expressed their entire willingness to await the action of Congress.

Second. Certain amounts from subsidized railroads for transportation of officers and agents of the census, amounting to \$3,642 48. Even had sufficient funds been available for the payment, these accounts for transportation could not, up to this time, have been paid, inasmuch as the railroads concerned are delinquent in respect to the repayment of certain sums extorted as regular fare from the agents of the Census Office traveling under instructions, and presenting duly authenticated orders for transportation at government rates.

Third. Certain miscellaneous expenses for traveling, for supplies and for minor services, in respect to which no arrangement could properly be made for postponing payment. Being unwilling that the persons entitled to these sums, generally in small amounts, should be required to await the action of Congress, upon their just and proper claims, I addressed a letter to the honorable the Secretary of the Interior in the following terms, viz:

DEPARTMENT OF THE INTERIOR,  
CENSUS OFFICE,  
Washington, D. C., October 3, 1881.

Hon. S. J. KIRKWOOD,  
*Secretary of the Interior :*

SIR: I have the honor to state that upon ascertaining, in May last, that the appropriation of the Tenth Census would necessarily prove inadequate to the needs of the service, I shut down as quickly and peremptorily as possible upon all sources of expense.

With a service so vast, however, and so widely spread, with between thirteen and fourteen hundred employes in the Washington office, and with several hundred special agents scattered over the country, all the way from Arizona to Alaska, it was not possible to estimate closely the total of unadjusted accounts, while there were some points at which expenditure could not be abruptly terminated (for instance, as by recalling an agent from a distant field already nearly canvassed) without a great loss to the service, amounting to the practical abandonment of what had been done in that field.

I regret to say that, in consequence of the accounts for obligations incurred at the date mentioned proving larger than was anticipated, and of the seemingly imperative necessity of keeping up some small disbursements in several directions for the reason just indicated, there will be required to carry this office through to the meeting of Congress, several thousands of dollars; it may be three, it may be five thousand.

As no appropriation is available for this purpose, and as it would not be creditable

to allow these accounts to remain unpaid, I respectfully propose to the department that it give its sanction to my depositing with the disbursing agent of the department a sum of money, out of my own private resources, sufficient to meet the charges referred to, all accounts to be approved as usual by the Secretary of the Interior, and ordered for payment in the accustomed form.

Should Congress consent to make appropriation for the uncompleted work of the census, I can be reimbursed; if not, the loss will be my own—a loss I would rather submit to than have those who have rendered service to the government, or incurred expenditures on its behalf, suffer for my error in calculating the probable needs of the service.

Very respectfully,

F. A. WALKER,  
*Superintendent of Census.*

To this letter a reply was received from the department as follows, viz:

DEPARTMENT OF THE INTERIOR,  
*Washington, D. C., October 4, 1881.*

General FRANCIS A. WALKER,  
*Superintendent of the Census:*

SIR: I have the honor to acknowledge the receipt of your communication of the 3d instant, relative to the exhaustion of the appropriation for the expenses of the Tenth Census, and requesting my sanction to your depositing a certain amount of money, from your private means, in the hands of the disbursing clerk of this department to meet certain obligations already incurred, etc.

In consideration of the fact that it is difficult to estimate closely for the expenditures under this head, and that to abruptly terminate all disbursements would necessarily cause great loss to the service, I hereby sanction the proposition you make for meeting these obligations from your own private funds, to be done through the disbursing clerk or in any other way you may desire. In doing this, however, you will understand that I assume no responsibility in the matter, and that such vouchers as you may pay cannot be considered as constituting any claim against the government, and any risk that may be incurred as to your repayment must be assumed by you, pending the future action of Congress in the matter.

Should you do this, it should be officially communicated to Congress at its next session.

Very respectfully,

S. J. KIRKWOOD,  
*Secretary.*

Under the foregoing arrangement \$4,889 97 have been paid out of my own private funds in liquidation of these accounts, which are all adjusted to date. Seven or eight hundred dollars more will probably be required to be paid in the same manner, prior to the meeting of Congress, of which a full account will be rendered. Should it please Congress to make an appropriation to cover the amounts so expended, I shall be glad to be reimbursed for expenditures made in good faith, and for the public interest. If not, I shall accept the decision of that body, and regard the amount so expended as my personal contribution to the success of a great public work.

At the present date the following reports have been prepared, and are all, or nearly all, in the hands of the Public Printer:

First. The report on population, by the Superintendent, assisted by <sup>Public</sup> Mr. Henry Gannett, comprising the statistics of population by States, counties, and minor civil divisions, with distinction of white and colored, foreign and native, male and female. This volume will be illustrated by about seventy-five quarto pages of maps and charts, all of which are now in the hands of the engraver.

Second. From the department of fisheries (Prof. G. Browne Goode,

chief special agent) reports on the oyster-industry, by Mr. Ernest Ingersoll; on the whale-fishery, by Messrs. James Temple Browne and A. Howard Clark; on the river fisheries of the United States, by Mr. C. W. Smiley; on the seal fisheries of Alaska, by Mr. H. W. Elliot. All the reports in this department, as in that next to be mentioned, will be fully illustrated by maps, charts, and diagrams already in the hands of the engraver.

Third. From the department of power and machinery used in manufactures (Prof. W. P. Trowbridge, chief special agent) reports on the manufactures of interchangeable mechanism, by Mr. C. H. Fitch; on the water-supply of cities, by the chief special agent and Mr. Walter G. Elliott; on milling and the flouring industry, by Mr. Joseph W. K. Nefel; on the water-power of the Southern Atlantic coast, by Mr. Geo. F. Swain; on the water-power of the Northwest, by Mr. James L. Greenleaf; on the water-power of the Missouri River Basin, by Mr. Dwight Porter; on steam-pumps and pumping-engines, by Mr. F. R. Hutton; on shop-tools, also by Mr. Hutton.

Fourth. A report on the production of cereals in the United States, by Prof. W. H. Brewer.

Fifth. A report on the newspaper press, by Mr. S. N. D. North.

Sixth. A report on the manufacture of iron and steel, by Mr. James M. Swank.

Seventh. A report on the manufacture of silk goods, by Mr. Wm. C. Wyckoff.

Eighth. From the department of wealth, debt, and taxation a report on the public debts of the United States, comprising the statistics of State, county, city, town, village, and school-district indebtedness, together with a history of the debts of the several States, by the chief special agent, Mr. Robert P. Porter, and a full statistical account of the debt of the United States, by Mr. Rafael A. Bayley.

Ninth. From the department of meat production reports on the cattle and sheep industry of California, Oregon, Texas, Nevada, Washington Territory, and Idaho, by Mr. Clarence Gordon, chief special agent. These reports are illustrated with maps showing the range of cattle and sheep occupation.

Tenth. From the department dealing with the social statistics of cities, reports on the cities of New Orleans and Austin.

Eleventh. A report on the tobacco culture of the United States, by Mr. J. B. Killebrew.

Twelfth. A report on the production of the precious metals during the census year 1879-'80, by the Hon. Clarence King, chief special agent.

The work of the printing office and of the engraver is so far advanced as to justify the anticipation that all, or nearly all, of these reports will be printed and laid upon the desks of members when Congress shall assemble in December, or within a few days thereafter.

In view of the exhaustion of the appropriation for this service, as cited, I respectfully recommend that the further sum of \$540,000 be appropriated for the compensation of those who have rendered services as volunteers, as hereinbefore stated, and for the completion of the Tenth Census. Of this sum about \$330,000 would be applied to the payment of the volunteer force of the office, down, say, to the 15th of December, and to the liquidation of the three classes of obligations referred to. The balance would be sufficient to complete all the compilations and

tabulations remaining to be effected in order to secure the fullest statement and publication of the results of the enumeration.

I have the honor to be, very respectfully, your obedient servant,  
FRANCIS A. WALKER,  
*Superintendent of Census.*

Hon. S. J. KIRKWOOD,  
*Secretary of the Interior.*

DEPARTMENT OF THE INTERIOR, CENSUS OFFICE,  
*Washington, D. C., October 25, 1881.*

SIR: In compliance with your verbal request, I have caused to be computed and hand you herewith tables which exhibit the apportionment of Representatives among the several States, according to their respective populations as ascertained at the Tenth Census, upon certain successive assumptions as to the total number of Representatives.

The present tables differ from those contained in your letter of January 17, 1881, addressed to the Hon. S. S. Cox, chairman of the Committee on the Census, House of Representatives, in that they are based upon the population as now finally determined, and in that the calculations have been made upon assumptions as to the total number of Representatives ranging from 275 to 350, both inclusive, the range in the original tables having been from 293 to 325.

While making these calculations, I met with the so-called "Alabama paradox", where Alabama was allotted 8 Representatives out of a total of 299, receiving but 7 when the total became 300.

Such a result as this is to me conclusive proof that the process employed in obtaining it is defective, and that it does not in fact "apportion Representatives among the several States according to their respective numbers".

This conclusion has been confirmed by the discovery of other anomalies, and the result of my study of this question is the strong conviction that an entirely different process should be employed.

That heretofore used is the following:

The total representative population of the country is divided by the proposed total number of Representatives. The quotient obtained is "the ratio of Representatives to population," or, in better phrase for our present purpose, it is the number of inhabitants which would fall to each Congressional district, were it possible to divide the whole country into districts exactly equal in population. This number may, for convenience in the discussion, be termed the *modulus*.

This modulus is then applied as a divisor to the populations of the several States. The entire quotient thus obtained for each State, after rejecting the fraction, is evidently the minimum number of Representatives which can be assigned to such State (except in the case of a State having a population less than the modulus, each State being entitled to at least one Representative).

Making a preliminary allotment of minimums in this manner, the sum of the numbers so allotted will be less than the number of Representatives originally taken.

The difference must now be made up by increasing the allotment to certain States. It will result from such assignment, of course, that the average number of inhabitants to each Representative in the State to which additional Representatives are allotted will be less than the modulus, and that one or more of the districts formed in such State shall have less than their full quota. It is the mode of determining to which of the States the additional Representatives shall be assigned which I believe to be erroneous, and it is at this point that the variance between the process heretofore employed and the one which I now propose begins. (For the sake of convenience the two processes will hereafter be characterized respectively as the old and the new method.)

The old method compares the remainders left after the divisions above described, and assigns an additional Representative, first, to that State where the remainder after division was greatest; next, to the State where the remainder was next in size; and so on in order of rank of the remainders until the difference is made up. It is my opinion that it is not these remainders but rather the quotients which result from dividing the populations of the States by the increased number of Representatives, which should govern the allotment, and that the additional Representatives should be so assigned that the population of the districts formed in the State to which additional Representatives are allotted shall fall as little below the average number for the United States as possible; in other words, that the districts ultimately formed from the States so increased shall approximate as closely as possible in population to

that of a district which should be formed by dividing the total population of the United States exactly by the proposed total number of Representatives. If it were true that districts each containing a population exactly equal to the ratio of Representatives to population for the United States must first be carved out of each State, and that enough districts to fill the quota were afterward to be made from the fragments left, then the old method of allotment would no doubt be the proper one. In that case the largest remaining fragments would necessarily receive the additional Representatives. But the practice and, so far as I know, the law has uniformly aimed to divide the States finally, after the number of Representatives for each State has been determined, in such manner that in each State the districts shall be as nearly equal to each other in population as possible.

Having, therefore, as before, made the preliminary allotment of minimums and ascertained the number of Representatives which must still be assigned, I would then determine, by trial, under what additional distribution the number of inhabitants per Representative in the States whose representation is increased would fall least below the ratio, and distribute accordingly.

Tables C and D subjoined, enable us to decide these questions readily in the apportionment of any total number of Representatives up to 350.

Table C contains under each State the successive quotients which arise from dividing the population of the State by successive numbers from one up to the highest final number of Representatives which the State can possibly receive when 350 is the total number apportioned; that is to say, it is the number of inhabitants per Representative under each possible allotment of Representatives to that State until we exceed 350 Representatives to the United States.

In Table D these results are rearranged as follows: After setting down in the beginning the numbers where one Representative only is given to each State, the remaining results are set down in order of their value, beginning with the greater.

Let us now, for illustration, make the apportionment of 293 Representatives.

We divide the population of the United States by 293. The result is 168,503. Divide the population of each State by 168,503; the result for Alabama is 7, with a remainder. We give 7 Representatives to Alabama as a minimum; the result for Arkansas is four, which is the minimum number for that State, and so on with the other States. The population of two States, viz, Delaware and Nevada, is not divisible by 168,503. Give, nevertheless, 1 Representative to each. No State can have less than one Representative.

This completes the allotment of minimums, and, so far, 273 Representatives have been awarded, as follows:

|                     |    |                      |    |
|---------------------|----|----------------------|----|
| Alabama .....       | 7  | Mississippi .....    | 6  |
| Arkansas .....      | 4  | Missouri .....       | 12 |
| California .....    | 5  | Nebraska .....       | 2  |
| Colorado .....      | 1  | Nevada .....         | 1  |
| Connecticut .....   | 3  | New Hampshire .....  | 2  |
| Delaware .....      | 1  | New Jersey .....     | 6  |
| Florida .....       | 1  | New York .....       | 30 |
| Georgia .....       | 9  | North Carolina ..... | 8  |
| Illinois .....      | 18 | Ohio .....           | 18 |
| Indiana .....       | 11 | Oregon .....         | 1  |
| Iowa .....          | 9  | Pennsylvania .....   | 25 |
| Kansas .....        | 5  | Rhode Island .....   | 1  |
| Kentucky .....      | 9  | South Carolina ..... | 5  |
| Louisiana .....     | 5  | Tennessee .....      | 9  |
| Maine .....         | 3  | Texas .....          | 9  |
| Maryland .....      | 5  | Vermont .....        | 1  |
| Massachusetts ..... | 10 | Virginia .....       | 8  |
| Michigan .....      | 9  | West Virginia .....  | 3  |
| Minnesota .....     | 4  | Wisconsin .....      | 7  |

To fill the quota to the number proposed, twenty additional Representatives must be allotted. What State is best entitled to an increase? Consulting Table D, we find that the number next less than 168,503, which is therein set down, is 168,319, corresponding to 19 Representatives for Ohio. Ohio, consequently, is entitled to receive an additional Representative.

Next in turn comes Virginia, which at 9 Representatives would have 168,062 inhabitants per Representative. Then follows Missouri, with 13 Representatives at 166,798 inhabitants each, and so on.

If, then, we assign an additional Representative to the twenty States named in Table D, in downward order, beginning with the 274th item, Ohio, 19 Representatives, and ending with the 293d item, Ohio, 20 Representatives, with 159,903 inhabitants per Rep-

representative, we shall have increased the representation in such manner that the resulting districts will have populations falling as little below the United States ratio, or modulus, as possible.

Comparing these results with those under the old method, we find that for 15 States the assignments of additional Representatives are identical under both methods, while the additional allotments made to 5 States under the new method are withheld under the old method and awarded to five others. These varying results are shown in the following table:

| States whose representation is increased under the new method and not under the old. (293 total Representatives.) | Representatives, after increase. | Inhabitants per Representative, after increase. |
|---|----------------------------------|---|
| Pennsylvania .....  | 26                               | 164, 726  |
| New York .....  | 31                               | 163, 963  |
| Massachusetts .....   | 11                               | 162, 998  |
| Illinois .....  | 19                               | 161, 993  |
| Ohio .....  | 20                               | 159, 903  |
| States whose representation is increased under the old method and not under the new. (293 total Representatives.) | Representatives, after increase. | Inhabitants per Representative, after increase. |
| Minnesota .....   | 6                                | 153, 154  |
| Connecticut .....   | 4                                | 155, 075  |
| West Virginia .....   | 4                                | 154, 614  |
| Nebraska .....  | 3                                | 150, 800  |
| Rhode Island .....  | 2                                | 138, 265  |

Table E subjoined exhibits in comparison the numbers of Representatives which would be assigned to the several States by the two methods under successive assumptions as to total representation, ranging from 275 to 350, both inclusive.

Very respectfully, your obedient servant,

C. W. SEATON,  
Chief Clerk.

General F. A. WALKER,  
Superintendent of Census.

2 S C

REPORT OF THE SUPERINTENDENT OF CENSUS.

TABLE A.—Population, ratios, fractions, and members of Congress for each State, on total number of members, from 275 to 350, inclusive.

| States.              | Population. | No. of Repr.: 275.                       |                     |                         | No. of Repr.: 276.                       |                     |                         | No. of Repr.: 277.                       |                     |                         |
|----------------------|-------------|--|---------------------|-------------------------|--|---------------------|-------------------------|--|---------------------|-------------------------|
|                      |             | Ratio, 1 : 179,532.                      |                     |                         | Ratio, 1 : 178,882.                      |                     |                         | Ratio, 1 : 178,236.                      |                     |                         |
|                      |             | No. of Representatives on even division. | Fraction resulting. | Final No. of Represent. | No. of Representatives on even division. | Fraction resulting. | Final No. of Represent. | No. of Representatives on even division. | Fraction resulting. | Final No. of Represent. |
| Total .....          | 40,371,340  | 257                                      | 3,231,616           | 275                     | 257                                      | 3,398,066           | 276                     | 259                                      | 3,208,216           | 277                     |
| Alabama .....        | 1,292,505   | 7  | 5,781               | 7                       | 7  | 10,331              | 7                       | 7  | 14,853              | 7                       |
| Arkansas .....       | 802,525     | 4  | 84,907              | 4                       | 4  | 86,907              | 4                       | 4  | 80,581              | 4                       |
| California .....     | 864,604     | 4  | 146,566             | 5                       | 4  | 149,166             | 4                       | 4  | 151,750             | 5                       |
