ARIZONA.

CHAPTER 1.—NUMBER OF INHABITANTS.

Introduction.—This chapter gives the population of Arizona, by counties and minor civil divisions, as enumerated at the Thirteenth Census, taken as of April 15, 1910, with comparative statements of population where possible, and a statement and discussion for the state as a whole of the population living in urban and in rural territory. The statistics are given in detail in two general tables.

Table 1 (p. 71) shows the population of Arizona in 1910, distributed according to counties and minor civil divisions, and, so far as possible, in comparison with similar figures for 1900 and 1890. The arrangement of counties and of the primary divisions in each county is alphabetical, except in the few counties in which some or all of the primary divisions are numbered. The figures for secondary divisions are printed in italics. The changes in boundaries or form of organization that have taken place since 1900 are indicated in the footnotes to the table. For changes between 1890 and 1900 reference must be made to the census report of 1900.

The population of the territory in 1910 was returned by election precincts and other minor civil divisions; in 1900 and 1890 it was not returned by election precincts. For this reason it is possible to present comparable figures for only the cities, towns, and Indian reservations which were returned separately at one or both of the previous censuses.

Table 2 (p. 73) shows the cities and incorporated towns in Arizona, alphabetically arranged, with their population in 1910, 1900, and 1890.

The population of Arizona, by counties, at each of the last five censuses, from 1870 to 1910, inclusive; the increase during the last two decades; the density of the total and the rural population at the census of 1910; and the distribution of the population at the last two censuses according to urban and rural districts, are given in Table I of Chapter 2.

The tables and text of the present chapter contain few technical expressions whose meaning is not appar-

HISTORICAL NOTE.—The name Arizona is of Spanish-Indian origin and is variously stated to signify "small or few springs," "little creek," and "silver bearing."

The first recorded exploration of the region now constituting Arizona was made in 1539 by the Spaniard, Marcos de Niza, who was sent out from Mexico to confirm the rumors of great wealth which de Vaca had heard of in his wanderings. In 1540 Coronado traversed the region in his journey northward. The earliest settlements were made by Spanish missionaries toward the close of the seventeenth century.

This region formed a part of Mexico, which was under the dominion of Spain until by the Mexican Revolution of 1821 it achieved its independence. In February, 1848, at the close of the Mexican War, Mexico ceded to the United States her claims to territory north of the Rio Grande and Gila River and extending westward to the Pacific Ocean, and in December, 1853, by the Gadsden purchase, the United States acquired from Mexico a strip of territory bounded on the north principally by the Gila River and on the south by the present Mexican line.

92399°—13—5

ent. The census usage in regard to certain terms is, however, explained below:

Density of population.—The density of population of a state or county is obtained by dividing its total population by the number of square miles in its land area. In calculating the density of rural population, the same divisor is used as it is not practicable to ascertain and deduct the exact area covered by the urban districts, and even if this could be done with accuracy the deduction of this area from the total land area would ordinarily make no appreciable difference in the resulting quotient.

Minor civil divisions.—The counties are divided generally into smaller political units which bear different designations in the different parts of the country, such as towns, townships, election precincts, school districts, etc. Of these minor civil divisions those which rank next to the county as geographic areas are termed primary divisions. In many instances, however, these primary divisions contain political units of still smaller area, such as incorporated villages or boroughs. These smaller political units are referred to as secondary divisions.

Urban and rural population defined.—The Census Bureau, for purposes of discussion, has defined urban population as that residing in cities and other incorporated places of 2,500 inhabitants or more, and rural population as that residing outside of such incorporated places.

The comparisons of the urban and rural population in 1910 with that at earlier enumerations may be made either with respect to the varying proportions of the two classes at successive enumerations or with respect to the increase between enumerations. In order to contrast the proportion of the total population living in urban or rural territory at the census of 1910 with the proportion urban or rural at the preceding census, it is necessary to classify the territory according to the conditions as they existed at each census. In this comparison a place having less than 2,500 inhabitants in 1900 and over 2,500 in 1910 is classed with the rural population for 1900 and with the urban for 1910. On the other hand, in order to present fairly the contrast between urban and rural communities, as regards their rate of growth, it is necessary to consider the changes in population for the same territory which have occurred from one decennial census to another. For this purpose the territory which in 1910 was urban or rural, as the case may be, is taken as the basis, and the population in 1900 for the same territory (so far as separately reported at that census) is presented, even though part of the territory may, on the basis of its population at the earlier census, have then been in a different class. This avoids the disturbing effect on comparisons which would arise from the passage, for example, of communities formerly classed as rural into the urban group. These two distinct forms of comparison are made in Table I of Chapter 2 for the territory as a whole and for each county separately for the last two censuses.

In 1850 a territorial form of government had been established for New Mexico, which at that time extended westward to the California boundary, and in 1854 the territory acquired by the Gadsden purchase was added to New Mexico. In 1863, by authority of an act of Congress passed in February of that year, the territory of Arizona was organized, with boundaries as at present, except that the northern line extended westward to California. The boundary between Arizona and Nevada was established at its present location in 1866.

In June, 1910, Congress passed an act to enable Arizona and New Mexico to form state constitutions and governments and to be admitted to the Union. In December of that year, a proposed state constitution for Arizona was adopted by a convention held at Phoenix and was ratified by the people in February, 1911. This constitution received the conditional approval of the Federal Government in August, 1911, and was referred to the people of the territory for amendment. February 14, 1912, the territory became a state of the Union.

POPULATION—ARIZONA.

TOTAL POPULATION, INCREASE, AND DISTRIBUTION.

Population of the territory.¹—The population of Arizona is 204,354. Compared with a population of 122,931 in 1900, this represents an increase during the last decade of 81,423, or 66.2 per cent. During the same period the total population of the United States increased 21 per cent. The percentage of increase for the population of the territory during this

decade was a little more than one and two-thirds that for the preceding decade, 1890–1900.

The following table shows the population of Arizona at each census from 1870 to 1910, inclusive, together with the increase and per cent of increase during each decade, in comparison with the per cent of increase for the United States as a whole.

CENSUS YEAR.	Population.	INCREASE OVER PRECEDING CENSUS.		Per cent of increase for the United States.
		Number.	Per cent.	
1910.....	204,354	81,423	66.2	21.0
1900.....	122,931	34,688	39.3	20.7
1890.....	¹ 88,243	47,803	118.2	25.5
1880.....	40,440	30,782	318.7	30.1
1870.....	9,658

¹ Includes population (28,623) of Indian reservations specially enumerated.

Arizona was organized as a territory¹ in 1863 and appears in the Federal census reports for the first time in 1870. During the 20 years from 1870 to 1890 the growth was very rapid, its population increasing a little more than four times during the decade 1870–1880 and a little more than doubling during the decade 1880–1890. The absolute increase for this 20-year period was 78,585. Since 1890 the growth has been somewhat slower, the population increasing 116,111, or 131.6 per cent.

A comparison of the rates of increase for the territory with those for the United States as a whole, as given in the preceding table, shows that during each decade the population of the territory increased much more rapidly than that of the United States. The greatest difference between the two rates was during the decade 1870–1880, when the population of the territory increased 318.7 per cent and that of the country as a whole 30.1 per cent, and the smallest difference during the decade 1890–1900, during which period the population of Arizona increased 39.3 per cent and the population of the United States 20.7 per cent.

Principal cities.—Arizona has eight cities, of which the largest, Tucson, has a population of 13,193, and the second city, Phoenix, a population of 11,134. Tombstone, with 1,582 inhabitants, is the smallest city. The aggregate population of the eight cities is 58,414, or 28.6 per cent of the total population of the territory.

Table 2 shows the population in 1910 of all the cities of the territory, with comparative figures, where possible, for 1900 and 1890. The table in the next column shows the population of the six cities having in 1910 over 5,000 inhabitants, as reported at each census since their incorporation as cities, together with the increase during each decade.

CITY AND CENSUS YEAR.	Population.	INCREASE ¹ OVER PRECEDING CENSUS.	
		Number.	Per cent.
Bisbee: 1910.....	9,019
Douglas: 1910.....	6,437
Globe: 1910.....	7,083
Phoenix: 1910..... 1900..... 1890.....	11,134 5,544 3,162	5,590 2,392	100.8 75.9
Prescott: 1910..... 1900..... 1890.....	5,092 3,559 1,759	1,533 1,800	43.1 102.3
Tucson: 1910..... 1900..... 1890.....	13,193 7,631 5,150	5,062 2,381 –1,857	75.2 46.2 –26.5
	7,007

¹ A minus sign (–) denotes decrease.

Of the cities included in this table, Phoenix, Tucson, and Prescott show increases during the last decade of 100.8, 75.2, and 43.1 per cent, respectively. No figures of increase can be given for either Bisbee, Douglas, or Globe, as they have been incorporated since 1900. Phoenix and Tucson show a higher rate of increase during the last decade, 1900–1910, than during the preceding decade, 1890–1900.

Counties.—Arizona has 13 counties. The population of these counties ranges from 3,773 in Mohave County to 34,591 in Cochise County.

There have been no changes in the territorial boundaries of the counties since 1900.

Each county in the territory has increased in population during the last decade, the rates of increase ranging from 10.1 per cent in Mohave County to 273.9 per cent in Cochise County, and the absolute increases from 347 in Mohave County to 25,340 in Cochise County.

¹ Admitted as a state in 1912.

The maps on page 69 show the increase in the total and the rural population, respectively, of each county of Arizona during the last decade, the different rates of increase being indicated by differences in shading.

Density of population.—The total land area of the territory is 113,810 square miles. The average number of persons to the square mile in 1910 was 1.8; in 1900 and 1890 it was 1.1 and 0.8, respectively. The average number per square mile for the United States as a whole in 1910 was 30.9.

The density of population is given by counties in Table I of Chapter 2 and in the maps on page 70, both for the entire population and for that living in rural territory, excluding in the latter case the population of places of 2,500 or more, but not excluding the land area of such places.

Coconino County, with 18,238 square miles, has the largest area, and Santa Cruz County, with 1,229 square miles, has the smallest area. Cochise County, with 5.6 persons per square mile, has the highest density. Apache, Coconino, Mohave, and Yuma Counties each average less than 1 person per square mile.

Minor civil divisions.—The political divisions into which counties are subdivided are collectively termed "Minor civil divisions." In Arizona the counties are

divided into 155 primary divisions, comprising 132 election precincts, 3 cities, 4 incorporated towns, and 16 school districts. There are also 15 secondary divisions, comprising 5 cities and 10 incorporated towns. Of these, one incorporated town is coextensive with the election precinct in which it is located, the others forming parts of their respective precincts or townships. Besides these minor civil divisions duly organized for governmental purposes there are 32 unorganized townships, 31 unincorporated towns, 7 unincorporated villages, and 11 Indian reservations and part of another in the territory. These are returned under the counties in which they are wholly or partly located. Population not included in any of the specified divisions is shown under the title "Remainder of county."

Urban and rural population compared.—The following table presents the population of Arizona at the censuses of 1910, 1900, and 1890, respectively, distributed among cities and towns grouped according to specified limits of population, together with the percentage of the total population contained in each group at each of the censuses named. The classification is based upon the population of each place as it existed at each census.

CLASS OF PLACES.	1910		1900		1890		PER CENT OF TOTAL POPULATION.		
	Number of places.	Population.	Number of places.	Population.	Number of places.	Population.	1910	1900	1890
Total population.....		204,354		122,931		188,243	100.0	100.0	100.0
Urban territory.....	9	63,260	4	19,495	2	8,302	31.0	15.9	8.4
Cities and towns of—									
10,000 inhabitants or more.....	2	24,327					11.9		
5,000 to 10,000 inhabitants.....	4	27,631	2	13,076	1	5,160	13.6	10.6	5.8
2,500 to 5,000 inhabitants.....	3	11,302	2	6,420	1	3,152	5.5	5.2	3.0
Rural territory.....		141,094		103,436		179,941	69.0	84.1	90.6
Cities and towns of less than 2,500 inhabitants	13	16,406	10	8,849	10	9,247	8.0	7.2	10.5
Other rural territory		124,688		94,587		170,004	61.0	76.9	80.1

¹ Includes population (28,023) of Indian reservations specially enumerated.

As shown by the above table, the urban territory of Arizona in 1910—that is, the cities and incorporated towns of 2,500 inhabitants or more—contained 63,260 inhabitants, or 31 per cent of the total population, while 141,094 inhabitants, or 69 per cent, lived in rural territory. The urban territory as it existed in 1900—that is, the cities and incorporated towns then having 2,500 inhabitants or more—contained 19,495 inhabitants, or 15.9 per cent of the total population, while 103,436 inhabitants, or 84.1 per cent, lived in rural territory. There has thus been a large increase in the proportion of urban population during the last decade. For the United States as a whole the urban population constituted 46.3 per cent of the total population in 1910 and 40.5 per cent of the total population in 1900.

In 1910 Tucson and Phoenix, the two cities in Arizona having over 10,000 inhabitants, contributed 11.9 per cent of the total population of the territory, which was a slight increase over the proportion in these two

cities in 1900, when they comprised the group of places having from 5,000 to 10,000 inhabitants each. The largest proportion of the urban population in the territory in 1910 was contained in the four cities which had from 5,000 to 10,000 inhabitants each.

The above table shows further that in all cities and incorporated towns, including those of less than 2,500 inhabitants, there was in 1910 a population of 79,666, or 39 per cent of the population of the territory. The population of all cities and incorporated towns, as they existed in 1900, was 28,344, or 23.1 per cent of the population of the territory.

Table I of Chapter 2 shows that of the three counties of Arizona which contained urban population in 1900, two had a larger proportion and one a smaller proportion of urban population in 1910 than in 1900, while of the remaining counties which were wholly rural in 1900, five showed a considerable proportion of urban population in 1910.

POPULATION—ARIZONA.

In order to compare the *rate of growth* in urban and rural communities it is necessary in each case, as previously explained, to consider the changes in population which have occurred in the *same* territory from one decennial census to another. With this end in view, places classed as urban or rural according to their population in 1910 are taken as a basis and the aggregate population in 1910 and in 1900 of the same places is then compared. Thus, as shown in the table in the next column, the total population in 1910 of the cities and towns which at that time had 2,500 inhabitants or more was 63,260; in 1900 the total population of these same places (so far as separately reported) was 21,409. It may be noted that the latter figure exceeds the total population in 1900 of the cities and towns which at that time had over 2,500 inhabitants each, 19,495 (see table on p. 67), by 1,914. The difference is the net result of the passage, since 1900, of certain communities from the rural to the urban class and vice versa.

In the following table the population for the territory as a whole is distributed so as to show, for 1910 and 1900, the combined population of cities and towns

having in 1910 2,500 inhabitants or more and the population of the remainder of the territory.

CLASS OF PLACES.	POPULATION.		INCREASE: 1900-1910	
	1910	1900	Number.	Per cent.
The territory.....	204,354	122,931	81,423	66.2
Cities and towns of 2,500 or more in 1910.....	63,260	21,409	41,851	195.5
Remainder of the territory.....	141,094	101,522	39,572	39.0

A comparison of the total population in 1910 of cities and towns having a population of not less than 2,500 each with the total population of the same places in 1900, as given in the table above, shows an increase of 195.5 per cent. This represents the rate of growth of urban communities as thus defined. During the same period the rural population, comprising that of the remainder of the territory, increased 39 per cent. Urban population thus increased a little more than five times as rapidly as that of rural territory. For the United States as a whole urban population increased 34.8 per cent in the last decade and rural population 11.2 per cent.

PER CENT OF INCREASE OR DECREASE OF POPULATION OF ARIZONA, BY COUNTIES: 1900-1910.

In case of decrease the per cent is inserted under the county name.

TOTAL POPULATION.

RURAL POPULATION.

Rural population is defined as that residing outside of incorporated places having 2,500 inhabitants or more.

DENSITY OF POPULATION OF ARIZONA, BY COUNTIES: 1910.

TOTAL POPULATION.

RURAL POPULATION.

Rural population is defined as that residing outside of incorporated places having 2,500 inhabitants or more.

POPULATION—ARIZONA.

CHAPTER 2.—COMPOSITION AND CHARACTERISTICS OF THE POPULATION.

Introduction.—The first chapter having given the number of inhabitants of Arizona by counties and minor civil divisions, the decennial increase and the density of population, and the proportions urban and rural, the present chapter deals with the composition and characteristics of the population. The two chapters cover all the principal topics of the population census except occupations and ownership of homes.

Description of the tables.—The greater part of this chapter consists of three general tables, which present statistics of color, nativity, parentage, sex, citizenship, illiteracy, school attendance, and dwellings and families, as follows: Table I for the state and counties; Table II for the two cities of over 10,000 inhabitants; and Table III for places of 2,500 to 10,000.

A series of summary tables (numbered 1 to 12) reproduces from the general tables the more important state totals, and presents also certain additional data relative to state of birth, age, and marital condition.

On account of the wide differences in characteristics among the different classes of the population, the statistics on each subject are shown according to race, and for the whites according to nativity and parentage. Classification according to nativity and parentage is scarcely necessary for the other races, since nearly all negroes and Indians are native born of native parentage, and nearly all Chinese and Japanese either foreign born or of foreign parentage.

The white population is divided into four groups: (1) Native, native parentage—that is, having both parents born in the United States; (2) native, foreign parentage—having both parents born abroad; (3) native, mixed parentage—having one parent native and the other foreign born; (4) foreign born. As the second and third classes do not differ greatly in characteristics, they are combined in some of the tables; in a few cases all three native white classes are combined.

Since marked differences often exist between urban and rural communities with respect to the composition and characteristics of the population, the two classes are distinguished in connection with several of the subjects. Urban population, as defined by the Bureau of the Census, includes that of all incorporated places of 2,500 inhabitants or more, the remainder being classified as rural.

The census inquiry as to school attendance was merely as to whether the person enumerated had attended any

kind of school at any time between September 1, 1909, and the date of enumeration, April 15, 1910.

The Census Bureau classifies as illiterate any person 10 years of age or over who is unable to write, regardless of ability to read.

Color and nativity (Table 1).—Of the total population of Arizona, 82,468, or 40.4 per cent, are native whites of native parentage; 42,176, or 20.7 per cent, are native whites of foreign or mixed parentage; 46,824, or 22.9 per cent, are foreign-born whites; and 29,201, or 14.3 per cent, are Indians. The corresponding percentages in 1900 were 36.5, 20.9, 18.2, and 21.5, respectively. In 8 of the 18 counties at least 20 per cent of the population is white of foreign or mixed parentage, and in 7 counties more than 20 per cent is foreign-born white. In Santa Cruz County 42.3 per cent of the population is foreign-born white, and only 22.8 per cent is native white of native parentage. (See maps on page 81.)

Of the urban population, 42.1 per cent are native whites of native parentage; of the rural, 39.6 per cent. The corresponding proportions for native whites of foreign or mixed parentage are 26.1 and 18.2 per cent, respectively. The percentage of foreign-born whites is 27.2 in the urban population and 21 in the rural; the percentage of Indians is 1.2 in the urban and 20.1 in the rural. The Indian population is almost exclusively rural, only 2.6 per cent living in urban communities.

Sex (Table 2).—In the total population of the state there are 118,574 males and 85,780 females, or 138.2 males to 100 females. In 1900 the ratio was 140.4 to 100. Among native whites the ratio is 129.3; among foreign-born whites, 188.4; and among the Indians, 106.4 to 100. In the urban population there are 126 males to 100 females, and in the rural, 144.2.

State of birth (Tables 3 and 4).—Of the native population—that is, population born in the United States—50.7 per cent were born in Arizona and 49.3 per cent outside the state; of the native white population, 59.5 per cent were born outside the state; of the native Indians, 1.9; and of the native negroes, 85.5 per cent.

Foreign nationalities (Table 5).—Of the foreign-born white population of Arizona, persons born in Mexico represent 62.9 per cent; England, 7.5; Germany, 3.9; Canada, 3.9; Ireland, 3.3; Italy, 3.3; Austria, 3.2; Spain, 1.8; Sweden, 1.8; Scotland, 1.2; Finland, 1.2; all other countries, 6. Of the total white stock of

POPULATION—ARIZONA.

foreign origin, which includes persons born abroad and also natives having one or both parents born abroad, Mexico contributed 57.4 per cent; England, 8.2; Germany, 6.3; Ireland, 5.5; Canada, 4.4; Italy, 2.5; Austria, 2.2; Sweden, 1.8; Scotland, 1.7; Spain, 1.

Voting and militia ages (Table 6).—The total number of males 21 years of age and over is 74,051, representing 36.2 per cent of the population. Of such males, 38.8 per cent are native whites of native parentage, 14.4 per cent native whites of foreign or mixed parentage, 34.7 per cent foreign-born whites, 9 per cent Indians, 2 per cent Chinese and Japanese, and 1 per cent negroes. Of the 25,682 foreign-born white males of voting age, 5,912, or 23 per cent, are naturalized. Males of militia age—18 to 44—number 58,962.

Age (Tables 7 and 8).—Of the total population, 12.1 per cent are under 5 years of age, 19.6 per cent from 5 to 14 years, inclusive, 18.7 per cent from 15 to 24, 33.7 per cent from 25 to 44, and 15.6 per cent 45 years of age and over. The proportion of children is highest among native whites of foreign or mixed parentage, and next highest in the Indian population. The foreign-born white population comprises comparatively few children, only 11 per cent of this class being under 15 years of age, while 70 per cent are 25 years of age and over. Of the native whites of native parentage, less than one-half (47.3 per cent) are 25 and over, and of the native whites of foreign or mixed parentage only a little more than one-third (35.3 per cent).

The urban population shows a smaller proportion of children than the rural and a larger proportion of persons in the prime of life. Of the urban population, 37.1 per cent are from 25 to 44 years of age, inclusive, and of the rural population, 32.1 per cent.

School attendance (Table 9).—The total number of persons of school age—that is, from 6 to 20 years, inclusive—is 56,897, of whom 30,355, or 53.4 per cent, attended school. In addition to these, 490 persons under 6 and 501 of 21 and over attended school. For boys from 6 to 20 years, inclusive, the percentage attending school was 52.5; for girls, 54.3. For children from 6 to 14 years, inclusive, the percentage attending school was 67.2. The percentage for children of this age among native whites of native parentage was 80.4; among native whites of foreign or mixed parentage, 72.1; among foreign-born whites, 61.6; among Indians, 34.1. Of the small number of negro children aged 6 to 14 years 81.5 per cent were attending school. (See Table I.) The percentage attending school for children aged 6 to 14 is higher in urban than in rural communities.

Illiteracy (Table 10).—There are 32,953 illiterates in the state, representing 20.9 per cent of the total population 10 years of age and over, as compared with 29 per cent in 1900. The percentage of illiteracy is 72.9 in the Indian population, 31.5 among foreign-born whites, 7.2 among negroes, and 4.2 among native whites.

For all classes combined, the percentage illiterate is 9.9 in the urban population, and 26.1 in the rural. For each element of the population the percentage illiterate is higher in rural than in urban communities.

For persons from 10 to 20 years, inclusive, whose literacy depends largely upon present school facilities and school attendance, the percentage of illiteracy is 18. (See Table I.)

Marital condition (Table 11).—In the population 15 years of age and over, 45.8 per cent of the males are single and 22.2 per cent of the females. The percentage married is 47.7 for males and 65.7 for females, and the percentage widowed 4.4 and 10.5, respectively. The percentages of those reported as divorced, 0.8 and 1, respectively, are believed to be too small, because of the probability that many divorced persons class themselves as single or widowed.

That the percentage single is so much smaller for women than for men, though partly accounted for by the excess of males in the total population of the state, is due largely to the fact that women marry younger than men. Thus 20.3 per cent of the females and only 2 per cent of the males from 15 to 19 years of age are married; 64.5 per cent of the females and 20.6 per cent of the males from 20 to 24 years; 82.5 per cent of the females and 51.9 per cent of the males from 25 to 34 years; and 83.2 per cent of the females and 66.5 per cent of the males 35 to 44 years of age. In the age group 45 and over the difference practically disappears, the percentage married being 61.3 for females and 62.5 for males. That there is a larger proportion of widows than of widowers may indicate that men more often remarry than women, but, since husbands are generally older than their wives, the marriage relationship is in fact more often broken by death of the husband than by death of the wife.

For the main elements of the population the percentages of married persons among those 15 years of age and over are as follows: Foreign-born whites, 47.9 for males and 68.2 for females; native whites of native parentage, 46.5 and 66.4, respectively; native whites of foreign or mixed parentage, 40.7 and 60.2; Indians, 61.6 and 67.6.

These percentages by no means indicate the relative tendency of the several classes as regards marriage. To determine that, the comparison should be made by age periods, since the proportion married in any class is determined largely by the proportion who have reached the marrying age. Similarly, the proportion widowed depends largely on the proportion past middle life. The percentage married for females is higher in rural than in urban communities; for males the percentages are practically the same.

Dwellings and families.—The total number of dwellings in Arizona is 45,386, and the total number of families 47,927, there being 105.6 families to each 100 dwellings. (See Table I.) The average number of persons per dwelling is 4.5, and the average number per family, 4.3.

¹ See explanatory notes below.

NOTES REGARDING CHANGES IN BOUNDARIES, ETC.

COUNTIES.

APACHE.—Organized from part of Yavapai in 1870; part taken to form part of Graham in 1881; part taken to form Navajo in 1895.

COCHISE.—Organized from part of Pima in 1881.

COCONINO.—Organized from part of Yavapai in 1891.

GILA.—Organized from parts of Maricopa and Pinal in 1881.

GRAHAM.—Organized from parts of Apache and Pima in 1881.

MARICOPA.—Organized from part of Yavapai in 1871; part of Pima annexed in 1873; parts taken to form part of Pinal in 1875 and part of Gila in 1881.

NAVAJO.—Organized from part of Apache in 1895.

PIMA.—Part taken to form part of Pinal in 1875; parts annexed to Maricopa in 1873 and Pinal in 1877; parts taken to form Cochise and part of Graham in 1881 and Santa Cruz in 1899.

PINAL.—Organized from parts of Maricopa, Pima, and Yavapai in 1875; part of Pima annexed in 1877; part taken to form part of Gila in 1881.

SANTA CRUZ.—Organized from part of Pima in 1899.

YAVAPAI.—Parts taken to form Maricopa in 1871, Apache in 1870, Coconino in 1891, and part of Pinal in 1875.

NOTE 1.—Population for Gila County and estimated population (2,272) for that part of San Carlos Indian Reservation now in Gila County—1900, 7,245; increase, 1900-1910, 9,103; per cent of increase, 125.6. Rural population—1910, 9,265; same territory in 1900, 5,750; per cent of increase, 1900-1910, 61.1. Rural population—1900, 7,245.

NOTE 2.—Population for Graham County and estimated population (798) for that part of San Carlos Indian Reservation now in Graham County—1900, 14,955; increase, 1900-1910, 9,044; per cent of increase, 60.5. Rural population—1910, 19,125; same territory in 1900, 14,955; per cent of increase, 1900-1910, 27.9. Rural population—1900, 14,955.

NOTE 3.—In computing this increase the population of Indian reservations in 1900 has been deducted from the total population of the county in order to make that total comparable with the total for 1890 which does not include the population of Indian reservations. The population thus deducted in the several counties was as follows: Apache, 5,341; Coconino, 1,113; Gila, 709; Maricopa, 2,451; Navajo, 5,027; Pima, 1,543; Pinal, 2,954; Yuma, 583.

INCORPORATED PLACES.

BISBEE.—Incorporated in 1902.

CLIFTON.—Incorporated in 1909.

GLOBE.—Incorporated in 1907.

Douglas.—Incorporated in 1905.

YUMA.—Incorporated in 1902.
