Historic census records are maintained and released by the National Archives and Records Administration, not the U.S. Census Bureau.

Visit <http://www.archives.gov> for more information about publicly available records like the one shown here.

Remarks: It was supposed that the Fever of which the persons died was a love originated from the letting off a mill Pond belonging to Wenson Hunt in whose family it broke out and was believed to be contagious as there was no instance of any person taking it who did not visit those who had it.
